Professional-Data-Engineer Exam Tutorial | Valid Exam Professional-Data-Engineer Registration

P.S. Free & New Professional-Data-Engineer dumps are available on Google Drive shared by FreeCram:
https://drive.google.com/open?id=1_FHJNNAjh87YFaeH9gcItAsPhYw07toU

The FreeCram team is updating the Google Professional-Data-Engineer study material according to the changes in the syllabus on daily basis. The users will receive Professional-Data-Engineer updates for 365 days so they can prepare according to the updated content. The 24/7 support system has been made for customers to solve their problems and serve them in the best possible ways in order to pass the Google Certified Professional Data Engineer Exam (Professional-Data-Engineer) certification exam on the first try!

Compared with the education products of the same type, some users only for college students, some only provide for the use of employees, these limitations to some extent, the product covers group, while our Professional-Data-Engineer study guide materials absorbed the lesson, it can satisfy the different study period of different cultural levels of the needs of the audience. For example, if you are a college student, you can study and use online resources through the student column of our Professional-Data-Engineer learning guide, and you can choose to study our Professional-Data-Engineer exam questions in your spare time.

Professional-Data-Engineer Exam Tutorial | 100% Free Latest Valid Exam Google Certified Professional Data Engineer Exam Registration

A Google Certified Professional Data Engineer Exam (Professional-Data-Engineer) practice questions is a helpful, proven strategy to crack the Google Certified Professional Data Engineer Exam (Professional-Data-Engineer) exam successfully. It helps candidates to know their weaknesses and overall performance. FreeCram software has hundreds of Google Certified Professional Data Engineer Exam (Professional-Data-Engineer) exam dumps that are useful to practice in real-time. The Google Certified Professional Data Engineer Exam (Professional-Data-Engineer) practice questions have a close resemblance with the actual Professional-Data-Engineer exam.

Google Certified Professional Data Engineer Exam Sample Questions (Q220-Q225):

NEW QUESTION # 220

Your company built a TensorFlow neural-network model with a large number of neurons and layers. The model fits well for the training dat a. However, when tested against new data, it performs poorly. What method can you employ to address this?

- A. Serialization
- B. Dimensionality Reduction
- C. Threading
- D. Dropout Methods

Answer: D

NEW QUESTION # 221

A data scientist has created a BigQuery ML model and asks you to create an ML pipeline to serve predictions. You have a REST API application with the requirement to serve predictions for an individual user ID with latency under 100 milliseconds. You use the following query to generate predictions: SELECT predicted_label, user_id FROM ML.PREDICT (MODEL 'dataset.model', table user_features). How should you create the ML pipeline?

- A. Create an Authorized View with the provided query. Share the dataset that contains the view with the application service account.
- B. Create a Cloud Dataflow pipeline using BigQueryIO to read predictions for all users from the query. Write the results to Cloud Bigtable using BigtableIO. Grant the Bigtable Reader role to the application service account so that the application can read predictions for individual users from Cloud Bigtable.
- C. Add a WHERE clause to the query, and grant the BigQuery Data Viewer role to the application service account.
- D. Create a Cloud Dataflow pipeline using BigQueryIO to read results from the query. Grant the Dataflow Worker role to the application service account.

Answer: B

NEW QUESTION # 222

Which of these is NOT a way to customize the software on Dataproc cluster instances?

- A. Log into the master node and make changes from there
- B. Configure the cluster using Cloud Deployment Manager
- C. Set initialization actions
- D. Modify configuration files using cluster properties

Answer: B

Explanation:
Explanation
You can access the master node of the cluster by clicking the SSH button next to it in the Cloud Console.
You can easily use the --properties option of the dataproc command in the Google Cloud SDK to modify many common configuration files when creating a cluster.
When creating a Cloud Dataproc cluster, you can specify initialization actions in executables and/or scripts that Cloud Dataproc will run on all nodes in your Cloud Dataproc cluster immediately after the cluster is set up.
[https://cloud.google.com/dataproc/docs/concepts/configuring-clusters/init-actions] Reference:
https://cloud.google.com/dataproc/docs/concepts/configuring-clusters/cluster-properties

NEW QUESTION # 223

Suppose you have a dataset of images that are each labeled as to whether or not they contain a human face. To create a neural network that recognizes human faces in images using this labeled dataset, what approach would likely be the most effective?

- A. Use K-means Clustering to detect faces in the pixels.
- B. Use feature engineering to add features for eyes, noses, and mouths to the input data.
- C. Build a neural network with an input layer of pixels, a hidden layer, and an output layer with two categories.
- D. Use deep learning by creating a neural network with multiple hidden layers to automatically detect features of faces.

Answer: D

Explanation:
Explanation
Traditional machine learning relies on shallow nets, composed of one input and one output layer, and at most one hidden layer in between. More than three layers (including input and output) qualifies as "deep" learning.
So deep is a strictly defined, technical term that means more than one hidden layer.
In deep-learning networks, each layer of nodes trains on a distinct set of features based on the previous layer's output. The further you advance into the neural net, the more complex the features your nodes can recognize, since they aggregate and recombine features from the previous layer.
A neural network with only one hidden layer would be unable to automatically recognize high-level features of faces, such as eyes, because it wouldn't be able to "build" these features using previous hidden layers that detect low-level features, such as lines.
Feature engineering is difficult to perform on raw image data.
K-means Clustering is an unsupervised learning method used to categorize unlabeled data.
Reference: https://deeplearning4j.org/neuralnet-overview

NEW QUESTION # 224
Which role must be assigned to a service account used by the virtual machines in a Dataproc cluster so they can execute jobs?

- A. Dataproc Runner
- B. Dataproc Editor
- C. Dataproc Worker
- D. Dataproc Viewer

Answer: C

Explanation:
Service accounts used with Cloud Dataproc must have Dataproc/Dataproc Worker role (or have all the permissions granted by Dataproc Worker role).

NEW QUESTION # 225
......

If you want to pass the Professional-Data-Engineer exam in the lest time with the lest efforts, then you only need to purchase our Professional-Data-Engineer learning guide. You can own the most important three versioons of our Professional-Data-Engineer practice materials if you buy the Value Pack! Also you can only choose the one you like best. As you know, the best for yourself is the best. Choosing the best product for you really saves a lot of time! Professional-Data-Engineer Actual Exam look forward to be your best partner.

Valid Exam Professional-Data-Engineer Registration: https://www.freecram.com/Google-certification/Professional-Data-Engineer-exam-dumps.html

We have online and offline chat service stuffs, who are quite familiar with the Professional-Data-Engineer exam dumps, if you have any questions, just contact us, Google Professional-Data-Engineer Exam Tutorial You download the Study Guide document in PDF format and use it on your local PC, We assure that all of the contents in our Valid Exam Professional-Data-Engineer Registration - Google Certified Professional Data Engineer Exam exam study material are the quintessence for the exam, and you will find nothing redundant in them, It's very convenient for your Professional-Data-Engineer exam prep.

All of which ignored the fact that few programmers could Professional-Data-Engineer Exam Actual Tests read and retain all those pages of features, let alone their interrelationships, dependencies, and nuances.

It is likely not going to be the last edition because the markets will not stop changing, We have online and offline chat service stuffs, who are quite familiar with the Professional-Data-Engineer Exam Dumps, if you have any questions, just contact us.

The Best Accurate Professional-Data-Engineer Exam Tutorial - Win Your Google Certificate with Top Score

You download the Study Guide document in PDF format and use it on your local PC, Professional-Data-Engineer We assure that all of the contents in our Google Certified Professional Data Engineer Exam exam study material are the quintessence for the exam, and you will find nothing redundant in them.

It's very convenient for your Professional-Data-Engineer exam prep, We are credited with valid Professional-Data-Engineer exam questions materials with high passing rate.
