

Quiz CompTIA - High Hit-Rate CV0-004 Hottest Certification

BTW, DOWNLOAD part of TrainingDump CV0-004 dumps from Cloud Storage: <https://drive.google.com/open?id=1R7i050-IQatua85zNqP264pDWZb2x8N7>

We will free provide you part of the exercises of CompTIA Certification CV0-004 Exam on the Internet to let you try to test our product's quality. After your trail you will find TrainingDump's exercises is the most comprehensive one and is what you want to.

If you prefer to prepare for your exam on paper, then our CV0-004 exam materials will be your best choice. CV0-004 PDF version is convenient to read and printable, and you can take them with you, and you can practice them anywhere and anyplace. Besides, free demo for CV0-004 PDF version is available, and you can try before buying. We are pass guarantee and money back guarantee and if you fail to pass the exam. You can receive the downloading link and password for CV0-004 Training Materials within ten minutes for CV0-004 exam materials, if you don't receive, you can contact with us, and we will solve the problem for you.

CompTIA - CV0-004 - High Pass-Rate CompTIA Cloud+ (CV0-004) Certification Exam Hottest Certification

To make sure your whole experience of purchasing CV0-004 exam questions more comfortable, we offer considerate whole package services. We offer not only free demos, give three versions for your option, but offer customer services 24/7. Even if you fail the CV0-004 Test Guide, the customer will be reimbursed for any loss or damage after buying our CV0-004 exam questions. With easy payments and considerate, trustworthy after-sales services, our CompTIA Cloud+ (CV0-004) Certification Exam study question will not let you down.

CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q229-Q234):

NEW QUESTION # 229

A customer is migrating applications to the cloud and wants to grant authorization based on the classification levels of each system. Which of the following should the customer implement to ensure authorization to systems is granted when the user and system classification properties match? (Select two).

- A. Role-based access control
- B. Bastion host
- C. Discretionary access control
- D. Token-based authentication
- E. Multifactor authentication
- F. Resource tagging

Answer: A,C

Explanation:

Discretionary Access Control (DAC) and Role-Based Access Control (RBAC) are effective methods for granting authorization based on system classification levels. DAC allows resource owners to grant access rights, making it flexible for environments with varying classification levels. RBAC assigns permissions based on roles within an organization, aligning access rights with the user's job functions and ensuring that users access only what is necessary for their role, which can be mapped to system classifications. Reference: CompTIA Cloud+ content covers various access control models, emphasizing the importance of implementing appropriate security measures that align with organizational policies and classification levels to ensure secure and authorized access to cloud systems.

NEW QUESTION # 230

A customer's facility is located in an area where natural disasters happen frequently. The customer requires the following:

- Data resiliency due to exposure to frequent natural disasters
- Data localization because of privacy regulations in the country
- High availability

Which of the following cloud resources should be provisioned to meet these requirements?

- A. Storage in an availability zone outside the region
- B. Storage in the same availability zone as the primary data
- C. An on-premises private cloud carrying duplicate data
- D. Storage in a separate data center located in same region

Answer: A

Explanation:

To meet the requirements of data resiliency, data localization, and high availability in a region prone to natural disasters, the customer should provision storage in an availability zone outside the region. This ensures that data is not affected by regional disasters and complies with data localization by remaining within the country's borders, while also providing high availability.

NEW QUESTION # 231

A junior cloud administrator was recently promoted to cloud administrator and has been added to the cloud administrator group.

The cloud administrator group is the only one that can access the engineering VM. The new administrator unsuccessfully attempts to access the engineering VM. However, the other administrators can access it without issue. Which of the following is the best way to identify the root cause?

- A. Performing a packet capture on the engineering VM
- B. Rebooting the engineering VM
- C. Allowing connections from 0.0.0.0/0 to the engineering VM
- D. Reviewing the administrator's permissions to access the engineering VM

Answer: D

Explanation:

The best way to identify the root cause of why the new cloud administrator cannot access the engineering VM is by reviewing the administrator's permissions. It is possible that, despite being added to the cloud administrator group, the specific permissions to access the engineering VM were not properly configured.

Reference: Permission issues are a common problem in cloud environments, and troubleshooting such issues is part of the cloud management skills discussed in the CompTIA Cloud+ certification

NEW QUESTION # 232

A project team is deciding how to break up a large project into smaller components so the project can be delivered without increasing the duration of the iteration cycles. Which of the following describes the grouping of the smaller components?

- A. An epic
- B. A backlog item
- C. An issue
- D. A goal

Answer: A

Explanation:

In agile methodology, an epic is a large user story or body of work that can be broken down into smaller backlog items deliverable within iteration cycles. This enables large projects to be incrementally deployed while maintaining predictable iteration lengths.

Reference: CompTIA Project+ PK0-005 - Agile Planning & Work Breakdown; CompTIA Cloud+ CV0-004 Cloud Deployment domain.

NEW QUESTION # 233

A security engineer identifies a vulnerability in a containerized application. The vulnerability can be exploited by a privileged process to read the content of the host's memory. The security engineer reviews the following Dockerfile to determine a solution to mitigate similar exploits:

Which of the following is the best solution to prevent similar exploits by privileged processes?

- A. Changing FROM alpine:3.17 to FROM alpine:latest
- B. Adding the USER myappuser instruction
- C. Patching the host running the Docker daemon
- D. Running the container with the read-only filesystem configuration

Answer: B

Explanation:

Adding the "USER myappuser" instruction to the Dockerfile is the best solution to prevent similar exploits by privileged processes. This instruction ensures that the container runs as a non-privileged user instead of the root user, significantly reducing the risk of privileged exploits.

Running containers with least privilege principles minimizes the potential impact of vulnerabilities, enhancing the overall security posture of the containerized environment.

NEW QUESTION # 234

.....

This is a printable CV0-004 PDF dumps file. The CV0-004 PDF dumps enables you to study without any device, as it is a portable and easily shareable format, thus you can study CV0-004 dumps on your preferred smart device such as your smartphone or in hard copy format. Once downloaded from the website, you can easily study from the CompTIA CV0-004 Exam Questions compiled by our highly experienced professionals as directed by the CompTIA exam syllabus.

CV0-004 Pass Guide: <https://www.trainingdump.com/CompTIA/CV0-004-practice-exam-dumps.html>

Whether you are a student or an in-service person, our CV0-004 exam torrent can adapt to your needs, Questions and answers are available to download immediately after you purchased our CV0-004 dumps pdf. And as long as you study with our CV0-004 exam questions, you will find that our CV0-004 learning guide is the best for the outstanding quality and high pass rate as 99% to 100%. How high the authority of CV0-004 real exam is, I don't need to say any more.
