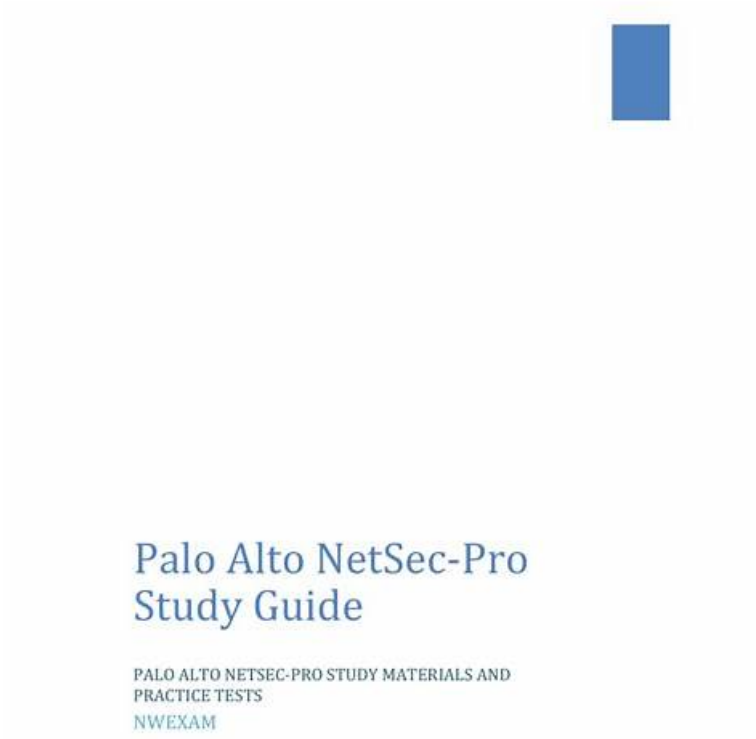
NetSec-Pro考題資訊，NetSec-Pro學習筆記



P.S. KaoGuTi在Google Drive上分享了免費的、最新的NetSec-Pro考試題庫：https://drive.google.com/open?id=1lV10GRowVsOzPnpbkEbS77zJxyzjaOoO

不要再因為準備一個考試浪費太多的時間了。快點購買KaoGuTi的NetSec-Pro考古題吧。有了這個考古題，你將更好地知道該怎麼準備考試才更有效率。這是一個可以讓你輕鬆就通過考試的難得的工具，錯過這個機會你將會後悔。所以，不要猶豫赶紧行动吧。

空想可以使人想出很多絕妙的主意，但卻辦不了任何事情。所以當你苦思暮想的如何通過Palo Alto Networks的NetSec-Pro認證考試時，還不如打開你的電腦，點擊KaoGuTi，你就會看到你最想要的東西，價格非常優惠，品質可以保證，而且保證你100%通過考試。

最優質的Palo Alto Networks NetSec-Pro：Palo Alto Networks Network Security Professional考題資訊 - 有用的KaoGuTi NetSec-Pro學習筆記

有了Palo Alto Networks NetSec-Pro認證考試的證書就相當於人生有了個新的里程牌，工作將會有很大的提升，相信作為IT行業人士的每個人都很想擁有吧。很多人都在討論說這麼好的一個證書是很難通過的，實際上確實通過率是相當的低。沒有做過任何的努力當然是不容易通過的，畢竟通過Palo Alto Networks NetSec-Pro認證考試需要相當過硬的專業知識。我們KaoGuTi是可以為你提供通過Palo Alto Networks NetSec-Pro認證考試捷徑的網站。我們KaoGuTi有針對Palo Alto Networks NetSec-Pro認證考試的培訓工具，可以有效的確保你通過Palo Alto Networks NetSec-Pro認證考試，獲得Palo Alto Networks NetSec-Pro認證考試證書。而且我們還可以幫你節約很多時間，這樣一個可以花更少時間更少金錢就可以獲得如此有價值的證書的方案對你是非常划算的。

最新的 Network Security Administrator NetSec-Pro 免費考試真題 (Q25-Q30):

問題 #25
Which step is necessary to ensure an organization is using the inline cloud analysis features in its Advanced Threat Prevention subscription?

- A. Update or create a new anti-spyware security profile and enable the appropriate local deep learning models.
- B. Configure Advanced Threat Prevention profiles with default settings and only focus on high-risk traffic to avoid affecting network performance.
- C. Enable SSL decryption in Security policies to inspect and analyze encrypted traffic for threats.
- D. Disable anti-spyware to avoid performance impacts and rely solely on external threat intelligence.

答案：A

解題說明：
To fully leverageinline cloud analysisin Advanced Threat Prevention, security profiles (e.g., anti-spyware) must beupdated or newly createdto enable local deep learning and inline cloud analysis models.
"To activate inline cloud analysis, update your Anti-Spyware profile to enable advanced inline detection engines, including deep learning-based models and cloud-delivered signatures." (Source: Inline Cloud Analysis and Deep Learning) This ensuresreal-time protectionfrom sophisticated threats beyond static signatures.

問題 #26
How does a firewall behave when SSL Inbound Inspection is enabled?

- A. It acts transparently between the client and the internal server.
- B. It acts as meddler-in-the-middle between the client and the internal server.
- C. It decrypts traffic between the client and the external server.
- D. It decrypts inbound and outbound SSH connections.

答案：B

解題說明：
SSL Inbound Inspectionallows the firewall to decrypt incoming encrypted traffic to internal servers (e.g., web servers) by acting as aman-in-the-middle (MITM). The firewall uses the private key of the server to decrypt the session and apply security policies before re-encrypting the traffic.
"SSL Inbound Inspection requires you to import the server's private key and certificate into the firewall. The firewall then acts as a man-in-the-middle (MITM) to decrypt inbound sessions from external clients to internal servers for inspection." (Source: SSL Inbound Inspection)

問題 #27
Which two SSH Proxy decryption profile settings should be configured to enhance the company's security posture? (Choose two.)

- A. Block connections that use non-compliant SSH versions.
- B. Allow sessions with legacy SSH protocol versions.
- C. Block sessions when certificate validation fails.
- D. Allow sessions when decryption resources are unavailable.

答案：A,C

解題說明：
Blocking non-compliant SSH versionsandfailing certificate validationsare fundamental security measures:
Block sessions when certificate validation fails
"The SSH Proxy profile should block sessions that fail certificate validation to ensure that only trusted hosts are allowed." (Source: SSH Proxy Decryption Best Practices) Block connections using non-compliant SSH versions Older SSH versions may have vulnerabilities or lack modern encryption algorithms.
"To enforce stronger security, block SSH sessions that use older or deprecated versions of the SSH protocol that do not comply with your security posture." (Source: SSH Decryption and Best Practices) Together, these measuresminimize the risk of MITM attacksand secure SSH traffic.

問題 #28
A company has an ongoing initiative to monitor and control IT-sanctioned SaaS applications. To be successful, it will require configuration of decryption policies, along with data filtering and URL Filtering Profiles used in Security policies. Based on the need to decrypt SaaS applications, which two steps are appropriate to ensure success? (Choose two.)

- A. Configure SSL Forward Proxy.
- B. Configure SSL Inbound Inspection.
- C. Create new self-signed certificates to use for decryption.
- D. Validate which certificates will be used to establish trust.

答案：A,D

解題說明：
To inspect SaaS app traffic (often encrypted), you must configure:
SSL Forward Proxy
"The SSL Forward Proxy decryption profile enables the firewall to decrypt outbound SSL traffic, essential for visibility into SaaS app usage." (Source: SSL Forward Proxy Overview) Validate certificates
"Validating and deploying the appropriate root and intermediate CA certificates is critical for establishing trust and preventing SSL errors during decryption." (Source: Certificate Deployment and Validation) Without these steps, SaaS decryption and policy enforcement would be incomplete.

問題 #29
Which firewall attribute can an engineer use to simplify rule creation and automatically adapt to changes in server roles or security posture based on log events?

- A. Dynamic User Groups
- B. Address objects
- C. Predefined IP addresses
- D. Dynamic Address Groups

答案：D

解題說明：
Dynamic Address Groupsenable the firewall to automatically adjust security policies based on tags assigned dynamically (via log events, API, etc.). This eliminates the need for manual updates to policies when server roles or IPs change.
"Dynamic Address Groups allow you to create policies that automatically adapt to changes in the environment. These groups are populated dynamically based on tags, enabling automated security policy updates without manual intervention." (Source: Dynamic Address Groups)

問題 #30
