The high quality of our CTS preparation materials is mainly reflected in the high pass rate, because we deeply know that the pass rate is the most important. As is well known to us, our passing rate has been high; 99% of people who used our CTS real test has passed their tests and get the certificates. I dare to make a bet that you will not be exceptional. Your test pass rate is going to reach more than 99% if you are willing to use our CTS Study Materials with a high quality. So it is necessary for you to know well about our CTS test prep.

AVIXA CTS Exam Certification Details:

Schedule Exam	Pearson VUE
Books / Training	Candidate Handbook
Number of Questions	110
MemberExam Price	\$375(USD)
Passing Score	350 / 500
Exam Code	CTS
Sample Questions	AVIXA CTS Sample Questions

AVIXA CTS - General Exam Syllabus Topics:

Topic	Weight
Duty A: Creating AV Solutions	47%
Task 1: Gather Customer Information	10%
Task 2: Conduct Initial Site Survey	9%
Task 3: Evaluate Site Environment (acoustics, lighting, seating, finishing, etc.)	9%
Task 4: Develop an AV Project Scope	9%
Task 5: Design AV Solutions	10%

In addition to the environment, we also provide simulations of papers. You really have to believe in the simulation paper of our CTS study materials. With our CTS practice engine, you can know that practicing the questions and answers are a enjoyable experience and it is an interactive system. If you are answering the questions rightly, then the result will show right, and if you choose the wrong answer, then it will show wrong. And when you finish the CTS Exam Questions, the scores will come up as well.

AVIXA Certified Technology Specialist Sample Questions (Q203-Q208):

NEW QUESTION # 203

Assuming that the speakers in the picture on the LEFT are 8 Q drivers, what is the impedance of the speaker system on the left?

- A. 8Q
- B. 16 Q
- C. 4Q
- D. 2Q

Answer: D

Explanation:

Assuming the speakers on the left are 8 drivers and they are connected in parallel, the total impedance Z_t can be calculated using the formula for parallel resistance:

$Z_t = \frac{1}{\frac{1}{Z_1} + \frac{1}{Z_2}}$ For two 8 speakers in parallel: $\frac{1}{Z_t} = \frac{1}{8} + \frac{1}{8} = \frac{2}{8} = \frac{1}{4}$

$Z_t = 4$ Therefore, $Z_t = 4$

If the wiring in the diagram shows two pairs of 8 speakers connected in parallel, the total impedance is 4 for each pair, and if these pairs are then connected in parallel again, the final impedance is:

$\frac{1}{Z_t} = \frac{1}{4} + \frac{1}{4} = \frac{2}{4} = \frac{1}{2}$

$Z_t = 2$ Thus, the total impedance is 2. References:

NEW QUESTION # 204

In order to run three cables inside a conduit, what is the maximum percentage of a conduit's internal cross-sectional area to be considered?

- A. 40%
- B. 60%
- C. 31%
- D. 53%

Answer: A

Explanation:

When running three cables inside a conduit, the maximum allowable fill is 40% of the conduit's internal cross-sectional area. This percentage is specified to ensure that there is adequate space for pulling the cables through without causing damage and to allow for proper airflow to prevent overheating.

CTS Technology Specialist Reference According to the CTS guidelines and National Electrical Code (NEC), conduits should not exceed 40% fill for three or more cables to ensure safety and maintain the integrity of the cables during installation and use.

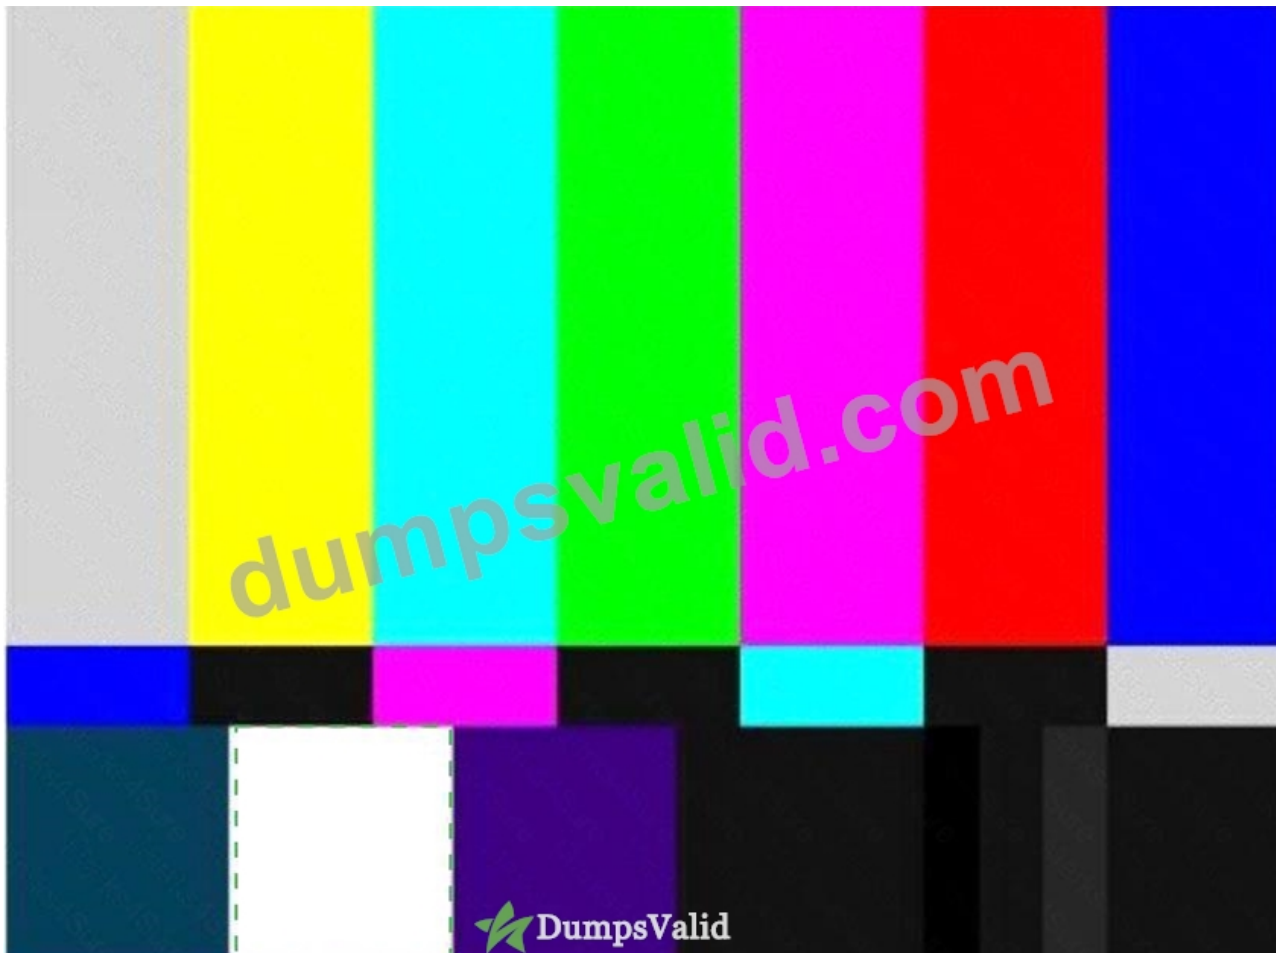

NEW QUESTION # 205

What section of the color chart is used to calibrate brightness? Select the answer by clicking on the appropriate area of the chart

Answer:

Explanation:

Explanation:

The section with the grayscale bars (bottom row, from white to black)

Brightness calibration is typically done using the grayscale section of a color chart. The grayscale bars provide a range of luminance levels from white to black, allowing the calibration process to adjust the display so that each shade is distinct and accurately represented. Proper calibration ensures that the display shows details in both bright and dark areas of the image, achieving the correct overall brightness.

NEW QUESTION # 206

While troubleshooting a DSP, the AV technician notices that the DHCP server has failed due to the control system not being able to control the volume of the DSP. In order to restore the same IP, the control programmer requires a unique identifier assigned to the network interface card of the DSP. What is the name of that address?

- A. network address translation
- **B. media access control**
- C. digital multiplex exchange address
- D. internet protocol address

Answer: B

Explanation:

Comprehensive Detailed Explanation with all Technology Specialist References: The unique identifier assigned to a network interface card (NIC) is known as the Media Access Control (MAC) address. A MAC address is a hardware address that is permanently embedded into the network interface of a device, such as a DSP, and is used to uniquely identify it on a local network.

When DHCP fails, the control programmer may need the MAC address to reassign the same IP address, as DHCP reservations are often based on MAC addresses. This ensures that devices receive a consistent IP address each time they connect, which is crucial for network devices in an AV system that rely on static IPs for control purposes.

Option B, "internet protocol address," refers to the IP address, which is assigned to a device but not unique to the hardware, as it can change over time. Option C, "network address translation," is a method for modifying IP address information as it passes through a router. Option D, "digital multiplex exchange address," is not relevant in this context and does not pertain to IP networking or AV control systems.

CTS References: AVIXA CTS Exam Guide, Chapter on Networking Fundamentals; CTS Handbook, Section on Network Addressing and IP Allocation.

NEW QUESTION # 207

Invoicing clients, purchasing AV equipment and providing estimates are examples of which of the following types of work?

- A. project management
- **B. administration**
- C. installation
- D. design

Answer: B

Explanation:

Invoicing clients, purchasing AV equipment, and providing estimates are all tasks that fall under administration. These tasks involve organizational and financial management responsibilities essential for the operational side of AV projects.

CTS Technology Specialist Reference CTS resources categorize these activities as administrative functions essential for supporting the project lifecycle, from initial quoting to procurement and client billing. These tasks ensure smooth project execution by managing logistical and financial aspects.

NEW QUESTION # 208

.....

Dumps Valid has become the front-runner of this career and help exam candidates around the world win in valuable time. With years of experience dealing with CTS exam, they have thorough grasp of knowledge which appears clearly in our CTS exam questions. All CTS study materials you should know are written in them with three versions to choose from. In case there are any changes happened to the CTS Exam, the experts keep close eyes on trends of it and compile new updates constantly. It means we will provide the new updates freely for you later.
