This format enables you to assess your COF-C03 test preparation with a Snowflake COF-C03 certification exam. You can also customize your time and the kinds of Snowflake COF-C03 Exam Questions of the Snowflake COF-C03 practice test. TestsDumps has formulated COF-C03 PDF questions for the convenience of Snowflake COF-C03 test takers.

## **Snowflake SnowPro® Core Certification (COF-C03) Sample Questions (Q456-Q461):**

### **NEW QUESTION # 456**

Which statement describes how Snowflake supports reader accounts?

- A. A reader account can consume data from the provider account that created it and combine it with its own data.
- B. The users in a reader account can query data that has been shared with the reader account and can perform DML tasks.
- C. The SHOW MANAGED ACCOUNTS command will view all the reader accounts that have been created for an

account.

- **D. A consumer needs to become a licensed Snowflake customer as data sharing is only supported between Snowflake accounts.**

**Answer: D**

Explanation:

Snowflake supports reader accounts, which are a type of account that allows data providers to share data with consumers who are not Snowflake customers. However, for data sharing to occur, the consumer needs to become a licensed Snowflake customer because data sharing is only supported between Snowflake accounts. References: Introduction to Secure Data Sharing | Snowflake Documentation<sup>2</sup>.

#### **NEW QUESTION # 457**

What can a Snowflake user do with the information included in the details section of a Query Profile?

- A. Determine the source system that the queried table is from.
- **B. Determine the total duration of the query.**
- C. Determine the role of the user who ran the query.
- D. Determine if the query was on structured or semi-structured data.

**Answer: B**

Explanation:

The details section of a Query Profile in Snowflake provides users with various statistics and information about the execution of a query. One of the key pieces of information that can be determined from this section is the total duration of the query, which helps in understanding the performance and identifying potential bottlenecks. References: [COF-C02] SnowPro Core Certification Exam Study Guide

#### **NEW QUESTION # 458**

In which hierarchy is tag inheritance possible?

- A. Account - User - Schema
- **B. Schema - Table - Column**
- C. Organization - Account - Role
- D. Database - View - Column

**Answer: B**

Explanation:

In Snowflake, tag inheritance is a feature that allows tags, which are key-value pairs assigned to objects for the purpose of data governance and metadata management, to be inherited within a hierarchy. The hierarchy in which tag inheritance is possible is from Schema to Table to Column. This means that a tag applied to a schema can be inherited by the tables within that schema, and a tag applied to a table can be inherited by the columns within that table. References: Snowflake Documentation on Tagging and Object Hierarchy

#### **NEW QUESTION # 459**

How can a data provider ensure that a data consumer is going to have access to the required objects?

- A. Use the CURRENT\_ function to authorize users from a specific account to access rows in a base table.
- B. Use the CURRENT\_ROLE and CURRENT\_USER functions to validate secure views.
- C. Set the SIMULATED DATA SHARING CONSUMER session parameter to the name of the consumer account for which access is being simulated.
- **D. Enable the data sharing feature in the account and validate the view.**

**Answer: D**

Explanation:

To ensure a data consumer has access to the required objects, a data provider can enable the data sharing feature and validate that

the consumer can access the views or tables shared with them. References: Based on general data sharing practices in cloud services as of 2021.

### NEW QUESTION # 460

What is the maximum total Continuous Data Protection (CDP) charges incurred for a temporary table?

- A. 48 hours
- **B. 24 hours**
- C. 7 days
- D. 30 days

**Answer: B**

Explanation:

For a temporary table, the maximum total Continuous Data Protection (CDP) charges incurred are for the duration of the session in which the table was created, which does not exceed 24 hours<sup>2</sup>.
