

NCP-BC Valid Exam Dumps & Latest Test NCP-BC Simulations

P.S. Free 2026 Nutanix NCP-BC dumps are available on Google Drive shared by NewPassLeader: https://drive.google.com/open?id=1zkzpMGZW6fHQ6y_vjSMRvwNhTDmz4Xb

Are you worried about where to find reliable and valid NCP-BC practice exam cram? Please stop hunting with aimless, Nutanix NCP-BC free study dumps will help you and solve your problems. If you still have doubts, you can download NCP-BC free demo to have a try. If you have any questions about NCP-BC Study Tool, please contact us by email or chat with our online customer service, we will always here to answers your questions. Our NCP-BC test practice will enhance your professional skills and expand your knowledge, which will ensure you a define success in our NCP-BC actual test.

Nutanix NCP-BC Exam Overview:

Certification Vendor:	Nutanix
Exam Name:	Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5
Exam Number:	NCP-BC-7.5
Real Exam Qty:	75
Certificate Validity Period:	2 years
Exam Duration:	120 minutes
Exam Price:	\$200 USD
Available Languages:	English, Japanese
Passing Score:	3000 (scaled score, range 1000-6000)
Related Certifications:	Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI)
Exam Format:	Scenario-based items, Multiple Response, Multiple Choice
Recommended Training:	Nutanix Business Continuity Administration (NBCA) Course
Exam Registration:	PSI Testing Services Nutanix Certification Portal
Sample Questions:	Nutanix NCP-BC Sample Questions
Exam Way:	Online remote proctored or in-person at PSI test centers

Pre Condition:	2–3 years IT infrastructure experience; 1–2 years Nutanix environment experience; 6–12 months hands-on BCDR experience; recommended: NCP-MCI certification or equivalent knowledge
Official Syllabus URL:	https://www.nutanix.com/en_gb/support-services/training-certification/certifications/certification-details-nutanix-certified-professional-business-continuity

Nutanix - High Pass-Rate NCP-BC - Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 Valid Exam Dumps

Now our NCP-BC actual test guide can make you the whole relax down, with all the troubles left behind. Our NCP-BC exam questions are compiled to meet all of your requirements. The comprehensive coverage would be beneficial for you to pass the exam. Only need to spend about 20-30 hours practicing our NCP-BC study files can you be fully prepared for the exam. With deeply understand of core knowledge NCP-BC actual test guide, you can overcome all the difficulties in the way. So our NCP-BC exam questions would be an advisable choice for you.

Nutanix NCP-BC Exam Syllabus Topics:

Topic	Details
Topic 1	Troubleshoot Business Continuity & Disaster Recovery (BCDR) Failures: Covers diagnosing and resolving DR failures related to network issues, replication errors, third-party backup problems, and misconfigured DR setups.
Topic 2	- Interpret and Configure Business Continuity & Disaster Recovery (BCDR) Requirements: Covers planning and configuring DR solutions by evaluating RPO needs, resource limits, security settings, recovery plans, and network - storage requirements across various Nutanix environments.
Topic 3	Test Business Continuity & Disaster Recovery (BCDR) Solutions: Covers validating DR readiness by executing planned and unplanned failovers, testing connectivity and throughput between sites, and verifying recovery plan accuracy.
Topic 4	Perform Business Continuity & Disaster Recovery (BCDR) Tasks: Covers hands-on execution of DR operations including self-service restores, snapshot recovery, failover tasks, post-failover cleanup, and migrating from legacy protection domains to modern protection policies.

Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 Sample Questions (Q34-Q39):

NEW QUESTION # 34

After a failover and stabilization of workloads at the recovery AZ, an administrator removes several VMs from the protection policy because they are no longer required.

Which action should be performed as part of post-failover cleanup to prevent unnecessary storage consumption?

- A. Delete the associated recovery points.
- B. Recreate the recovery plan.
- **C. Reconfigure the replication schedule.**
- D. Disable Nearsync replication.

Answer: C

NEW QUESTION # 35

After a storage failover in a synchronous replication environment, users report higher I/O latency and degraded performance compared to pre-failover levels. Cluster health is normal, and replication is functioning correctly.

Which post-failover cleanup action could the administrator perform to correct the performance issue?

- A. Wait for Acropolis Dynamic Scheduler to rebalance the workloads of the affected VMs.
- B. Reconfigure the replication schedule of the affected VMs.
- **C. Manually realign the compute and storage locations of the affected VMs.**
- D. Increase the snapshot retention period of the affected VMs.

Answer: C

NEW QUESTION # 36

Which ports must remain open to support replication between two Prism Element clusters?

- A. TCP 80 and TCP 443
- B. UDP 500 and UDP 4500
- **C. TCP 2009 and TCP 2020**
- D. TCP 22 and TCP 3389

Answer: C

NEW QUESTION # 37

An organization is finalizing its Disaster Recovery (DR) plan. The primary objective is to balance cost-efficiency with a target RTO of under 15 minutes. Data currently resides in Object Storage, but the team is debating between a Zero Compute approach and a Pilot Light approach.

Why would a Pilot Light infrastructure be selected over a Zero Compute model despite the higher "Moderate" cost?

- A. Only model that allows for a "Power-On" recovery trigger.
- B. Lowest cost option available for long-term idle infrastructure.
- C. Eliminates the need for any Object Storage (S3/Blob) costs.
- **D. Faster recovery due to metadata and cluster already existing.**

Answer: D

NEW QUESTION # 38

An administrator notices that storage utilization continues to increase at both the primary and recovery sites after implementing a third-party backup solution that uses protection policies.

Which configuration should be reviewed first?

- A. Replication traffic encryption
- B. Recovery validation schedule in the backup solution
- C. Network segmentation
- **D. Retention settings in the backup solution**

Answer: D

NEW QUESTION # 39
