CIMA F3 Financial Strategy Sample Questions (Q274-Q279):

NEW QUESTION # 274
B, a European based modern art dealer, frequently imports and sells single high value items created in the United States. The price is fixed at the date of sale but the items are commissioned and made to order with a lead time of three to nine months depending on the individual specification B holds payment for his customers from the point of purchase and passes funds when the items are shipped However, despite putting the money on short term deposit, there have been times when B's profits have been almost entirely eroded by adverse movements m interest rates Advise B by matching the appropriate instrument to B's requirements.

Answer:

Explanation:
Explanation:

NEW QUESTION # 275
A company is valuing its equity prior to an initial public offering (IPO).
Relevant data:
* Earnings per share $1.00
* WACC is 8% and the cost of equity is 12%
* Dividend payout ratio 40%
* Dividend growth rate 2% in perpetuity
The current share price using the Dividend Valuation Model is closest to:

- A. $6.80
- B. $4.00
- C. $6.12
- D. $4.08

Answer: D

NEW QUESTION # 276
A company has a financial objective of maintaining a gearing ratio of between 30% and 40%, where gearing is defined as debt/equity at market values.
The company has been affected by a recent economic downturn leading to a shortage of liquidity and a fall in the share price during 20X1.
On 31 December 20X1 the company was funded by:
* Share capital of 4 million $1 shares trading at $4.0 per share.
* Debt of $7 million floating rate borrowings.
The directors plan to raise $2 million additional borrowings in order to improve liquidity.
They expect this to reassure investors about the company's liquidity position and result in a rise in the share price to $4.2 per share.
Is the planned increase in borrowings expected to help the company meet its gearing objective?

- A. No, gearing would increase but the gearing objective would be met both before and after the announcement.
- B. No, gearing would increase and the gearing objective would be exceeded both before and after the announcement.
- C. Yes, gearing would fall and the gearing objective would be exceeded before the announcement but met after the announcement.
- D. No, gearing would increase and the gearing objective would be met before the announcement but exceeded after the announcement.

Answer: B

Explanation:
Before announcement:

Equity = 4m shares × $4.0 = $16m
Debt = $7m
Gearing = 7 / 16 = 43.75% # already above 40%.
After additional $2m debt and higher share price:
Debt = 7 + 2 = $9m
Equity = 4m × $4.2 = $16.8m
Gearing = 9 / 16.8 # 53.6% # even further above the 40% ceiling.
So the gearing objective is exceeded both before and after, and gearing rises.

NEW QUESTION # 277
Which THREE of the following are considered in detail in IFRS 7 Financial Instruments: Disclosures?

- A. Liquidity risk
- B. Business risk
- C. Credit risk
- D. Market risk
- E. Enterprise risk

Answer: A,C,D

Explanation:
IFRS 7 requires detailed disclosures of financial instrument risks, specifically:
Credit risk - exposure to counterparties failing to meet obligations.
Market risk - currency, interest rate, and other price risks.
Liquidity risk - ability to meet obligations as they fall due.
Business risk and enterprise risk are broader strategic concepts, not the focus of IFRS 7.

NEW QUESTION # 278
Company ABC's management has noticed that Company BCD has quickly built up a 20% stake by buying shares in Company ABC and are concerned that this is the start of a hostile bid.
This build-up of shares triggers the poison pill provision which automatically converts the rights to buy future preference shares previously issued to existing shareholders in Company ABC to full ordinary shares What is the most likely impact of the triggering of a poison pill strategy at this stage in the bidding process?

- A. Company ABC becomes less attractive due to a fall in value of the shares as a result of the discount.
- B. The threat of a hostile takeover is reduced because Company ABC becomes more expensive to buy.
- C. It is too late for a poison pill strategy to have any impact on a hostile takeover because Company BCD has already built up a significant stake in Company ABC.
- D. Company BCD loses value on its shareholding and has to sell at a loss before losing more value

Answer: B

Explanation:
A poison pill is designed to deter hostile bidders by making a takeover much more costly. When triggered, it usually issues new shares or converts rights at favorable terms to existing shareholders (other than the bidder), diluting the bidder's stake.
Here, rights to buy future preference shares convert into full ordinary shares, increasing the number of shares in issue and making it more expensive for BCD to gain control. That directly reduces the attractiveness and feasibility of the hostile bid.

NEW QUESTION # 279
......

CIMA Reliable F3 Test Simulator The actions listed below are strictly prohibited unless you receive the prior written consent of the Company: 1, CIMA Reliable F3 Test Simulator So it is very convenient to study and can suitable for any changeable condition, As a worker, it is universally acknowledged that getting a certification (without F3 Test Engine Version - F3 Financial Strategy interactive testing engine) is a good way to pale others by showing your ability and talent in the exam, CIMA Reliable F3 Test Simulator If you get our products, you don't need too much time for preparing, you only need to prepare one or two days before your real exam.
