2026 Latest ExamPrepAway GH-900 PDF Dumps and GH-900 Exam Engine Free Share: <https://drive.google.com/open?id=1m-BEFW3D9mNBNresUSXME5iStm8Hmxa>

Hence, if you want to sharpen your skills, and get the GitHub Foundations (GH-900) certification done within the target period, it is important to get the best GitHub Foundations (GH-900) exam questions. You must try GH-900 practice exam that will help you get the Microsoft GH-900 certification. ExamPrepAway hires the top industry experts to draft the GitHub Foundations (GH-900) exam dumps and help the candidates to clear their GitHub Foundations (GH-900) exam easily. ExamPrepAway plays a vital role in their journey to get the GH-900 certification.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.
Topic 2	<ul style="list-style-type: none"> Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.
Topic 3	<ul style="list-style-type: none"> Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.
Topic 4	<ul style="list-style-type: none"> Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.
Topic 5	<ul style="list-style-type: none"> Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.

GH-900 Test Discount & GH-900 Clearer Explanation

Our company is widely acclaimed in the industry, and our GH-900 learning dumps have won the favor of many customers by virtue of their high quality. Started when the user needs to pass the qualification test, choose the GH-900 real questions, they will not have any second or even third backup options, because they will be the first choice of our practice exam materials. Our GH-900 practice guide is devoted to research on which methods are used to enable users to pass the test faster. Therefore, through our unremitting efforts, our GH-900 Real Questions have a pass rate of 98% to 100%. Therefore, our company is worthy of the trust and support of the masses of users, our GH-900 learning dumps are not only to win the company's interests, especially in order to help the students in the shortest possible time to obtain qualification certificates.

Microsoft GitHub Foundations Sample Questions (Q82-Q87):

NEW QUESTION # 82

As a user, which of the following default labels is used to indicate that a maintainer needs assistance on an issue or pull request?

- A. Enhancement
- B. Help wanted
- C. Question
- D. Documentation

Answer: B

Explanation:

In GitHub, labels are used to categorize issues and pull requests, and certain default labels are provided to help manage tasks:

* Help Wanted Label:

* Option C is correct. The "Help wanted" label is used to indicate that the maintainer of the repository needs assistance on a particular issue or pull request. This label helps in attracting contributors who might be interested in helping with specific tasks.

* Other Options:

* Option A ("Enhancement") is incorrect because it indicates a request for a new feature or improvement rather than a call for help.

* Option B ("Question") is incorrect because it is used to flag issues or pull requests that seek clarification or additional information, not necessarily requiring assistance.

* Option D ("Documentation") is incorrect because it labels issues or PRs related to documentation, not for seeking help.

GitHub Docs: Using Labels

NEW QUESTION # 83

What GitHub feature allows the developer community to financially support the people and organizations who maintain the open source projects they depend on?

- A. GitHub Support
- B. GitHub Community Exchange
- C. GitHub Sponsors
- D. GitHub Discussions

Answer: C

Explanation:

GitHub Sponsors allows the developer community to financially support the people and organizations who design, build, and maintain the open source projects they depend on, directly on GitHub.

NEW QUESTION # 84

GitHub Actions workflows can be directly triggered by which of the following events?
(Each answer presents a complete solution. Choose three.)

- A. Creating a new repository
- **B. Pushing to a GitHub repository**
- C. Committing a change to a local git repository
- **D. Adding a comment to a discussion post**
- E. Disabling a GitHub runner
- **F. Creating an Issue**

Answer: B,D,F

Explanation:

GitHub Actions are automated workflows that can be triggered by various events on GitHub. Some common events that trigger workflows include pushes to a repository, creation of issues, and comments on discussion posts.

Triggering GitHub Actions:

Option D (Pushing to a GitHub repository) is correct because this is one of the most common triggers for CI/CD workflows.

Option F (Creating an Issue) is correct because issues are commonly used as triggers for workflows, such as automatically assigning a label or notifying a team.

Option A (Adding a comment to a discussion post) is correct because actions can be triggered by activity on discussion posts, including comments.

Incorrect Options:

Option B (Creating a new repository) is incorrect because this action typically does not trigger workflows within a specific repository.

Option C (Committing a change to a local git repository) is incorrect because GitHub Actions are triggered by events on the GitHub platform, not by local commits.

Option E (Disabling a GitHub runner) is incorrect because it is related to the environment where actions are executed, not a trigger for workflows.

NEW QUESTION # 85

Which of the following statements most accurately describes secret gists?

- A. Anyone can see the gist from the gist Discover page.
- B. Users with assigned access can view the gist.
- C. Secret gists require GitHub Enterprise.
- **D. Anyone with the URL for the gist can view the gist.**

Answer: D

Explanation:

Secret gists on GitHub are "unlisted" gists, meaning they are not publicly discoverable but can be viewed by anyone who has the URL.

* Visibility of Secret Gists:

* Option A is correct because secret gists can be viewed by anyone who has the direct URL, making them accessible yet unlisted.

* Incorrect Options:

* Option B is incorrect because secret gists do not require GitHub Enterprise; they are available on all GitHub accounts.

* Option C is incorrect because secret gists do not appear on the gist Discover page.

* Option D is incorrect because secret gists do not have an "assigned access" feature; access is determined by sharing the URL.

NEW QUESTION # 86

What are the defining features of Git?

- **A. Distributed version control, open source software, and being designed for handling projects of any size with efficiency**
- B. Sequential version control, cloud-based hosting service, and being designed for collaboration on large projects
- C. Low-cost local branching, convenient staging areas, multiple workflows, and being designed for managing small projects
- D. Centralized version control, proprietary software, and being designed for small projects

Answer: A

Explanation:

Git is a widely-used version control system that has several defining features:

Distributed Version Control:

Git is a distributed version control system, meaning that every developer has a full copy of the entire repository, including its history, on their local machine. This enables greater flexibility, as work can be done offline and each user has access to the full project history.

Open Source Software:

Git is open-source, meaning its source code is freely available for use, modification, and distribution. This fosters a large community of users and contributors who continuously improve the software.

Efficiency with Large Projects:

Git is designed to handle projects of any size with speed and efficiency. It can manage large codebases and many contributors without significant performance degradation, making it suitable for everything from small personal projects to large, complex software systems.
