## CSI CSC2 Actual Dumps, Latest CSC2 Dumps Book

The scoring system of our CSC2 exam torrent absolutely has no problem because it is intelligent and powerful. First of all, our researchers have made lots of efforts to develop the scoring system. So the scoring system of the CSC2 test answers can stand the test of practicability. Once you have submitted your practice. The scoring system will begin to count your marks of the CSC2 exam guides quickly and correctly. You just need to wait a few seconds before knowing your scores. The scores are calculated by every question of the CSC2 Exam guides you have done. So the final results will display how many questions you have answered correctly and mistakenly. You even can directly know the score of every question, which is convenient for you to know the current learning condition.

## CSI Canadian Securities Course Exam2 Sample Questions (Q53-Q58):

### NEW QUESTION # 53

A shareholder receives rights from a company through direct ownership in shares. Not expecting to exercise them, she sells the rights on the relevant exchange. What is her capital gain?

- A. The current price of the shares less the sale price of the rights.

- B. The sale price of the rights.
- C. The sale price less the exercise price of the rights.
- D. The current share price less the exercise price of the rights.

**Answer: B**

#### NEW QUESTION # 54

What are examples of primary investment objectives?

- A. Tax minimization and safety of principal.
- B. Marketability and tax minimization.
- C. Marketability and growth of capital.
- D. Growth and preservation of capital

**Answer: D**

Explanation:

Investment objectives are critical components of a financial plan, guiding both the client and the advisor in creating strategies to achieve desired financial outcomes. These objectives generally fall into primary categories that reflect the investor's goals, risk tolerance, and time horizon.

\* Growth of Capital: This objective focuses on increasing the principal value of the investment over time.

It is particularly important for investors with long-term goals, such as retirement or funding a child's education. Growth-oriented investments typically include equities, equity mutual funds, and growth-oriented ETFs.

\* Preservation of Capital: This objective ensures that the invested principal remains safe from loss, emphasizing lower-risk investments like government bonds, GICs (Guaranteed Investment Certificates), or money market instruments. Investors prioritizing this objective often have a low tolerance for risk and a shorter time horizon.

Growth and Preservation of Capital Relevance to Financial Planning By combining growth with preservation, the portfolio aims to strike a balance between generating returns and maintaining the invested capital. This dual objective is well-suited for individuals in different life stages:

\* Young Investors: Tend to emphasize growth more, leveraging their long time horizons.

\* Older Investors: Place greater emphasis on preservation as they near or enter retirement, prioritizing capital safety to fund living expenses.

Why A is Correct Option A explicitly combines both these objectives, aligning with a widely recognized approach to investing that balances risk and reward depending on the investor's profile and needs.

\* Volume 1, Section 4: Overview of Economics-Principles of Risk and Return.

#### NEW QUESTION # 55

An investor wants to gain exposure to the Canadian stock market with minimal risk exposure. What is the best financial instrument for this investor?

- A. Index exchange-traded fund.
- B. Index-linked guaranteed investment certificate.
- C. Canadian bank preferred shares.
- D. Call option.

**Answer: B**

Explanation:

The investor's goal is to gain exposure to the Canadian stock market while maintaining minimal risk exposure. Among the provided options, an index-linked guaranteed investment certificate (GIC) is the most suitable choice.

Key Characteristics of an Index-Linked GIC:

\* Capital Protection:

\* Index-linked GICs guarantee the principal investment amount, offering the security of a GIC while tying returns to the performance of a stock index (e.g., the S&P/TSX Composite Index).

\* This ensures no loss of capital regardless of market performance.

\* Market Exposure:

\* The return on an index-linked GIC is linked to the performance of the underlying index, providing exposure to the stock market.

However, this comes without the downside risk associated with direct stock or fund investments.

\* Low Risk:

\* The combination of principal protection and market exposure makes it ideal for risk-averse investors seeking growth potential.

Review of Other Options:

\* A. Canadian Bank Preferred Shares:

\* While preferred shares provide stable dividends and relatively low volatility compared to common shares, they still carry market risk and are not as secure as GICs.

\* B. Index Exchange-Traded Fund (ETF):

\* ETFs track stock indices and offer diversification, but they expose investors to the full market risk of the underlying index, making them unsuitable for those seeking minimal risk exposure.

\* C. Call Option:

\* Call options are speculative derivatives that provide leverage for market exposure but carry significant risk of loss, making them inappropriate for a low-risk investor.

Why D is Correct:

An index-linked GIC balances the investor's objective of gaining exposure to the Canadian stock market with the need for minimal risk by guaranteeing principal protection while offering potential returns tied to market performance.

### NEW QUESTION # 56

The principle of retraction in retractable preferred shares is identical to what other security?

- A. Redeemable preferred shares.
- B. Callable preferred shares.
- C. Retractable bonds and debentures
- D. Retractable common shares

**Answer: C**

Explanation:

The principle of retraction in retractable preferred shares allows the shareholder to force the issuing company to redeem the shares for cash at a predetermined price on or after a specified date. This feature is identical to retractable bonds and debentures, which give the bondholder the option to require the issuer to repay the principal before maturity.

\* A. Callable preferred shares: Callability benefits the issuer, not the holder, and is not similar to retraction.

\* B. Retractable common shares: Such securities are not common in the market and are not comparable to retractable preferred shares.

\* C. Redeemable preferred shares: Redemption is at the issuer's discretion, unlike retraction, which is at the holder's discretion.

Reference: CSC Volume 1, Chapter 8, "Preferred Shares - Retractable Preferred Shares" explains the retraction feature and its similarity to retractable bonds.

### NEW QUESTION # 57

When considering the overall investment objectives of liquid alternatives, what time horizon is the most appropriate for retail investors when investing in these funds?

- A. Short-term
- B. Short-to medium-term
- C. Medium-term
- D. Long-term

**Answer: D**

Explanation:

Liquid alternatives, also known as alternative mutual funds, combine features of traditional mutual funds with hedge fund-like strategies. They provide access to alternative investments such as derivatives, short-selling, and leverage while adhering to stricter regulations for retail investors. These funds are designed to achieve diversification and risk-adjusted returns that are less correlated with traditional stock and bond markets.

When considering liquid alternatives, a long-term investment horizon is most appropriate for retail investors.

The key reasons include:

\* **Volatility and Complexity:** Liquid alternatives can be more volatile than traditional funds due to their use of sophisticated strategies like leverage or derivatives. This requires a long-term outlook to weather short-term fluctuations.

\* **Objective of Absolute Returns:** Liquid alternatives are often structured to provide positive returns over a full market cycle, which typically spans several years.

\* **Diversification Benefits:** The risk mitigation offered by these funds unfolds over time as they reduce the portfolio's overall exposure to specific market conditions.

Investors seeking short-term gains may not benefit as much due to the time required for the strategies employed to materialize their intended results. Long-term objectives align better with the nature of liquid alternatives and their ability to smooth returns.

References:

\* CSC Volume 2, Chapter 20: "Alternative Investments: Strategies and Performance," discusses the structure and time horizon considerations for liquid alternatives.

## NEW QUESTION # 58

.....

Nowadays, there are more and more people realize the importance of CSC2, because more and more enterprise more and more attention it. If someone pass the CSC2 exam and own relevant certificates that mean he had good grasp of this field of knowledge, that is to say, he will be popular and valued by more enterprise. In order to help most candidates who want to Pass CSC2 Exam, so we compiled such a study materials to make exam simply. Our CSC2 guide torrent has gone through strict analysis and summary according to the past exam papers and the popular trend in the industry and are revised and updated according to the change of the syllabus and the latest development conditions in the theory and the practice.
