The APP online version of the PEGACPRSA22V1 exam questions can provide you with exam simulation. And the good point is that you don't need to install any software or app. All you need is to click the link of the online PEGACPRSA22V1 training material for one time, and then you can learn and practice offline. If our PEGACPRSA22V1 Study Material is updated, you will receive an E-mail with a new link. You can follow the new link to keep up with the new trend of PEGACPRSA22V1 exam.

The PEGACPRSA22V1 exam is designed to test the candidate's knowledge of Pega Robotic Automation Studio, Managing Solutions, Debugging and Troubleshooting, and the Robotics API. PEGACPRSA22V1 exam includes multiple-choice questions that test the candidate's understanding of the technology and its application in real-world scenarios. PEGACPRSA22V1 Exam consists of 60 questions that need to be completed within 90 minutes. The candidate must score a minimum of 70% to pass the exam and receive the certification.

PEGACPRSA22V1 Detailed Answers | PEGACPRSA22V1 Valid Exam Experience

It is known to us that the error correction is very important for these people who are preparing for the PEGACPRSA22V1 exam in the review stage. It is very useful and helpful for a lot of people to learn from their mistakes, because many people will make mistakes in the same way, and it is very bad for these people to improve their accuracy. If you want to correct your mistakes when you are preparing for the PEGACPRSA22V1 Exam, the study materials from our company will be the best choice for you. Because our PEGACPRSA22V1 reference materials can help you correct your mistakes and keep after you to avoid the mistakes time and time again. We believe that if you buy the PEGACPRSA22V1 exam prep from our company, you will pass your exam in a relaxed state.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q18-Q23):

NEW QUESTION # 18

A developer working on an automation has added a diagnostic log component to check the following log file for information on

inconsistent behavior.

Based on the image, which category and log level did the developer configure for the diagnostic log component in the automation?

- A. Category: Automation; Log Level: Warning
- B. Category: Adapters; Log Level: Info
- C. Category: Automation; Log Level: Info
- **D. Category: Adapters; Log Level: Warning**

Answer: D

Explanation:

The Pega Robot Studio Diagnostic Log captures runtime execution events, categorized by functional area and severity level. Each log entry provides five primary columns:

- * Type (Log Level) - Indicates severity (INFO, WARN, ERROR, etc.)
- * Category - Specifies which subsystem or component produced the log (Adapters, Automation, Runtime, etc.)
- * Message - Contains the diagnostic details or error description

According to the Pega Robotics System Design and Implementation Guide, section "Diagnostic Logging and Log Levels":

"The diagnostic log component allows developers to record runtime information filtered by category and severity.

Categories correspond to major system components such as Automation, Adapters, Runtime, and Windows Adapter.

Log levels include INFO, WARN, ERROR, and DEBUG.

Setting the diagnostic log component to 'Adapters' and level 'Warning' captures warnings related to adapter startup, attachment, and runtime communication." Detailed Reasoning:

From the image:

- * The Type column shows: WARN (highlighted entry).
- * The Category column shows: Adapters.
- * The Message reads: DialogMonitorHelper.StartMonitoring: Timed out waiting 2000 milliseconds for dialog monitor to start. This message indicates a timeout in the adapter's dialog monitoring mechanism - a typical warning-level event in the Adapter category.

Thus, the diagnostic log was configured to capture warnings for adapter-related operations.

Option Analysis:

- * A. Category: Automation; Log Level: Warning - Incorrect. The message and category in the log are clearly marked under Adapters, not Automation.
- * B. Category: Adapters; Log Level: Warning - Correct. The log entry explicitly shows both WARN and Adapters.
- * C. Category: Automation; Log Level: Info - Incorrect. The entry's level is Warning, not Info.
- * D. Category: Adapters; Log Level: Info - Incorrect. The log shows a Warning, not Info.

Final Correct answer:

B). Category: Adapters; Log Level: Warning

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Diagnostic Logging, Log Categories, and Log Level Configuration section (Pega Robotics 19.1 and later).

NEW QUESTION # 19

You have extracted a proxy for a data set and are using it to pass the data into a procedure automation input parameter. In the procedure automation, the data link from the input parameter is not connecting to the stringValue on a stringUtils method.

What two troubleshooting steps do you perform to correct the issue? (Choose two.)

- **A. Confirm the proxy data in a messageDialog.**
- B. Confirm the proxy's data type matches with the stringUtils method.
- C. Confirm the stringUtils method works.
- **D. Confirm the data type on the procedure automation input parameter.**

Answer: A,D

NEW QUESTION # 20

You are working on a team project with several other architects. Each architect is assigned to create activities for several applications. You are ready to add your HR adapter project to the controller project.

Which three steps are required to add the HR project to the main solution? (Choose three.)

- A. Add an existing project from the solution file using the solution explorer window.
- **B. Import the HR project to the controller project using the manage imported projects window.**

- C. Add an assembly reference to the HR project from the controller project.
- D. Create an activity to make a call to the HR project to log in to the application.
- E. Update the controlling project's .Net framework property to match the HR adapter project.

Answer: B,C,D

NEW QUESTION # 21

Pega Robot Studio produces several log files during the opening, building, debugging, and deployment of a solution. In the Answer Area, drag the description of the log file on the left to its correct log file name.

Answer:

Explanation:

References:

NEW QUESTION # 22

Lines in the RuntimeLog containing the text "ExecutionLink From:" refer specifically to what item from your solution?

- A. Automation entry points
- B. Automation execution threads
- C. Yellow execution lines
- D. Blue data lines

Answer: C

Explanation:

NEW QUESTION # 23

.....

For candidates who are going to attend the exam, the pass rate is quite important. PEGACPRSA22V1 training materials of us are pass guaranteed, and if you can't pass the exam one time, we are money back guaranteed. Besides PEGACPRSA22V1 training materials are verified by skilled experts, therefore the quality and accuracy can be guaranteed, and you can use the PEGACPRSA22V1 Exam Dumps at ease. We also have online and offline chat service stuff, if any other questions, please contact us, we will give a reply to you as quickly as possible.
