NLN NEX VERBAL ENTRANCE EXAM|
2026 Newly Revised Update | 100%
Accurate| Approved by Verified Tutors.

Vocabulary (Synonyms)
Choose the word closest in meaning to the underlined word.

Vocabulary (Synonyms)

1. Benevolent
a) Kind ✓
b) Hostile
c) Indifferent
d) Stubborn
2. Ephemeral
a) Permanent
b) Temporary ✓
c) Fragile
d) Eternal

Reading Comprehension
Passage example: "The human brain is a complex organ responsible for controlling thoughts, memory, emotions, and bodily functions. It consists of approximately 86 billion neurons..."

Question: What is the main idea?
a) The brain is a simple organ
b) The brain controls thoughts, emotions, and bodily functions ✓
c) Neuroplasticity is irrelevant to learning
d) The brain has no mysteries left

We have authoritative production team made up by thousands of experts helping you get hang of our Nursing Entrance Exam (Math, Science and Verbal) study question and enjoy the high quality study experience. We will update the content of NEX test guide from time to time according to recent changes of examination outline and current policies, so that every examiner can be well-focused and complete the exam focus in the shortest time. We will provide high quality assurance of NEX Exam Questions for our customers with dedication to ensure that we can develop a friendly and sustainable relationship.

NLN NEX Exam Syllabus Topics:

Section	Weight	Objectives
---------	--------	------------

Topic 1: Science	38%	- Human Anatomy & Physiology
		• 1. Respiratory system • 2. Integumentary system • 3. Nervous system • 4. Gastrointestinal system • 5. Cardiovascular system • 6. Urinary system • 7. Endocrine system
		- Biology
		• 1. Cell structure and function • 2. Plants and photosynthesis • 3. Ecology • 4. Microbiology • 5. Genetics and DNA
		- Chemistry
Topic 2: Verbal Ability	34%	• 1. Properties of matter • 2. Acids and bases (pH) • 3. Chemical bonding
		- Health
		• 1. Substance use • 2. Prevention and safety • 3. Growth and development
		- Word Knowledge
		• 1. Vocabulary (9th to 14th grade level)
Topic 3: Mathematics	28%	- Reading Comprehension
		• 1. Understanding written passages • 2. Applying information to new situations
		- Algebra
		• 1. Pre-algebra to Algebra I concepts • 2. Basic algebraic manipulations
		- Data & Information
		• 1. Interpreting data
		- Measurement
		• 1. Proportions and ratios • 2. Converting units of measurement
		- Numbers and Operations
		• 1. Rational and irrational numbers • 2. Operations with integers, fractions, decimals, percentages

NEX Pass4sure Torrent & NEX Valid Pdf & NEX Testking Exam

Choose a good NEX exam quiz and stick with it, you will be successful! Our NEX study questions will provide you with professional guidance and quality resources, but you must also be aware of the importance of adherence. As you know, life is like the sea. Only firm people will reach the other side. After you have chosen NEX Preparation materials, we will stay with you until you reach your goal.

NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q27-Q32):

NEW QUESTION # 27

A nurse needs to administer 0.75 liters of IV fluid over 3 hours. What is the flow rate in milliliters per hour?
(1 liter = 1,000 milliliters)

- A. 300 mL/hr
- B. 200 mL/hr
- C. 150 mL/hr
- **D. 250 mL/hr**

Answer: D

Explanation:

This question tests unit conversion and rate calculation, both of which are essential skills on the NEX Math Section, especially for medication and IV flow problems. First, convert liters to milliliters because flow rates are typically expressed in milliliters per hour. Since 1 liter equals 1,000 milliliters, multiply 0.75 liters by

1,000 to get 750 milliliters. Next, determine the flow rate by dividing the total volume by the total time. The fluid is administered over 3 hours, so divide 750 milliliters by 3 hours. This calculation gives 250 milliliters per hour. Therefore, the correct answer is option C. Option A results from dividing incorrectly, option B reflects underestimation, and option D would be correct only if the volume were larger. NEX exam questions often focus on proper setup of unit conversions before performing calculations. Always convert units first, then divide by time to find a rate.

NEW QUESTION # 28

What are the inherited factors transmitted in an organism from generation to generation called?

- A. Homozygote
- B. Phenotype
- **C. Genotype**
- D. Heterozygote

Answer: C

Explanation:

Inherited factors that are passed from parents to offspring are known as an organism's genotype. The genotype refers to the genetic makeup of an organism, including the specific alleles inherited for each trait.

Heterozygote and homozygote describe specific combinations of alleles but do not refer to inherited factors as a whole. Phenotype refers to the observable traits of an organism, which result from the interaction between genotype and environment. The NEX Science exam often tests the distinction between genotype and phenotype, emphasizing that genotype represents the genetic instructions while phenotype represents the physical expression of those instructions.

NEW QUESTION # 29

What is the correct order of blood flow through the cardiovascular system?

- **A. Heart # arteries # capillaries # veins # heart**
- B. Heart # venules # capillaries # arterioles # heart
- C. Heart # arteries # veins # capillaries # heart
- D. Heart # veins # lymphatics # arteries # heart

Answer: A

Explanation:

Blood flows in a continuous loop through the cardiovascular system. It is pumped from the heart into arteries, which carry oxygenated blood away from the heart. Arteries branch into smaller vessels that lead to capillaries, where gas and nutrient exchange occurs. Blood then flows into veins, which return deoxygenated blood back to the heart. The other options list structures in an incorrect order. Understanding blood flow pathways is a fundamental concept on the NEX Science exam and is essential for interpreting cardiovascular function and disorders.

NEW QUESTION # 30

Which type of cartilage is found in the rib cage?

- A. Hyaline
- B. Fibrocartilage
- C. Bone
- D. Elastic

Answer: A

Explanation:

The cartilage found in the rib cage, specifically connecting the ribs to the sternum, is hyaline cartilage.

Hyaline cartilage provides both strength and flexibility, allowing the rib cage to expand and contract during breathing. Fibrocartilage is found in areas requiring shock absorption, such as intervertebral discs. Elastic cartilage provides flexibility and is found in structures like the ear and epiglottis. Bone is not a type of cartilage. The NEX Science exam often tests knowledge of cartilage types and their locations, making hyaline cartilage the correct answer for the rib cage.

NEW QUESTION # 31

Word Knowledge

The word "frequent" most nearly means:

- A. Regular
- B. Sudden
- C. Severe
- D. Rare

Answer: A

Explanation:

"Frequent" means occurring often or regularly. Option B is correct. Recognizing time- and frequency-related words is common on the NEX exam.

NEW QUESTION # 32

.....

On the one thing, our company has employed a lot of leading experts in the field to compile the NEX exam torrents, so you can definitely feel rest assured about the high quality of our NEX question torrents. On the other thing, the pass rate among our customers who prepared the exam under the guidance of our NEX study materials has reached as high as 98% to 100%. What's more, you will have more opportunities to get promotion as well as a pay raise in the near future after using our NEX question torrents since you are sure to get the certification. So you can totally depend on our NEX exam torrents when you are preparing for the exam. If you want to be the next beneficiary, just hurry up to purchase.
