## Microsoft Power Platform Functional Consultant Sample Questions (Q69-Q74):

### NEW QUESTION # 69

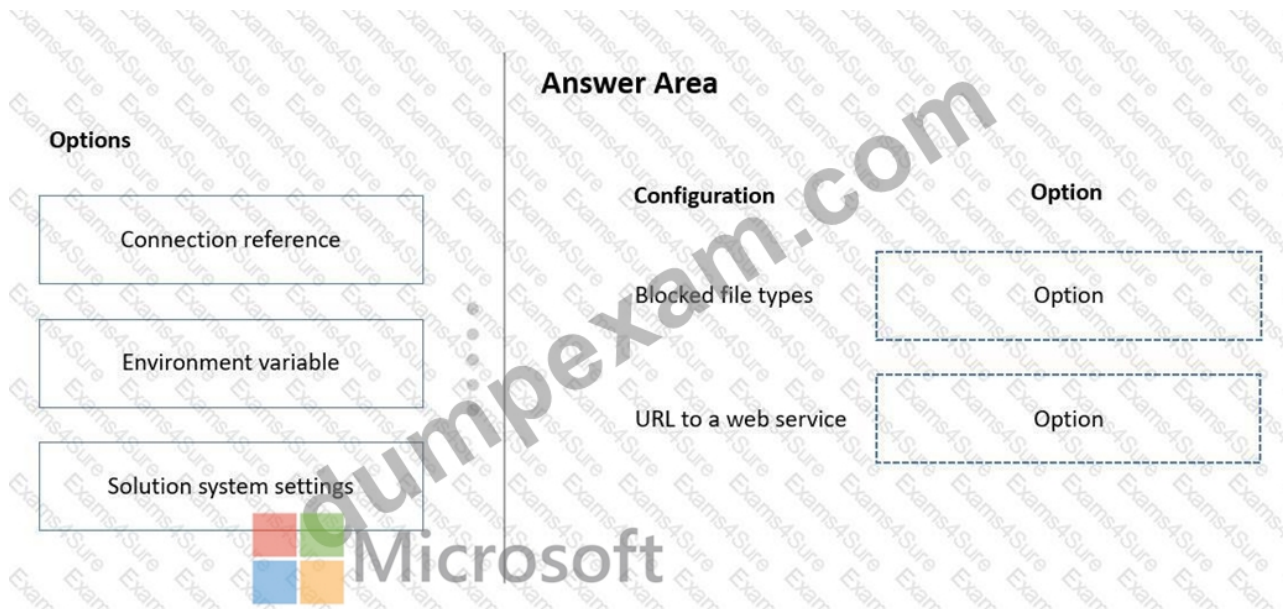

You create a new solution for a business process.

The business process includes uploading specific file types to a web service.

You need to ensure that the business process works the same way anywhere the solution is deployed.

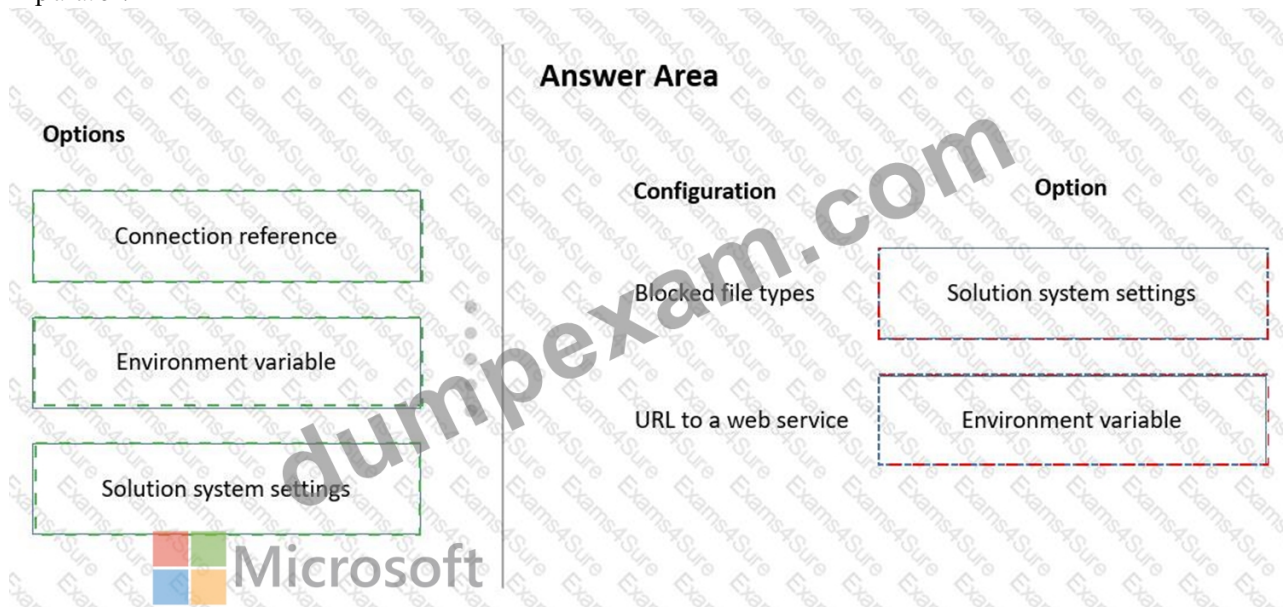

Which option should you use? To answer, drag the appropriate options to the correct configurations. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

**Explanation:**

**Explanation**

Box 1: Solution system settings

For Power Apps in Settings > Customizations > Customize the System you can configure email and document management, activate or deactivate processes, and more.

Box 2: Environment variable

When should Environment variables be used?

Some examples include:

When an input parameter needs to change across environments and should not be hard-coded. For example, a URL that points to a different resource in development and production environments.

If you're building a solution where your customer is required to provide an input value.

Application setup pages.

Incorrect:

A connection reference is a solution component that contains information about a connector.

**NEW QUESTION # 70**

You have a model-driven app. You create five Microsoft Excel templates for analyzing customer data. Four of the templates must be available to all users. The remaining template must be available only to you. You configure the appropriate security roles for users. You need to determine how to upload the Excel templates. Which method should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Availability	Method
Available to everyone	<div>▼</div> <div>In the Settings menu, select Document Templates.</div> <div>In the view for the email records, select Excel Templates.</div> <div>In the Settings menu, select Email Templates.</div>
Available only to yourself	<div>▼</div> <div>In the Settings menu, select Document Templates.</div> <div>In the view for the email records, select Excel Templates.</div> <div>In the Settings menu, select Email Templates.</div>

**Answer:**

Explanation:

Availability	Method
Available to everyone	<div>▼</div> <div>In the Settings menu, select Document Templates.</div> <div>In the view for the email records, select Excel Templates.</div> <div>In the Settings menu, select Email Templates.</div>
Available only to yourself	<div>▼</div> <div>In the Settings menu, select Document Templates.</div> <div>In the view for the email records, select Excel Templates.</div> <div>In the Settings menu, select Email Templates.</div>

Explanation:

Availability	Method
Available to everyone	<div>▼</div> <div>In the Settings menu, select Document Templates.</div> <div>In the view for the email records, select Excel Templates.</div> <div>In the Settings menu, select Email Templates.</div>
Available only to yourself	<div>▼</div> <div>In the Settings menu, select Document Templates.</div> <div>In the view for the email records, select Excel Templates.</div> <div>In the Settings menu, select Email Templates.</div>

Box 1: In the Settings menu, select Document Templates

Templates uploaded from the Settings page are available to all users. You don't need to take any further action.

Administrators can use the Settings page to upload the Excel template. A template uploaded in Settings is available to all users.

For admins: Upload the Excel template

\* Go to Settings > Templates > Document Templates.

\* Click Upload Template.

\* Drag the Excel file into the dialog box or browse to find and upload the file.

\* Upload Template dialog box.

\* Click Upload.

Box 2: In the view for the email records, select Excel templates

Note: For non-admins or admins wanting to create a personal template: Upload the Excel template Open a page with a list of records, for example, the list of Sales Opportunities. Go to Sales > Opportunities > My Open Opportunities.

\* On the menu bar, click Excel Templates > Create Excel Template.

\* Click Excel Template > Upload.

\* Click Upload to add the Excel template.

\* Drag the file into the dialog box or browse to find and upload the file.

\* Click Upload.

### NEW QUESTION # 71

A company plans to create a Power Virtual Agents chatbot.

The bot has the following requirements:

\* Prompt for a location of the customer and the call must be routed to a support agent for the location.

\* Transfer support calls at each location to a support bot that uses the Bot Framework.

You need to configure the bot.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct select is worth one point.

The screenshot shows the Power Virtual Agents configuration interface. On the left, under 'Components', there are four buttons: Variables, Skills, Topics, and Entities. On the right, under 'Requirement', there are two requirements: 'Route to location.' and 'Route to support bot.'. To the right of these requirements is a 'Component' column with two empty input boxes. The Microsoft logo is visible at the bottom right.

Answer:

Explanation:

The screenshot shows the Power Virtual Agents configuration interface with the correct components selected. In the 'Components' column, 'Variables', 'Skills', 'Topics', and 'Entities' are all highlighted with green boxes. In the 'Requirement' column, 'Route to location.' and 'Route to support bot.' are listed. In the 'Component' column, 'Topics' and 'Variables' are highlighted with red boxes, indicating they are the correct selections for the requirements.

### NEW QUESTION # 72

You need to design the resort portal's email registration process.

Which solutions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows the Microsoft solution center interface. It has two columns: 'Requirement' and 'Solution'. Under 'Requirement', there are two items: 'Implement the invitation code redemption process.' and 'Validate the user's email.'. Under 'Solution', there are two dropdown menus. The first dropdown, corresponding to the first requirement, has three options: 'Auto-populate the invitation code field on the sign-in screen from the email link.', 'Embed the invitation code in the email link URL.', and 'Send the customer their username and temporary password in the email link.'. The second dropdown, corresponding to the second requirement, has four options: 'Two-factor authentication', 'Azure Active Directory authentication', 'Social provider sign-in', and 'Invitation code sign-up'. The Microsoft logo is visible at the bottom right.

Answer:

Explanation:

Requirement	Solution
Implement the invitation code redemption process.	<div>Auto-populate the invitation code field on the sign-in screen from the email link.</div> <div>Embed the invitation code in the email link URL</div> <div>Send the customer their username and temporary password in the email link.</div>
Validate the user's email.	<div>Two-factor authentication</div> <div>Azure Active Directory authentication</div> <div>Social provider sign-in</div> <div>Invitation code sign-up</div>

## Topic 1, Alpine SKi House

### Background

Alpine SKi House is a boutique mountain resort that offers year-round spa and outdoor activities such as snow sports, hiking, mountain biking, and more. The resort has been family owned and operated for more than 50 years. The company has been able to remain profitable while not needing to adopt new technologies.

### General

Booking at the resort have decreased. The company has decided to focus on creating a tailored, first-class experience for guest. The company also plans to target corporate meetings and events.

The company recently purchased a chatbot named FAQbot from AppSoure. The chatbot uses the resort's existing FAQS

### Communication

- \* Communication between staff members is primarily conducted through email and SMS text messages.
- \* Conversations between staff members and guest often lost.
- \* Conference calls are used for all group meeting

### Event Registration

- \* Corporate customers can reserve a meeting room at the resort to host meetings. The meetings will include lunch and choice of either an inside-spa experience or a seasonally appropriate outdoor activity.
- \* Event registration is conducted three weeks prior to start of the event. It is assumed that all event attendees will attend the meeting

### Check-in process

- \* Guests wait in lines to check in and obtain name badges. At this time, guests can specify any dietary restrictions and select their activity preference. This can result in long wait times and crowding at the front desk.
- \* For health and compliance reasons, guests must answer a series of questions with a yes or no answer during check-in. The front desk will ask and record these answers for the resort's records.

### Marketing

At the check-in counter, the guests can drop their business cards into a bowl for a chance to win an all-inclusive weekend stay at the resort. The resort uses the business card information to send announcements about promotions and upcoming events.

### Resort policies and event inquiries

- \* A guest can call or send an email to the event coordinator at the resort to get information about hotel policies, snow conditions, or to pre-select their after-meeting event;
- \* Guests can also go to the website to view the extensive list of frequently asked questions (FAQ) compiled over the years. Many of the answers to the FAQ's are out of date.

### General

Alpine Ski House does not employ technical staff and does not have the budget to hire an external firm to develop solutions. There are two team members who are proficient at Microsoft Excel formulas. Any solution created must use the capabilities of current team members.

All solutions must be simple to use, easy to maintain, and represent the brand of the resort.

You must implement the following solutions:

- \* a centrally managed communication solution
- \* a customer service solution
- \* a resort portal
- \* a chat solution
- \* a check-in solution

### Communication

- \* Communication between team members must be centrally managed and unified in Microsoft Teams.
- \* When the company confirms an event they, must provide a list of guest's names and email addresses.
- \* You must send guests a welcome email that includes a unique registration number for authentication with the resort's portal.
- \* Guests must receive a separate email to verify proof of ownership for their registration.

### Event attendance

- \* Guests must create an account and sign into a resort portal to confirm their attendance to an event and pre-select an after-meeting event
- \* Prior to the event, guests must be able to identify any personal dietary restrictions.

### Check-in processes

- \* Check-in processes must be self-service. Each screen must ask for specific data from the guest. The check-in solution will use some data that is stored in Microsoft Excel.
- \* The check-in solution must continue to function if there are internet issues. If the self-service kiosks are not available, staff must be able to use the check-in solution from within their communication solution.
- \* The check-in solution must have a screen where the guest will select either yes or no to health and wellness questions.
- \* Guests must physically interact with each answer before proceeding to the next screen. Guests must be able to confirm any dietary restrictions they may have entered from the portal or add new ones at this time.
- \* Data must be entered in each screen before users move on to the next screen.

### Marketing

- \* To eliminate the handling of business cards, the check-in solution must be able to translate the contents of the business cards into Alpine Ski House's marketing system.
- \* The solution must not require any effort or manual entry from the guest to prevent any mistyped information and to make it more appealing to the guest to participate.

### Hotel policies and event inquiries

The portal must allow the guest to ask questions about hotel policies, event information, weather reports, and current weather condition at the resort.

### Chat solution

The chat solution must specifically address the following key words. No additional key words will be added until a later implementation phase:

- \* Snow reports
- \* Weather conditions
- \* Start time
- \* End time
- \* Event date
- \* Outdoor activities
- \* Indoor activities
- \* Most popular

The chat solution must be available always and not require staff to answer all of the questions. If a question does require a staff member's attention, the solution must determine which staff member is best to assist the customer with the question.

The information in the FAQ on the legacy website must be used in the chat solution but retyping all the data from the website should not be required. If guests ask about topics that are not listed in the FAQ, the chat solution must identify the issue and escalate to a staff member.

Team members must be able to ask their own questions through a centrally managed communication solution instead of using the guest portal. Team members must be able to access the same FAQ across multiple solutions.

### Issue

Guest1 inquires about snow conditions several times each day of their stay.

## NEW QUESTION # 73

A company plans to create two Microsoft Power Platform applications.

One of the applications requires a custom control layout without using code. The other application will be used primarily by external users.

You need to create the applications.

Which application types should you use? To answer, drag the appropriate application types to the correct requirements. Each application type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Application types	Requirement	Application type
Canvas app	Custom control layout without coding	
Model-driven app	Used by external users	
Power Pages portal		
Power BI
