- A. Auto - N-1
- B. Auto - TEST-QA
- C. Sensor version updates off
- D. Specific sensor version number

Answer: D

Explanation:
The administrator can choose a specific sensor version number in the Sensor Update policy to manually control when the sensor version is upgraded or downgraded. This will allow the Falcon Cloud to push out sensor version changes, but only when the administrator changes the version number in the policy. The other options will either automate the sensor version updates or turn them off completely.

NEW QUESTION # 41

When configuring a specific prevention policy, the admin can align the policy to two different types of groups, Host Groups and which other?

- A. Enterprise Groups
- B. Custom IOA Rule Groups
- C. Operating System Groups
- D. Custom IOC Groups

Answer: B

Explanation:
Prevention Policies are created based on the OS (Windows, MAC and Linux policies). Once a prevention policy is created, three options appear on top: Settings, Assigned Host Groups and Assigned Custom IOAS (tested on Crowdstrike). Therefore, Host Groups and Custom IOAS are the two different types of groups a prevention policy can be aligned to.
