

100-150 Test Lab Questions, 100-150 Simulated Test

Hondros NUR 150 Final Exam with 100 Questions and Answers

What do we want to do with chain of infection? - Answer break it, wash hands
How does HAI spread - Answer not hand washing, equipment
What PPE is worn for what isolation - Answer Contact - gloves, gown
Droplet - mask, gloves, gown
standard precautions - gloves
What infections do we put in Contact isolation - Answer VRE, MRSA, C-Diff (with hand washing)
What kind of precautions for Airborne - Answer N-95, Hood
What are the rules for restraints - Answer check circulation every 30min
release every 2 hours
must have doctors order first
new Doctors order every 24 hours
What is best way to help with anxiety - Answer sit with patient, listen, use therapeutic communication
What is HIPPA, how is it broken - Answer -protects patients information
broken - posting on social media, looking up someone not your patient, keeping computer open
What problems come from being immobile - Answer weight loss, pressure sores, pneumonia
Who is at risk for HAI - Answer elderly, immune compromised, low economical, children
What are the important rules for peri-care - Answer privacy, explain procedure, only expose what you need to
Collaborative between nurses and doctors - Answer decrease risk for injury, to avoid an event where patient has died or sustained serious injury

P.S. Free & New 100-150 dumps are available on Google Drive shared by ActualtestPDF: https://drive.google.com/open?id=18Ka_OikMcXOFZhdcB8ay6Hoign2kNOZ

It's universally acknowledged that passing the exam is a good wish for all candidates, if you choose 100-150 study materials of us, we can ensure you that you can pass the exam just one time. We have the professional team to search for and study the latest information for exam, therefore you can get the latest information. Furthermore, the quality and accuracy for 100-150 Exam briandumps are pretty good. We also pass guarantee and money back guarantee for you fail to pass the exam. Or if you have other exam to attend, we will replace other 2 valid exam dumps for you freely.

If you want to understand our 100-150 exam prep, you can download the demo from our web page. You do not need to spend money; because our 100-150 test questions provide you with the demo for free. You just need to download the demo of our 100-150 exam prep according to our guiding; you will get the demo for free easily before you purchase our products. By using the demo, we believe that you will have a deeply understanding of our 100-150 Test Torrent. We can make sure that you will like our products; because you will it can help you a lot.

100-150 Simulated Test - Test 100-150 Centres

No matter on any condition, our company will not use your information to make profits. As already mentioned above, our 100-150 learning materials attach great importance to the interests of customers. A product can develop for so many years, and ultimately the

customer's trust and support. Many of the users of 100-150 training prep were introduced by our previous customers. They truly trust our 100-150 exam questions. And as long as you buy our 100-150 practice guide, we believe you will trust them as well.

Cisco Certified Support Technician (CCST) Networking Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which device protects the network by permitting or denying traffic based on IP address, port number, or application?

- A. Intrusion detection system
- B. VPN gateway
- C. Access point
- D. Firewall

Answer: D

Explanation:

Firewall: A firewall is a network security device that monitors and controls incoming and outgoing network traffic based on predetermined security rules. It permits or denies traffic based on IP addresses, port numbers, or applications.

Access Point: This is a device that allows wireless devices to connect to a wired network using Wi-Fi.

It does not perform traffic filtering based on IP, port, or application.

VPN Gateway: This device allows for secure connections between networks over the internet, but it is not primarily used for traffic filtering based on IP, port, or application.

Intrusion Detection System (IDS): This device monitors network traffic for suspicious activity and policy violations, but it does not actively permit or deny traffic.

NEW QUESTION # 20

During the data encapsulation process, which OSI layer adds a header that contains MAC addressing information and a trailer used for error checking?

- A. Transport
- B. Network
- C. Session
- D. Data Link

Answer: D

Explanation:

During the data encapsulation process, the Data Link layer of the OSI model is responsible for adding a header that contains MAC addressing information and a trailer used for error checking. The header typically includes the source and destination MAC addresses, while the trailer contains a Frame Check Sequence (FCS) which is used for error detection.

The Data Link layer ensures that messages are delivered to the proper device on a LAN using hardware addresses and translates messages from the Network layer into bits for the Physical layer to transmit. It also controls how data is placed onto the medium and is received from the medium through the physical hardware.

NEW QUESTION # 21

Move the security options from the list on the left to its characteristic on the right. You may use each security option once, more than once, or not at all.

Note: You will receive partial credit for each correct answer.

Move the security options from the list on the left to its characteristic on the right. You may use each security option once, more than once, or not at all.

Note: You will receive partial credit for each correct answer.

Security Options	Characteristics	
WEP	Uses a RADIUS server for authentication	Security Option
WPA2-Personal	Uses a minimum of 40 bits for encryption	Security Option
WPA2-Enterprise	Uses AES and a pre-shared key for authentication	Security Option

Answer:

Explanation:

Move the security options from the list on the left to its characteristic on the right. You may use each security option once, more than once, or not at all.

Note: You will receive partial credit for each correct answer.

Security Options	Characteristics	
WEP	Uses a RADIUS server for authentication	WPA2-Enterprise
WPA2-Personal	Uses a minimum of 40 bits for encryption	WEP
WPA2-Enterprise	Uses AES and a pre-shared key for authentication	WPA2-Personal

Explanation:

The correct matching of the security options to their characteristics is as follows:

- * WPA2-Enterprise: Uses a RADIUS server for authentication
- * WEP: Uses a minimum of 40 bits for encryption
- * WPA2-Personal: Uses AES and a pre-shared key for authentication

Here's why each security option matches the characteristic:

- * WPA2-Enterprise uses a RADIUS server for authentication, which provides centralized Authentication, Authorization, and Accounting (AAA) management for users who connect and use a network service.
- * WEP (Wired Equivalent Privacy) is an outdated security protocol that uses a minimum of 40 bits for encryption (and up to 104 bits), which is relatively weak by today's standards.
- * WPA2-Personal (Wi-Fi Protected Access 2 - Personal) uses the Advanced Encryption Standard (AES) for encryption and a pre-shared key (PSK) for authentication, which is shared among users to access the network.

These security options are essential for protecting wireless networks from unauthorized access and ensuring data privacy.

NEW QUESTION # 22

Which component of the AAA service security model provides identity verification?

- A. Authorization
- B. Auditing
- C. Authentication
- D. Accounting

Answer: C

Explanation:

The AAA service security model consists of three components: Authentication, Authorization, and Accounting.

*Authentication: This is the process of verifying the identity of a user or device. It ensures that only legitimate users can access the network or service.

*Authorization: This determines what an authenticated user is allowed to do or access within the network.

*Auditing/Accounting: This component tracks the actions of the user, including what resources they access and what changes they make.

Thus, the correct answer is C. Authentication.

NEW QUESTION # 23

HOTSPOT

You purchase a new Cisco switch, turn it on, and connect to its console port. You then run the following command:

```
#show running-config | section include interface
interface GigabitEthernet0/1
!
interface GigabitEthernet0/2
!
<output omitted>
```

For each statement about the output, select True or False. Note: You will receive partial credit for each correct selection.

	True	False
The two interfaces are administratively shut down.	<input type="radio"/>	<input type="radio"/>
The two interfaces have default IP addresses assigned.	<input type="radio"/>	<input type="radio"/>
The two interfaces can communicate over Layer 2.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

	True	False
The two interfaces are administratively shut down.	<input type="radio"/>	<input checked="" type="radio"/>
The two interfaces have default IP addresses assigned.	<input type="radio"/>	<input checked="" type="radio"/>
The two interfaces can communicate over Layer 2.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

The two interfaces are administratively shut down:

False: The output does not show any "shutdown" command under the interfaces, which would indicate that they are administratively shut down. Therefore, they are likely in their default state, which is administratively up.

The two interfaces have default IP addresses assigned:

False: The output does not show any IP address configuration. In the default state, interfaces do not have IP addresses assigned unless explicitly configured.

The two interfaces can communicate over Layer 2:

True: By default, interfaces on a switch are Layer 2 interfaces capable of forwarding Ethernet frames. As there is no configuration

provided that changes this, it can be assumed they can communicate over Layer 2.

Interface Status: The absence of the "shutdown" command means the interfaces are not administratively shut down.

IP Address Assignment: There is no evidence in the output that IP addresses have been assigned to the interfaces, which would typically be shown as "ip address" entries.

Layer 2 Communication: Switch interfaces in their default state operate at Layer 2, enabling them to forward Ethernet frames and participate in Layer 2 communication.

NEW QUESTION # 24

.....

Passing 100-150 certification can help you realize your dreams. If you buy our product, we will provide you with the best 100-150 study materials and it can help you obtain 100-150 certification. Our product is of high quality and our service is perfect. Our materials can make you master the best 100-150 Questions torrent in the shortest time and save your much time and energy to complete other thing. What most important is that our 100-150 study materials can be download, installed and used safe. We can guarantee to you that there no virus in our product.

100-150 Simulated Test: <https://www.actualtestpdf.com/Cisco/100-150-practice-exam-dumps.html>

Cisco 100-150 Test Lab Questions Of course, the right to choose is in your hands, But ActualtestPDF 100-150 Simulated Test provides the latest and up to dated exam material so that the clients do not find it difficult to prepare for the exam timely, Cisco 100-150 Test Lab Questions First of all, there is no limit to the numbers of computers you install, which means you needn't to stay at your home or office, PDF version is .pdf file of your ActualtestPDF 100-150 Simulated Test Questions and Answers product.

Only a few options are available, principally to provide more or different 100-150 Valid Test Online feedback, How you accomplished that work, from start to finish, matters, Of course, the right to choose is in your hands.

100% Pass Quiz Cisco - Useful 100-150 Test Lab Questions

But ActualtestPDF provides the latest and up to dated **100-150 Test Lab Questions** exam material so that the clients do not find it difficult to prepare for the exam timely, First of all, there is no limit to the 100-150 numbers of computers you install, which means you needn't to stay at your home or office.
