Juniper Automation and DevOps, Associate (JNCIA-DevOps) Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which feature is used in XML to ensure that all attributes and elements have unique names?

- A. namespace
- B. predicate
- **C. XPath**
- D. selectors

Answer: C

NEW QUESTION # 35

Exhibit.

You have the configuration shown in the exhibit, but are unable to access the REST API Explorer.

Which configuration is necessary to solve this problem?

- A. Configure a firewall filter to explicitly permit SSH.
- B. Configure the rest service to be active on port 80.
- **C. Configure a secondary IPv6 address on ge-0/0/0/0.**
- D. Configure an IPv4 address on ge-0/0/0 0.

Answer: C

NEW QUESTION # 36

Your organization is developing an application to automate management of Junos network appliances. You want to use the existing PyEZ libraries to improve the development process. Which API would satisfy this requirement?

- A. RPC API
- B. JETAPI
- **C. REST API**
- D. XML API

Answer: C

NEW QUESTION # 37

What is the default port for NETCONF connections over SSH?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

<https://www.juniper.net/documentation/us/en/software/junos/netconf/topics/topic-map/netconf-ssh-connection.html> The IANA-assigned port for NETCONF-over-SSH sessions is 830.

NEW QUESTION # 38

You are asked to use the REST API to retrieve interface configuration information from your Junos device. You decide to use a cURL HTTP GET command to retrieve this information.

In this scenario, which statement is correct?

- A. The request is handled by the isd process running on the Junos device
- B. The request is handled by the rpd process running on the Junos device.
- **C. The request is handled by the isrpd process running on the Junos device.**
- D. The request is handled by the mod process running on the Junos device.

Answer: C

Explanation:

When using the REST API on a Junos device, the isrpd (Integrated Service Routing Process Daemon) process is responsible for handling REST API requests. This process listens for incoming HTTP requests and processes them accordingly, including retrieving interface configuration information when a GET request is made.

Option B is correct because the isrpd process handles the REST API requests on a Junos device.

Options A (mod process), C (rpd process), and D (isd process) are incorrect in this context as they either do not exist or serve different purposes on a Junos device.

Supporting Reference:

Juniper Networks REST API Documentation: Provides insights into how REST API requests are managed and processed by the isrpd process on Junos devices.

NEW QUESTION # 39

Just like the old saying goes, there is no royal road to success, and only those who do not dread the fatiguing climb of gaining its numinous summits. In a similar way, there is no smoothly paved road to the JN0-224 certification. You have to work on it and get started from now. If you want to gain the related certification, it is very necessary that you are bound to spend some time on carefully preparing for the JN0-224 Exam, including choosing the convenient and practical study materials, sticking to study and keep an optimistic attitude and so on.
