

Dumps AZ-305 Download - Reliable AZ-305 Test Testking

P.S. Free 2026 Microsoft AZ-305 dumps are available on Google Drive shared by Prep4pass: <https://drive.google.com/open?id=1BDw5sZm5M1HQP3odhGSshI7ZVHFeN4ra>

The users of AZ-305 exam dumps cover a wide range of fields, including professionals, students, and students of less advanced culture. This is because the language format of our study materials is easy to understand. No matter what information you choose to study, you don't have to worry about being a beginner and not reading data. AZ-305 test questions are prepared by many experts. The content is very rich, and there are many levels. Whatever you want to choose, you want to learn from which stage. In our study materials, you can find the right one for you. At the same time, the AZ-305 Exam Prep is constantly updated. After you have finished learning a part, you can choose a new method according to your own situation. Our study materials are so easy to understand that no matter who you are, you can find what you want here.

Microsoft AZ-305 certification exam is designed for individuals who want to validate their skills in designing Microsoft Azure infrastructure solutions. AZ-305 exam is part of the Microsoft Certified: Azure Solutions Architect Expert certification track, which is a highly sought-after credential in the technology industry. AZ-305 Exam Tests your ability to design solutions that meet business requirements, optimize costs, and ensure high availability and disaster recovery.

Reliable AZ-305 Test Testking & AZ-305 Testking Exam Questions

In the past few years, Microsoft certification AZ-305 exam has become an influenced computer skills certification exam. However, how to pass Microsoft certification AZ-305 exam quickly and simply? Our Prep4pass can always help you solve this problem quickly. In Prep4pass we provide the AZ-305 Certification Exam training tools to help you pass the exam successfully. The AZ-305 certification exam training tools contains the latest studied materials of the exam supplied by IT experts.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q346-Q351):

NEW QUESTION # 346

You are developing a multi-tier app named App1 that will be hosted on Azure virtual machines. The peak utilization periods for App1 will be from 8 AM to 9 AM and 4 PM to 5 PM on weekdays.

You need to deploy the infrastructure for App1. The solution must meet the following requirements:

- * Support virtual machines deployed to four availability zones across two Azure regions.
- * Minimize costs by accumulating CPU credits during periods of low utilization.

What is the minimum number of virtual networks you should deploy, and which virtual machine size should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Number of virtual networks:

Virtual machine size:

Microsoft

Answer:

Explanation:

Answer Area

Number of virtual networks:

Virtual machine size:

Microsoft

Explanation:

Answer Area

Number of virtual networks:

Virtual machine size:

Microsoft

NEW QUESTION # 347

Your on-premises network contains a file server named Server1 that stores 500 GB of data.

You need to use Azure Data Factory to copy the data from Server1 to Azure Storage.

You add a new data factory.

What should you do next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

From Server1:  ▼

- Install an Azure File Sync agent
- Install a self-hosted integration runtime
- Install the File Server Resource Manager role service

From the data factory: ▼

- Create a pipeline
- Create an import/export job
- Provision an Azure-SQL Server Integration Services (SSIS) integration runtime

Answer:

Explanation:

From Server1: ▼

- Install an Azure File Sync agent
- Install a self-hosted integration runtime
- Install the File Server Resource Manager role service

From the data factory: ▼

- Create a pipeline
- Create an import/export job
- Provision an Azure-SQL Server Integration Services (SSIS) integration runtime

Explanation:

From Server1: ▼

- Install an Azure File Sync agent
- Install a self-hosted integration runtime
- Install the File Server Resource Manager role service

From the data factory: ▼

- Create a pipeline
- Create an import/export job
- Provision an Azure-SQL Server Integration Services (SSIS) integration runtime

Box 1: Install a self-hosted integration runtime

The Integration Runtime is a customer-managed data integration infrastructure used by Azure Data Factory to provide data integration capabilities across different network environments.

Box 2: Create a pipeline

With ADF, existing data processing services can be composed into data pipelines that are highly available and managed in the cloud. These data pipelines can be scheduled to ingest, prepare, transform, analyze, and publish data, and ADF manages and orchestrates the complex data and processing dependencies References:

<https://docs.microsoft.com/en-us/azure/machine-learning/team-data-science-process/move-sql-azure-adf>

<https://docs.microsoft.com/pl-pl/azure/data-factory/tutorial-hybrid-copy-data-tool> syu31svc 3 months, 4 weeks ago

<https://docs.microsoft.com/en-us/azure/data-factory/create-self-hosted-integration-runtime?tabs=data-factory>

"A self-hosted integration runtime can run copy activities between a cloud data store and a data store in a private network"

<https://docs.microsoft.com/en-us/azure/data-factory/introduction>

"With Data Factory, you can use the Copy Activity in a data pipeline to move data from both on-premises and cloud source data stores to a centralization data store in the cloud for further analysis"

NEW QUESTION # 348

You plan to migrate App1 to Azure.

You need to recommend a high-availability solution for App1. The solution must meet the resiliency requirements.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Number of host groups:

Number of virtual machine scale sets:

Answer:

Explanation:

Number of host groups:

Number of virtual machine scale sets:

<https://docs.microsoft.com/en-us/azure/virtual-machines/dedicated-hosts>

<https://docs.microsoft.com/en-us/azure/virtual-machine-scale-sets/virtual-machine-scale-sets-autoscale-overview>

NEW QUESTION # 349

Your company has an app named App1 that uses data from the on-premises Microsoft SQL Server databases shown in the following table.

Name	Size
DB1	450 GB
DB2	250 GB
DB3	300 GB
DB4	50 GB

App1 and the data are used on the first day of the month only. The data is not expected to grow more than 3% each year.

The company is rewriting App1 as an Azure web app and plans to migrate all the data to Azure.

You need to migrate the data to Azure SQL Database. The solution must minimize costs.

Which service tier should you use?

- A. vCore-based Business Critical
- B. DTU-based Standard
- C. vCore-based General Purpose
- D. DTU-based Basic

Answer: C

Explanation:

DTU-based Standard supports databases up to 1 TB in size.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/database/service-tiers-dtu>

NEW QUESTION # 350

You plan to deploy the backup policy shown in the following exhibit.

Policy

Associated items Delete Save Discard

Backup frequency

Daily 6:00 PM (UTC) Coordinated Universal Time

Retention range

☒ Retention of daily backup point.

* At 6:00 PM For 90 Day(s)

☒ Retention of weekly backup point.

* On Sunday * At 6:00 PM For 26 Week(s)

☒ Retention of monthly backup point.

Week Based Day Based

* On First * Day Sunday * At 6:00 PM For 36 Month(s)

☐ Retention of yearly backup point.

Not Configured

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Virtual machines that are backed up using the policy can be recovered for up to a maximum of [answer choice].

	▼
90 days	
26 weeks	
36 months	
45 months	

The minimum recovery point objective (RPO) for virtual machines that are backed up by using the policy is [answer choice].

	▼
1 hour	
1 day	
1 week	
1 month	
1 year	

Answer:

Explanation:

Virtual machines that are backed up using the policy can be recovered for up to a maximum of [answer choice].

	▼
90 days	
26 weeks	
36 months	
45 months	

The minimum recovery point objective (RPO) for virtual machines that are backed up by using the policy is [answer choice].

NEW QUESTION # 351

.....

Many candidates who take the qualifying exams are not aware of our products and are not guided by our systematic guidance, and our users are much superior to them. In similar educational products, the AZ-305 quiz guide is absolutely the most practical. Also, from an economic point of view, our Designing Microsoft Azure Infrastructure Solutions exam dumps is priced reasonable, so the AZ-305 test material is very responsive to users, user satisfaction is also leading the same products. So economical and practical learning platform, I believe that will be able to meet the needs of users. Users can deeply depend on our Designing Microsoft Azure Infrastructure Solutions exam dumps when you want to get a qualification. There may be many problems and difficulties you will face, but believe in our Designing Microsoft Azure Infrastructure Solutions exam dumps if you want to be the next beneficiary, our AZ-305 Quiz guide is not only superior in price than any other makers in the educational field, but also are distinctly superior in the quality of our products.
