

# AIGP Quiz Braindumps - AIGP Test Guide & AIGP Test Bootcamp

P.S. Free & New AIGP dumps are available on Google Drive shared by Pass4SureQuiz: <https://drive.google.com/open?id=10RqsMMqUogxFWpuU0LD0SrJg3TwQsvzg>

Our AIGP Study Materials are recognized as the standard and authorized study materials and are widely commended at home and abroad. Our AIGP study materials boost superior advantages and the service of our products is perfect. We choose the most useful and typical questions and answers which contain the key points of the test and we try our best to use the least amount of questions and answers to showcase the most significant information.

For your information, the passing rate of our AIGP study questions is over 98% up to now. Up to now our AIGP practice materials consist of three versions, all those three basic types are favorites for supporters according to their preference and inclinations. On your way moving towards success, our AIGP Preparation materials will always serve great support. And you can contact us at any time since we are serving online 24/7.

## AIGP Exam Questions - AIGP Guide Torrent & IAPP Certified Artificial Intelligence Governance Professional Test Guide

To ensure that the AIGP dumps PDF format remains up to date, the IAPP AIGP questions in it are regularly revised to reflect any modifications to the AIGP exam content. This commitment to staying current and aligned with the AIGP Exam Topics ensures that candidates receive the IAPP Certified Artificial Intelligence Governance Professional (AIGP) updated questions.

### IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li> </ul>

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q72-Q77):

### NEW QUESTION # 72

#### MULTI-SELECT

Please select 3 of the 5 options below. No partial credit will be given.

Training an AI model is time-consuming because of?

- A. The complexity of the AI model.
- B. The maturity of AI governance.
- C. The number of stakeholders.
- D. The quality of the training data.
- E. The volume of training data.

**Answer: A,D,E**

Explanation:

Training an AI model is time-consuming primarily due to model complexity, large data volumes, and the need for high-quality, well-prepared data.

From the AI Governance in Practice Report 2024:

"Most AI requires sizeable amounts of high-quality data... to ensure desired and accurate output." (p. 15)

"The accuracy of AI model outputs depends significantly on the quality of their inputs." (p. 24)

"Complex AI systems... with many parameters... result in long development and training phases." (p. 32)

\* B. Maturity of governance affects oversight, not training time.

\* D. Number of stakeholders affects alignment, not direct training duration.

### NEW QUESTION # 73

#### CASE STUDY

Please use the following answer the next question:

Good Values Corporation (GVC) is a U.S. educational services provider that employs teachers to create and deliver enrichment courses for high school students. GVC has learned that many of its teacher employees are using generative AI to create the enrichment courses, and that many of the students are using generative AI to complete their assignments.

In particular, GVC has learned that the teachers they employ used open source large language models ("LLM") to develop an online tool that customizes study questions for individual students. GVC has also discovered that an art teacher has expressly incorporated the use of generative AI into the curriculum to enable students to use prompts to create digital art. GVC has started to investigate these practices and develop a process to monitor any use of generative AI, including by teachers and students, going forward.

All of the following may be copyright risks from teachers using generative AI to create course content EXCEPT?

- A. Content created by an LLM may be protectable under U.S. intellectual property law.
- B. Generative AI often creates content without attribution.
- **C. Students must expressly consent to this use of generative AI.**
- D. Generative AI is generally trained using intellectual property owned by third parties.

**Answer: C**

Explanation:

All of the options listed may pose copyright risks when teachers use generative AI to create course content, except for students must expressly consent to this use of generative AI. While obtaining student consent is essential for ethical and privacy reasons, it does not directly relate to copyright risks associated with the creation and use of AI-generated content.

Reference: The AIGP Body of Knowledge discusses the importance of addressing intellectual property (IP) risks when using AI-generated content. Copyright risks are typically associated with the use of third-party data and the lack of attribution, rather than the consent of users.

#### NEW QUESTION # 74

##### MULTI-SELECT

Please select 3 of the 5 options below. No partial credit will be given.

Training an AI model is time-consuming because of?

- **A. The complexity of the AI model.**
- B. The maturity of AI governance.
- C. The number of stakeholders.
- **D. The quality of the training data.**
- **E. The volume of training data.**

**Answer: A,D,E**

Explanation:

Training an AI model is time-consuming primarily due to model complexity, large data volumes, and the need for high-quality, well-prepared data.

From the AI Governance in Practice Report 2025:

"Most AI requires sizeable amounts of high-quality data... to ensure desired and accurate output." (p. 15)

"The accuracy of AI model outputs depends significantly on the quality of their inputs." (p. 24)

"Complex AI systems... with many parameters... result in long development and training phases." (p. 32)

\* B. Maturity of governance affects oversight, not training time.

\* D. Number of stakeholders affects alignment, not direct training duration.

#### NEW QUESTION # 75

Scenario:

An organization is evaluating different AI models for integration into its internal workflows. Before moving forward with a particular AI solution from a third-party vendor, the governance team needs to assess the ethical and operational implications of the model.

The most important policy to assess the operations of an AI model is to follow the:

- A. Privacy policy of the model provider
- **B. Acceptable use policy of the model provider**
- C. Code of conduct policy of the model provider
- D. Security policy of the model provider

**Answer: B**

Explanation:

The correct answer is A. The Acceptable Use Policy (AUP) sets the primary terms and conditions under which the AI model can be used, including limitations, prohibited uses, and operational constraints.

From the AIGP ILT Guide:

"The AUP is the most critical document to assess what you can and cannot do with the AI system. It governs use cases, outlines forbidden uses (e.g., disinformation), and supports responsible AI practices." Also confirmed in the AI Governance in Practice Report 2025 (Third-Party AI Assurance section):

"Reviewing and adhering to the acceptable use policy ensures that the model is being used in a manner that aligns with both provider expectations and ethical AI practices."

#### NEW QUESTION # 76

According to the GDPR, an individual has the right to have a human confirm or replace an automated decision unless that automated decision?

- A. Is deemed to solely benefit the individual and includes documented legitimate interests.
- B. Is authorized by applicable EU law and includes suitable safeguards.
- C. Is necessary for entering into or performing under a contract between the data subject and data controller.
- **D. Is authorized with the data subject's explicit consent.**

**Answer: D**

Explanation:

According to the GDPR, individuals have the right to not be subject to a decision based solely on automated processing, including profiling, which produces legal effects or similarly significantly affects them. However, there are exceptions to this right, one of which is when the decision is based on the data subject's explicit consent. This means that if an individual explicitly consents to the automated decision-making process, there is no requirement for human intervention to confirm or replace the decision. This exception ensures that individuals can have control over automated decisions that affect them, provided they have given clear and informed consent.

#### NEW QUESTION # 77

.....

In the mass job market, if you desire to be an outstanding person, an exam certificate is a necessity. Just as an old saying goes, "It's never too old to learn", so preparing for a AIGP certification is becoming a common occurrence. Especially in the workplace of today, a variety of training materials and tools always makes you confused and spend much extra time to test its quality, which in turn wastes your time in learning. In fact, you can totally believe in our AIGP Test Questions for us 100% guarantee you pass exam. If you unfortunately fail in the exam after using our AIGP test questions, you will also get a full refund from our company by virtue of the proof certificate.
