Choose SAP C_ACDET_2506 Exam Questions for Successful Preparation

How far is the word from the deed? If you are a man of strong will, victory is at hand. Since you want to pass SAP C_ACDET_2506 Exam, you must get the SAP C_ACDET_2506 certification. CertkingdomPDF provide you with the latest certification training information and the most accurate tests answers. Real questions and answers can make your dream come true.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 2	<ul style="list-style-type: none"> Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	<ul style="list-style-type: none"> Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q48-Q53):

NEW QUESTION # 48

How do you format the Help Tip for a field?

- A. Select Field Configuration and edit the field. In the Help Tip, you can only use plain text without any formatting options.
- B. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can format the text by selecting the string and use regular keyboard controls such as Ctrl-l, Ctrl-b
- C. Select Field Configuration and edit the field. In the Help Tip, you can format the text by using the mouse to highlight the text and then right-clicking to access formatting options.
- D. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can add standard HTML tags for formatting

Answer: D

NEW QUESTION # 49

You have a custom string field with a list of values. The values are represented as an Enumeration. Which of the following applies to this scenario?

- A. In the enumeration file, the Value column must only contain whole numbers
- B. The display order of the values is alphabetical
- C. The user can filter the values using the search box in the chooser
- D. The display order in the droop down matches the order defined in the enumeration file

Answer: C,D

NEW QUESTION # 50

When performing migration to production for a Greenfield customer, which item needs to be made available in Production prior to creating the migration package in Intelligent Configuration Manager (ICM)?

- A. Locations
- B. Users
- C. Approval Rules
- D. Translations

Answer: D

Explanation:

Before creating and deploying migration packages with the Intelligent Configuration Manager (ICM), translation string resource files (custom field labels, help tips, validation messages, etc.) must be uploaded into Production via AML & Translations Upload. This ensures that migration bundles referencing these translations do not cause missing label or localization issues post-migration. Locations, users, and approval rules are either migrated as part of configuration packages or managed separately, and do not require

prior upload to Production before creating migration packages.

NEW QUESTION # 51

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Configure a visibility condition
- B. Configure a validity condition
- C. Enable Require value before publish
- D. Enable Required

Answer: C

Explanation:

SAP Ariba provides a specific property in the Advanced tab called "Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

NEW QUESTION # 52

If you add a custom field to the ContractWorkspace class, which other class(es) will that field be added to?

- A. SalesContractRequest and InternalContractRequest
- B. InternalContractWorkspace and SalesContractWorkspace
- C. AbstractContractWorkspace
- D. ContractRequest

Answer: B

Explanation:

The ContractWorkspace class is a parent class to both InternalContractWorkspace and SalesContractWorkspace classes in SAP Ariba. When a custom field is added to ContractWorkspace, it automatically inherits down to both these subclasses, making the field available in both internal and sales contract workspace types. It does not propagate upward to AbstractContractWorkspace or into contract request classes. This inheritance model is part of SAP Ariba's class hierarchy to ensure consistent data structures across related contract objects.

NEW QUESTION # 53

.....

We offer you free update for one year if you buy C_ACDET_2506 study guide materials from us, that is to say, in the following year, you can obtain the latest information about the C_ACDET_2506 study materials for free. In addition, with the experienced experts to compile, C_ACDET_2506 exam dumps is high-quality, and it contains most of the knowledge points of the exam, and you can also improve your ability in the process of learning. C_ACDET_2506 Exam Dumps of us have received many good feedbacks from our customers, they thank us for helping them pass the exam successfully.
