The only distinct thing is that they have different ways to use. The PDF format of MB-820 exam torrent is easy to download, prints, and browse learning, which can be printed on paper and can make notes anytime. You can learn anywhere, repeated practice, and use in unlimited number of times. SOFT/PC test engine of MB-820 exam applies to Windows system computers. It can simulate the real operation test environment. The number of Download and install are unlimited. The number of computers of using MB-820 Questions torrent is unlimited too. App/online test engine of the MB-820 guide torrent is designed

based on a Web browser, as long as a browser device is available. It has the functions of simulating examination, limited-timed examination and online error correcting.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q58-Q63):

NEW QUESTION # 58

A developer creates a profile for part-time shop supervisors and adds customizations.

You plan to add new requirements to the profile.

You need to analyze the code to understand the profile and make sure there are no errors.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup: No Variables, procedures, and triggers cannot be added on page customization objects: Yes Line 10 should use extends instead of customizes: No In line 18, "Unit Cost" will be moved after "Costing Method": Yes The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup.

* No

* The code doesn't contain any reference to the User Setup table or the Register Time field, so this is not correct. Profiles are not applied conditionally based on fields like this.

Variables, procedures, and triggers cannot be added on page customization objects.

* Yes

* Page customization objects are meant for UI modifications, such as moving or hiding fields. You cannot add variables, procedures, or triggers in a page customization object.

Line 10 should use extends instead of customizes.

* No

* In AL, when customizing a page within a profile, you use customizes rather than extends. Extends is used when modifying base application objects, but customizes is used to customize pages within a profile.

In line 18, "Unit Cost" will be moved after "Costing Method".

* Yes

* The code in line 18 is correct. The moveafter directive will move the "Unit Cost" field after the "Costing Method" field on the page layout.

NEW QUESTION # 59

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear on the review screen.

A company creates a Business Central app and a table named MyTable to store records when sales orders are posted.

Users report the following issues:

* The users receive permission errors related to MyTable.

* Users are no longer able to post sales orders since installing the new app.

* The users cannot access the list page created in MyTable.

You need to resolve the user issues without creating new permission sets. You must use the principle of least privilege.

Solution: Assign a SUPER permission set.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Assigning a SUPER permission set to all users would indeed resolve the permission errors and access issues reported by the users,

as it grants full permissions across all objects and data in Business Central. However, this approach contradicts the principle of least privilege, which advocates for providing only the minimum levels of access necessary for users to perform their jobs. The SUPER permission set would excessively elevate user privileges, potentially leading to security risks and unintended modifications to critical data. Therefore, while assigning the SUPER permission set might technically resolve the immediate issues, it does not meet the goal of adhering to the principle of least privilege and is not a recommended solution.

NEW QUESTION # 60

A company is examining Connect apps and Add-on apps for use with Business Central.

You need to describe the development language requirements for Connect apps and Add-on apps.

How should you describe the app language requirements? To answer, move the appropriate app types to the correct descriptions.

You may use each app type once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

* Developed by using any coding language: Connect app

* Developed by using AL language in Visual Studio Code: Add-on app

In Microsoft Dynamics 365 Business Central, there are distinct types of applications that can be developed:

Connect apps and Add-on apps. Each has its own development language requirements:

* Connect apps:

* Connect apps are designed to connect Business Central with external services or applications.

They are often developed using a variety of programming languages, not limited to the AL language, and can be hosted outside of the Business Central environment. Therefore, when a description states that the app is developed using any coding language, it generally refers to a Connect app. This type of app integrates with Business Central through APIs and web services.

* Add-on apps:

* Add-on apps are built to extend the functionality of Business Central within the application itself.

These are developed using the AL language, which is the programming language for Business Central, and they are created and managed within the Visual Studio Code environment with the AL Language extension. An Add-on app is typically a Business Central extension that is directly installed into the Business Central environment.

The language and environment used for developing these apps are key differentiators between Connect apps and Add-on apps.

NEW QUESTION # 61

A company is examining Connect apps and Add-on apps for use with Business Central.

You need to describe the development language requirements for Connect apps and Add-on apps.

How should you describe the app language requirements? To answer, move the appropriate app types to the correct descriptions.

You may use each app type once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

* Developed by using any coding language: Connect app

* Developed by using AL language in Visual Studio Code: Add-on app

In Microsoft Dynamics 365 Business Central, there are distinct types of applications that can be developed:

Connect apps and Add-on apps. Each has its own development language requirements:

* Connect apps:

* Connect apps are designed to connect Business Central with external services or applications.

They are often developed using a variety of programming languages, not limited to the AL language, and can be hosted outside of the Business Central environment. * Add-on apps:

* Add-on apps are built to extend the functionality of Business Central within the application itself.

These are developed using the AL language, which is the programming language for Business Central, and they are created and managed within the Visual Studio Code environment with the AL Language extension. An Add-on app is typically a Business Central extension that is directly installed into the Business Central environment.

The language and environment used for developing these apps are key differentiators between Connect apps and Add-on apps.

NEW QUESTION # 62

You are writing a procedure to block all inventory items with numbers that do not start with the letter S.

You need to complete the procedure.

How should you complete the code expressions? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

```
procedure BlockNonSItems()
```

```
var
```

```
Item: Record Item;
```

```
begin
```

```
// Reset the Item record to clear any previous filters.
```

```
Item.Reset();
```

```
// Set the filter to exclude items that start with 'S'.
```

```
Item.SetFilter("No.", '<>%1*', 'S');
```

```
// Find each item that matches the filter.
```

```
if Item.FindSet() then
```

```
repeat
```

```
// Set the Blocked field to true to block the item.
```

```
Item.Blocked := true;
```

```
// Save the changes to the Item record.
```

```
Item.Modify();
```

```
until Item.Next() = 0; // Continue until no more items are found.
```

```
end;
```

NEW QUESTION # 63

.....

How to pass the MB-820 exam and gain a certificate successfully is of great importance to people who participate in the exam.

Here our company can be your learning partner and try our best to help you to get success in the MB-820 exam. Why should you choose our company with MB-820 Preparation braindumps? We have the leading brand in this career and successfully help tens of thousands of our customers pass their MB-820 exam and get admired certification.
