If you always feel that you can't get a good performance when you come to the exam room. There is Software version of our 100-160 exam braindumps, it can simulate the real exam environment. If you take good advantage of this 100-160 practice materials character, you will not feel nervous when you deal with the Real 100-160 Exam. Furthermore, it can be downloaded to all electronic devices so that you can have a rather modern study experience conveniently. Why not have a try?

Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.
Topic 2	<ul style="list-style-type: none">Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detectionprevention systems, providing insight into how threats are mitigated within network environments.

Topic 3	<ul style="list-style-type: none"> • Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.
Topic 4	<ul style="list-style-type: none"> • Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems
Topic 5	<ul style="list-style-type: none"> • Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.

Exam 100-160 Score - Reliable 100-160 Test Questions

The aspirants will find it easy to get satisfied by our Cisco 100-160 dumps material before actually buying it. If you wish to excel in Information Technology, the Cisco 100-160 Certification will be a turning point in your career. Always remember that Cisco Certified Support Technician (CCST) Cybersecurity 100-160 exam questions change.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q149-Q154):

NEW QUESTION # 149

Which of the following is NOT a typical phase of the planning process in cybersecurity?

- **A. Vulnerability scanning**
- B. Risk assessment
- C. Incident response planning
- D. Policy development

Answer: A

Explanation:

The planning process in cybersecurity typically includes several phases, such as risk assessment, policy development, and incident response planning. Vulnerability scanning, although an important activity in cybersecurity, is considered a technical control rather than a specific phase of the planning process.

NEW QUESTION # 150

The company web server collects information through a form. The form is accessed by using port 80. The form content is transferred to an encrypted database for storage. You are investigating a complaint that the form content has been compromised. What is the cause of the security breach?

- **A. The website was accessed using HTTP, which is an unencrypted protocol.**
- B. The database was compromised.
- C. The web browser used to access the site was not updated to the latest version.
- D. The data was transferred to the database using a nonsecure protocol.

Answer: A

Explanation:

The CCST Cybersecurity Study Guide explains that HTTP (port 80) transmits data in cleartext, making it susceptible to interception. Even if data is stored securely in an encrypted database, sensitive information can be compromised during transmission if HTTPS (port 443) is not used.

"When HTTP is used instead of HTTPS, all form inputs and transmitted data are sent in plaintext over the network, where they can

be intercepted by attackers." (CCST Cybersecurity, Basic Network Security Concepts, Secure Protocols section, Cisco Networking Academy)

NEW QUESTION # 151

What is the main purpose of risk management in the context of cybersecurity?

- **A. To identify and prioritize potential cybersecurity risks for effective mitigation.**
- B. To ignore potential cybersecurity risks to minimize costs.
- C. To transfer all cybersecurity risks to a third-party vendor.
- D. To eliminate all possible risks to an organization's cybersecurity.

Answer: A

Explanation:

The main purpose of risk management in the context of cybersecurity is to identify and prioritize potential risks associated with a system, network, or application. By understanding the risks, organizations can develop effective mitigation strategies and allocate resources accordingly. Risk management involves assessing the likelihood and impact of potential risks, determining their significance to the organization, and implementing appropriate controls to mitigate or reduce those risks to an acceptable level.

NEW QUESTION # 152

Which logging mechanism is associated with network devices such as routers, switches, and firewalls?

- A. Audit logs
- **B. Syslog**
- C. Event Viewer
- D. System and application logs

Answer: B

Explanation:

Syslog is commonly used in network devices such as routers, switches, and firewalls to send event log messages to a syslog server. It allows network administrators to centrally collect and view logs from multiple devices, enabling efficient monitoring, troubleshooting, and security analysis of network infrastructure.

NEW QUESTION # 153

Which of the following is an essential component of information security assessments?

- **A. All of the above**
- B. Incident response planning
- C. Penetration testing
- D. User training

Answer: A

Explanation:

Information security assessments involve assessing the security posture of an IT system. Penetration testing, which involves simulating attacks to identify vulnerabilities, is an important component of such assessments. Additionally, user training is vital because human error or lack of awareness can often be a weak point in security. Understanding how to recognize and respond to potential threats is crucial. Lastly, incident response planning is essential to ensure that the organization is prepared to handle and mitigate any security incidents effectively. Therefore, all the options mentioned in the

NEW QUESTION # 154

.....

Perhaps you still have doubts about our 100-160 study tool. You can contact other buyers to confirm. Our company always regards quality as the most important things. The pursuit of quantity is meaningless. Our company positively accepts annual official quality

inspection. All of our 100-160 real exam dumps have passed the official inspection every year. Our study materials are completely reliable and responsible for all customers. The development process of our study materials is strict. We will never carry out the 100-160 real exam dumps that are under researching. All 100-160 Study Tool that can be sold to customers are mature products. We are not chasing for enormous economic benefits. As for a company, we are willing to assume more social responsibility. So our 100-160 real exam dumps are manufactured carefully, which could endure the test of practice. Stable and healthy development is our long lasting pursuit. In order to avoid fake products, we strongly advise you to purchase our 100-160 exam question on our official website.
