最新的CTFL-AcT認證考試的題目與答案

IT專業技術認證是進入IT行業的“敲門磚”。由國際著名IT企業頒發的職業證書，證明了你具有某種專業IT技能，為國際承認並通用。這些國際著名 IT企業為：Microsoft、Oracle、Cisco、Amazon、IBM、Oracle等。CTFL-AcT 考試就是其中一個流行的 ISQI 認證。許多考生對這門考試沒有什麼信心，其實，CTFL-AcT 最新的擬真試題是用最快和最聰明的方式來傳遞您的考試，並幫助您獲得 ISQI CTFL-AcT 認證。

ISQI CTFL-AcT認證考試是行業認可的證書，驗證了候選人對測試接受概念和實踐的理解。任何具備軟件測試概念一般理解的人都可以報名參加。通過這個認證考試可以幫助專業人士通過向潛在雇主展示他們在測試方面的熟練程度，以推進他們的職業生涯。

最新的 ISTQB Foundation Level CTFL-AcT 免費考試真題 (Q20-Q25):

問題 #20

Which one of the following scenarios describes BEST a non-functional quality attribute that is relevant for accept testing?

- A. During acceptance testing, the operability of the product is checked in a realistic environment
- B. Testing basic functionality in acceptance testing verifies the correct usage of the product
- C. Time behavior is most relevant, as it cannot be tested prior to the acceptance testing level
- D. Modularity and reusability are best judged by those who operate the system later

答案： A

解題說明：

Non-functional quality attributes (also called quality characteristics) such as usability, reliability, operability, performance, and maintainability are often validated during acceptance testing to ensure the system behaves as expected under real-world conditions. Option C is correct because operability - a subcharacteristic of usability per ISO 25010 - refers to the degree to which users can operate and control the system effectively. Acceptance testing often involves running the system in realistic settings to validate these aspects.

Other options:

A (Modularity and reusability) are more relevant to system architecture and design, not acceptance testing.

B is incorrect - time behavior (performance) can and should be tested at multiple levels, including system and integration testing before acceptance.

D is misleading - testing basic functionality is necessary, but it does not address non-functional quality attributes.

問題 #21

You are leading a brand new project team whose members are coming from all over the organization and have no former experience in working together. You need to build a common vision and team spirit. What workshop would fit BEST:

- A. You invite every member in turn to describe his/her past experience and his/her major achievements in the organization or in their former job.
- B. You draw a staircase with 11 steps, each of them representing a major milestone of the project. The bottom of the stairs corresponds to the first day of the project and the upper step means that the project is released. You locate the present situation in the top of the stairs. The team is asked to identify and discuss the major steps downwards.
- C. You ask every member in turn to write down three things he/she likes and dislikes in the organization and to post them on a wall. A volunteer is then chosen to read randomly some posts that are then discussed with the group.
- **D. You invite the team members and ask them to design their own (team-wise) emblem representing their values, beliefs, goals, tasks together than a common motto.**

答案： D

問題 #22

Which of the following information is most likely part of an acceptance test summary report?

- A. Technical details on defect fixes.
- B. Test procedure information.
- **C. Information to evaluate the level of risk for product release.**
- D. Test strategy and test design methods.

答案： C

解題說明：

An acceptance test summary report is a high-level document produced at the end of acceptance testing. It provides stakeholders (especially business owners and decision-makers) with essential information to determine whether the system meets the acceptance criteria and whether it is ready for release.

Option A is correct because understanding the residual risk - based on test results, open defects, and coverage - is critical for release decisions. The summary report includes test execution status, significant findings, defect summaries, and an overall risk assessment.

Other options:

B (technical details on defect fixes) belong more in defect or technical reports, not in the acceptance summary.

C (test strategy/design methods) are part of the test plan, not the summary report.

D (test procedure info) is operational detail, not suited for a high-level summary report.

A). Information to evaluate the level of risk for product release.

問題 #23

The standard ISO 25010 defines a quality in use model with characteristics and subcharacteristics. Which elements of the following list is a characteristic of quality in use according to this standard?

- A. Efficiency
- B. Usability
- C. Portability
- D. Compatibility

答案： A

問題 #24

Which one of the following scenarios characterizes UX task analysis BEST?

- A. Use cases are analyzed and represented through business process models.
- B. External conditions are considered as input for subsequent design steps.
- C. Inspirations from similar sectors are sought to identify successful solutions.
- D. Users are qualified depending on their physical and intellectual characteristics.

答案： B

解題說明：

UX task analysis focuses on understanding how users perform their tasks in real-world contexts. It captures not only the sequence of actions but also the surrounding environment - including physical conditions (light, noise), devices used, interruptions, and constraints. These external or environmental conditions become vital inputs to UX design decisions, helping teams adapt interfaces and workflows to user realities.

Option C is correct because it emphasizes this key aspect of UX task analysis: capturing external conditions that influence usability and system interaction.

Other options:

A focuses on user profiling, not task analysis.

B refers to business process modeling, which is more strategic and less user-context specific.

D refers to benchmarking or inspiration analysis - useful for design ideation but not task analysis.

C). External conditions are considered as input for subsequent design steps.

問題 #25

.....

您應該尋找那些真實可信的題庫商提供的CTFL-AcT題庫資料，這樣對您通過考試是更有利，可信度高的ISQI CTFL-AcT題庫可幫助您快速通過認證考試，而KaoGuTi公司就是這樣值得您信賴的選擇。CTFL-AcT題庫資料中的每個問題都由我們專業人員檢查審核，為考生提供最高品質的考古題。如果您希望在短時間內獲得ISQI CTFL-AcT認證，您將永遠找不到比KaoGuTi更好的產品了。
