### GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q50-Q55):

#### NEW QUESTION # 50

If a waveform period is determined to be 10 microseconds in duration, what is the frequency of the signal?

- A. 100 kHz
- B. 10 kHz
- C. 1000 Hz
- D. 100 Hz

**Answer: A**

Explanation:

Explanation

Frequency is the inverse of period, so to calculate the frequency of a signal with a period of 10 microseconds, you would divide 1 by the period, which is equal to 100 kHz.

#### NEW QUESTION # 51

Which type of power can be a source available to the data center that takes over the function of supplying when utility power is unavailable?

- A. Active
- B. Alternate
- C. Standby
- D. Passive

**Answer: C**

Explanation:

Standby power, also known as backup power, is a type of power that can be a source available to the data center that takes over the function of supplying when utility power is unavailable. Standby power systems are designed to provide power to critical loads in the event of a power outage, and can include generators, uninterruptible power supplies (UPS), and batteries. Standby power systems can be used to provide power to the data center for a short period of time, such as a few hours or days, until utility power is restored.

Passive, Active and Alternate are not specific type of power sources used in data center. They are terms used in different context and have different meaning.

#### NEW QUESTION # 52

Which one of the following is an overall consideration for physical security?

- A. Apply the technology
- B. Apply the solution
- C. Define the problem
- D. Identify the problem

**Answer: C**

Explanation:

Defining the problem is an important overall consideration for physical security. This process involves identifying and analyzing the

threats and vulnerabilities that could potentially affect the security of the system, as well as determining what steps need to be taken to mitigate these risks. This process should be done before any other steps are taken to ensure physical security, as it helps to ensure that the security measures are tailored to the specific needs of the system.

#### **NEW QUESTION # 53**

Whenever electrical power is being consumed in an IT room or data center, \_\_\_\_\_ is generated.

- A. Heat
- B. Humidity
- C. Condensation
- D. Static electricity

**Answer: A**

Explanation:

Whenever electrical power is being consumed in an IT room or data center, heat is generated. This heat must be removed in order to maintain an optimal temperature for the equipment, and this is usually done through cooling systems such as air conditioning, air economization, liquid cooling, evaporative cooling, and immersion cooling.

#### **NEW QUESTION # 54**

Which one of the following is a Physical Security Device?

- A. Fiber optic cable
- B. Token card
- C. Contactless smart card
- D. Access Key

**Answer: C**

Explanation:

A contactless smart card is a physical security device that uses radio frequency identification (RFID) technology to identify and authenticate an individual. This type of card is used in a variety of applications, such as access control systems and digital payment systems. It is also used in physical access control systems, where the card is used to unlock doors or grant access to restricted areas. Contactless smart cards are also used in building access systems, where the card is used to grant access to certain areas of the building.

#### **NEW QUESTION # 55**

.....
