Snowflake SnowPro Core Certification Exam Sample Questions (Q858-Q863):

NEW QUESTION # 858
What is cached during a query on a virtual warehouse?

- A. The columns in the result set of the query
- B. Any columns accessed during the query
- C. All columns in a micro-partition
- D. All rows accessed during the query

Answer: A

Explanation:
During a query on a virtual warehouse, the columns in the result set of the query are cached. This allows for faster retrieval of data if the same or a similar query is run again, as the system can retrieve the data from the cache rather than reprocessing the entire query.

NEW QUESTION # 859
Which function unloads data from a relational table to JSON?

- A. TRUNC(ID_NUMBER, 5)
- B. TRUNC<ID_NUMBER, -6)
- C. ID_NUMBER*100
- D. TO_CHAR<ID NUMBER)

Answer: D

Explanation:
To unload data from a relational table to JSON format, you can use the TO_CHAR function. This function converts a number to a character string, which can then be serialized into JSON format. While there isn't a direct function specifically named for unloading to JSON, converting the necessary fields to a string representation is a common step in preparing data for JSON serialization.
Snowflake Documentation: TO_CHAR Function

NEW QUESTION # 860
What role is required to use Partner Connect?

- A. SYSADMIN
- B. ORGADMIN
- C. ACCOUNTADMIN
- D. SECURITYADMIN

Answer: C

Explanation:
To use Partner Connect, the ACCOUNTADMIN role is required. Partner Connect allows account administrators to easily create trial accounts with selected Snowflake business partners and integrate these accounts with Snowflake

NEW QUESTION # 861
True or False: Snowflake charges additional fees to Data providers for each share they create.

- A. False
- B. True

Answer: A

NEW QUESTION # 862

What is the MINIMUM edition of Snowflake that is required to use a SCIM security integration?

- A. Enterprise Edition
- B. Virtual Private Snowflake (VPS)
- C. Business Critical Edition
- D. Standard Edition

Answer: A

Explanation:

The minimum edition of Snowflake required to use a SCIM security integration is the Enterprise Edition.
SCIM integrations are used for automated management of user identities and groups, and this feature is available starting from the Enterprise Edition of Snowflake. References: [COF-C02] SnowPro Core Certification Exam Study Guide
