Laden Sie die neuesten Pass4Test C-BCBTP-2502 PDF-Versionen von Prüfungsfragen kostenlos von Google Drive herunter: <https://drive.google.com/open?id=1ZVdbCdEhCwT9chE9SR4wGucDYPeQTued>

Jedem, der die Prüfungsunterlagen und Software zu SAP C-BCBTP-2502 Dumps (SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite) von Pass4Test nutzt und die IT C-BCBTP-2502 Zertifizierungsprüfungen nicht beim ersten Mal erfolgreich besteht, versprechen wir, die Kosten für das Prüfungsmaterial 100% zu erstatten.

SAP C-BCBTP-2502 Prüfungsplan:

| Thema | Einzelheiten |
|---------|--|
| Thema 1 | <ul style="list-style-type: none">• Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings. |
| Thema 2 | <ul style="list-style-type: none">• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value. |

C-BCBTP-2502 Zertifizierungsfragen, SAP C-BCBTP-2502 PrüfungFragen

Möchten Sie wissen, woher unsere Konfidenz für SAP C-BCBTP-2502 kommt? Lassen Sie mich erzählen. Zuerst, Pass4Test besitzt eine sehr erfahrene Gruppe, die Prüfungssoftware entwickelt. Zweitens, zahllose Kunden haben nach dem Benutzen unserer Produkte die SAP C-BCBTP-2502 Prüfung bestanden. Die Zertifizierung der SAP C-BCBTP-2502 wird weltweit anerkannt. Möchten Sie diese Zertifizierung besitzen? Mit Hilfe unserer SAP C-BCBTP-2502 Prüfungssoftware können Sie auch unbelastet erwerben!

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite C-BCBTP-2502 Prüfungsfragen mit Lösungen (Q10-Q15):

10. Frage

Which SAP BTP solution can be used to streamline handling of blocked sales orders?

- **A. SAP Build Process Automation**
- B. SAP Integration Suite
- C. SAP Analytics Cloud
- D. SAP Datasphere

Antwort: A

Begründung:

Blocked sales orders often represent a significant bottleneck in the "Order-to-Cash" process, usually requiring manual intervention from credit managers or sales administrators. SAP Build Process Automation is the ideal BTP solution to streamline this task. It combines the capabilities of workflow management and Robotic Process Automation (RPA) to automate the evaluation and release (or escalation) of these orders based on predefined business rules and real-time data from SAP S/4HANA.

By positioning SAP Build Process Automation as the solution, businesses can implement "exception-based" management. Instead of a human reviewing every blocked order, the BTP service can automatically release orders that meet certain low-risk criteria or route high-value/high-risk blocks to the appropriate manager's mobile device for instant approval. This significantly reduces the "Day Sales Outstanding" (DSO) and improves customer satisfaction by accelerating fulfillment. This approach highlights the value of SAP BTP as an extension layer for the SAP Business Suite; it allows for the optimization of core ERP processes without the need for complex, custom ABAP development, maintaining a "clean core" while achieving high levels of operational efficiency.

11. Frage

Which SAP BTP component provides a centralized hub for managing enterprise APIs?

- A. SAP Business Network
- **B. SAP API Management**
- C. SAP SuccessFactors
- D. SAP Ariba

Antwort: B

Begründung:

As businesses move toward a "composable" architecture, APIs (Application Programming Interfaces) become the essential links between different software components. SAP API Management, a core capability of the SAP Integration Suite on BTP, provides a centralized hub to design, publish, secure, and monitor these APIs.

In a complex SAP Business Suite environment, APIs might be exposed from S/4HANA, SuccessFactors, or even third-party non-SAP systems. Without a centralized management tool, these connections become difficult to track, secure, and update.

SAP API Management allows IT administrators to enforce consistent security policies (such as OAuth or rate-limiting) across all enterprise services, protecting sensitive data from unauthorized access. It also includes a

"Developer Portal," which serves as a self-service catalog where developers can discover and test available APIs, significantly speeding up the development of new applications and integrations. By positioning API Management as a central pillar, SAP BTP enables "API-first" development, which is critical for digital transformation. This ensures that the enterprise is open and connectable, allowing for seamless communication between the digital core and the vast ecosystem of cloud services, mobile apps, and IoT devices.

12. Frage

Which SAP BTP service supports real-time financial data analysis for banking and finance industries?

- A. SAP Conversational AI
- **B. SAP HANA Cloud**
- C. SAP Business Network
- D. SAP Fieldglass

Antwort: B

Begründung:

For the banking and finance industries, the ability to process and analyze data in real-time is not just an advantage-it is a regulatory and operational necessity. SAP HANA Cloud is the foundational BTP service that supports this requirement. Due to its advanced

in-memory computing architecture, HANA Cloud allows financial institutions to perform complex risk assessments, liquidity monitoring, and fraud detection on live transactional data.

In the context of the SAP Business Suite for Finance, HANA Cloud eliminates the latency associated with traditional data warehousing. Financial analysts can run "what-if" simulations and "instant closes" directly on the production data set. This real-time capability is essential for managing market volatility and meeting stringent reporting deadlines. Furthermore, HANA Cloud's multi-model processing allows it to handle not just standard relational data, but also spatial and graph data, which are increasingly used in modern financial services for relationship mapping and anti-money laundering (AML) initiatives. By positioning HANA Cloud as the central data engine, SAP BTP provides the high-performance infrastructure needed to power the next generation of digital banking services.

13. Frage

Which SAP BTP service allows businesses to create low-code/no-code applications?

- **A. SAP Build Apps**
- B. SAP Business Network
- C. SAP BusinessObjects
- D. SAP Concur

Antwort: A

Begründung:

To accelerate digital transformation, SAP has introduced the SAP Build portfolio on BTP, which is specifically designed to democratize application development. SAP Build Apps (formerly AppGyver) is the primary service within this portfolio that enables the creation of enterprise-grade applications using a no-code visual environment. This service allows users to build sophisticated user interfaces for mobile and web applications by simply dragging and dropping components. It also includes a visual logic editor, which eliminates the need to write traditional code for defining how the application behaves.

The strategic importance of SAP Build Apps within the SAP Business Technology Platform is its ability to reduce the backlog of IT departments. By allowing business experts—who understand the process but may not know how to code—to build their own solutions, SAP ensures that innovation can happen at the "front lines" of the business. These apps can easily be connected to SAP S/4HANA or other backend systems through secure APIs, ensuring that data integrity is maintained. This contrasts with tools like SAP BusinessObjects, which is focused on business intelligence and reporting, or SAP Concur, which is a specific SaaS application for travel and expense management. SAP Build Apps is a foundational service for positioning BTP as an agile platform for rapid extension and innovation.

14. Frage

Which of the following are key products of SAP Business Technology Platform (SAP BTP)? (Choose two).

- **A. SAP HANA Cloud**
- B. SAP SuccessFactors
- C. SAP Ariba
- **D. SAP Integration Suite**

Antwort: A,D

Begründung:

SAP Business Technology Platform (SAP BTP) is organized into four primary functional pillars: Database and Data Management, Analytics, Application Development and Integration, and Intelligent Technologies.

SAP HANA Cloud serves as the foundation of the Database and Data Management pillar, providing a single, integrated powerhouse for all enterprise data. It offers the speed of in-memory processing combined with the scalability of the cloud, allowing businesses to manage large volumes of data while providing a "single source of truth." On the other hand, SAP Integration Suite is the cornerstone of the Integration pillar. It is an integration platform-as-a-service (iPaaS) that allows organizations to seamlessly connect SAP and non-SAP applications, whether they reside on-premise or in the cloud. It provides pre-built content and connectors that significantly reduce the complexity of landscape orchestration. In contrast, SAP Ariba and SAP SuccessFactors are specialized Software-as-a-Service (SaaS) applications. While they are part of the broader SAP ecosystem and often run on or integrate via BTP, they are considered line-of-business (LoB) solutions rather than core components of the technology platform itself. Understanding this distinction is vital for positioning BTP as the underlying "glue" that enables the "Intelligent Enterprise" strategy by providing the technical tools necessary to extend and integrate these LoB applications.

15. Frage

.....

Wenn Sie IT-Industrie auswählen, wählen Sie nämlich die gutbezahlte Arbeit und bessere Aussichten. Deshalb wollen immer mehr Leute das IT-Zertifikat besitzen. Und heute nehmen immer mehr Leute an SAP C-BCBTP-2502 Zertifizierungsprüfung teil. Und wir Pass4Test bieten Kadidaten die echten Prüfungsfragen und -antworten mit günstigen Preisen und höher Qualität. Und Wir Pass4Test bieten Ihnen einjährigen kostenlosen Aktualisierungsservice. Und unsere C-BCBTP-2502 Prüfungsunterlagen sind schon bereit. Wir Pass4Test sind der führende Lieferant der Prüfungsunterlagen. Wir haben die neuesten und die richtigsten SAP C-BCBTP-2502 Zertifizierungsunterlagen, nämlich die Prüfungsfragen und die Testantworten.
