BTW, DOWNLOAD part of TroytecDumps 312-38 dumps from Cloud Storage: [https://drive.google.com/open?id=1E4vWMVR\\_5vj6VM4koB2taE9KQyOMq4IL](https://drive.google.com/open?id=1E4vWMVR_5vj6VM4koB2taE9KQyOMq4IL)

If you have registered EC-COUNCIL 312-38 test, you can enter our TroytecDumps EC-COUNCIL 312-38. You may try our TroytecDumps EC-COUNCIL 312-38 free demo to decide whether to buy or not. You can also download pdf real questions and answers. TroytecDumps EC-COUNCIL 312-38 certification training must help you to pass the exam easily. Its practice test is the most effective. We promise to help you to get the certification. Without the certification, we will give you FULL REFUND of your purchase fees. On request we can provide you with another exam of your choice absolutely free of cost.

## Understanding functional and technical aspects of Certified Network Defender Security Principles and Practices

The following will be discussed in ECCOUNCIL EC 312-38 Exam Dumps:

- Distributed and Mobile Computing World
- Discuss firewall organization exercises - Understand job, abilities, limits, and worries in IDS arrangement
- Discuss cryptographic security procedures
- Describe the different instances of social designing assault strategies
- Understand principal objective, advantages, and difficulties in network protection
- Discuss different fundamental organization security conventions
- Explain protection top to bottom security system
- Leverage Zero Trust Model Security utilizing Programming Defined Perimeter (SDP)
- Discuss the determination of fitting IDS arrangements
- Discuss access control standards, wordings, and models
- Discuss firewall execution and sending measure
- Understand various sorts of firewall advances and their use
- Obtain consistence with administrative structures
- Describe the different instances of host-level assault strategies
- Select firewalls dependent on its profound traffic examination ability
- Discuss IDS/IPS arrangement - Discuss different parts of IDS - Discuss viable organization of organization and host-based

#### IDS

- Explain fundamental wordings identified with network security assaults
- Discuss different NIDS and HIDS Solutions with their interruption location capacities
- Discuss switch and switch safety efforts, proposals, and best practices
- Redefine Access Control security in Today's

## Valid Test EC-COUNCIL 312-38 Testking, Study 312-38 Materials

TroytecDumps has made the EC-Council Certified Network Defender CND (312-38) exam dumps after consulting with professionals and getting positive feedback from customers. The team of TroytecDumps has worked hard in making this product a successful EC-COUNCIL 312-38 Study Material. So we guarantee that you will not face issues anymore in passing the EC-COUNCIL 312-38 certification test with good grades.

EC-COUNCIL 312-38 Exam covers a wide range of topics related to network security, including network security protocols, network defense fundamentals, network perimeter defense, network security threats and vulnerabilities, and network security incident response. 312-38 exam also covers the latest trends and best practices in network security, ensuring that professionals are up-to-date with the latest techniques and strategies for defending against cyber attacks.

The EC-Council Certified Network Defender (CND) certification exam is a valuable credential for IT professionals looking to advance their careers in cybersecurity. EC-Council Certified Network Defender CND certification demonstrates the candidate's expertise in network security and defense, which is highly valued by employers. EC-Council Certified Network Defender CND certification also provides the candidate with access to a global network of cybersecurity professionals, which can be useful for networking and career advancement.

## EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q133-Q138):

### NEW QUESTION # 133

Which event type indicates a significant problem such as loss of data or loss of functionality?

- A. Information
- B. Warning
- C. Error
- D. Failure Audit

**Answer: C**

Explanation:

In the context of network security and event management, an 'Error' event type typically indicates a significant problem that could result in loss of data or loss of functionality. These events are logged when a system or application experiences a severe issue that prevents it from continuing normal operation. Unlike warnings or informational events, error events suggest a critical condition that may require immediate attention to prevent further damage or data loss.

### NEW QUESTION # 134

James wants to implement certain control measures to prevent denial-of-service attacks against the organization. Which of the following control measures can help James?

- A. Strong passwords
- B. A honeypot in DMZ
- C. Provide network-based anti-virus
- D. Reduce the sessions time-out duration for the connection attempts

**Answer: D**

### NEW QUESTION # 135

Which of the following are the valid steps for securing routers? Each correct answer represents a complete solution. Choose all that apply.

- A. Configure access list entries to prevent unauthorized connections and traffic routing.
- B. Use a password that is easy to remember for a router's administrative console.
- C. Use a complex password for a router's administrative console.
- D. Keep routers updated with the latest security patches.

**Answer: A,C,D**

Explanation:

The following are the valid steps for securing routers and devices:

Configure access list entries to prevent unauthorized connections and traffic routing.

Use a complex password for a router's administrative console.

Keep routers in locked rooms.

Keep routers updated with the latest security patches.

Use monitoring an equipment to protect routers and devices.

Router is a device that routes data packets between computers in different networks. It is used to connect multiple networks, and it determines the path to be taken by each data packet to its destination computer.

Router maintains a routing table of the available routes and their conditions. By using this information, along with distance and cost algorithms, the router determines the best path to be taken by the data packets to the destination computer. A router can connect dissimilar networks, such as Ethernet, FDDI, and Token Ring, and route data packets among them. Routers operate at the network layer (layer 3) of the Open Systems Interconnection (OSI) model.

A security patch is a program that eliminates a vulnerability exploited by hackers.

#### NEW QUESTION # 136

Oliver is a Linux security administrator at an MNC. An employee named Alice has resigned from his organization and Oliver wants to disable this user in Ubuntu. Which of the following commands can be used to accomplish this?

- A. `usermod -M alice`
- B. `usermod -K alice`
- C. `usermod -L alice`
- D. `usermod -J alice`

**Answer: C**

Explanation:

In Linux, to disable a user account, the `usermod` command is used with the `-L` option. This option locks the user's password, effectively disabling the account by preventing the user from logging in. The command `usermod -L alice` will lock the user 'alice' by adding an exclamation mark (!) in front of the encrypted password in the `/etc/shadow` file, which is the standard method for disabling an account in Linux.

#### NEW QUESTION # 137

Which of the following is a software tool used in passive attacks for capturing network traffic?

- A. Intrusion prevention system
- B. Intrusion detection system
- C. Sniffer
- D. Warchalking

**Answer: C**

#### NEW QUESTION # 138
