What's more, part of that RealValidExam 100-160 dumps now are free: https://drive.google.com/open?id=1az894bWdT2dWBVBdUnH112HEltb5V_2a

We have dedicated staff to update all the content of 100-160 exam questions every day. So you don't need to worry about that you buy the materials so early that you can't learn the last updated content. And even if you failed to pass the exam for the first time, as long as you decide to continue to use 100-160 torrent prep, we will also provide you with the benefits of free updates within one year and a half discount more than one year. 100-160 Test Guide use a very easy-to-understand language. So even if you are a newcomer, you don't need to worry that you can't understand the contents. Industry experts hired by 100-160 exam questions also explain all of the difficult professional vocabulary through examples, forms, etc. You can completely study alone without the help of others.

TheRealValidExam is one of the leading and reliable platforms that has been helping Cisco Certified Support Technician (CCST) Cybersecurity 100-160 exam candidates in their preparation. With high pass rate and Cisco Certified Support Technician (CCST) Cybersecurity 100-160 at a preferential price. To enhance your competitiveness in your field.

Start Preparation With Actual Cisco 100-160 Practice Test

Most of the experts in our company have been studying in the professional field for many years and have accumulated much experience in our 100-160 practice questions. Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills. All the members of our experts and working staff maintain a high sense of responsibility, which is why there are so many people choose our 100-160 Exam Materials and to be our long-term partner.

Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.
Topic 2	<ul style="list-style-type: none">Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.
Topic 3	<ul style="list-style-type: none">Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detectionprevention systems, providing insight into how threats are mitigated within network environments.
Topic 4	<ul style="list-style-type: none">Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.
Topic 5	<ul style="list-style-type: none">Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q324-Q329):

NEW QUESTION # 324

What is tailgating in the context of cybersecurity?

- A. A physical attack where an unauthorized person gains entry to a restricted area by following closely behind an authorized person.
- B. A form of social engineering attack that uses SMS or text messages to trick victims into revealing sensitive information.
- C. A cyber attack where an attacker manipulates and deceives an individual to reveal sensitive information.
- D. A type of phishing attack that targets specific individuals or organizations.

Answer: A

Explanation:

Tailgating refers to the act of an unauthorized person gaining physical access to a secured area by closely following behind an authorized person who has just been granted access. This form of physical attack exploits the weakness in human behavior, as people tend to hold doors open for others out of politeness or assume that the person following them is authorized.

NEW QUESTION # 325

Which of the following best describes the purpose of an information security assessment?

- A. To create a comprehensive inventory of IT assets
- B. To determine the level of compliance with industry standards and regulations
- C. To assess the impact of changes on organizational processes
- **D. To identify and mitigate security vulnerabilities and risks**

Answer: D

Explanation:

An information security assessment is performed to evaluate the security posture of an IT system. Its main purpose is to identify and mitigate security vulnerabilities and risks that might impact the confidentiality, integrity, and availability of information assets. By conducting a thorough assessment, organizations can identify weaknesses, implement appropriate controls, and ensure the overall security of their systems. Therefore, option B, to identify and mitigate security vulnerabilities and risks, is the most accurate description of the purpose of an information security assessment.

NEW QUESTION # 326

What is the main benefit of implementing SOAR technology in monitoring network data for security incidents?

- A. Increased network availability
- B. Reduced network bandwidth consumption
- C. Enhanced network performance
- **D. Improved incident response time**

Answer: D

Explanation:

SOAR (Security Orchestration, Automation, and Response) technology aims to streamline and automate incident response processes. By integrating various security tools, SOAR enables a faster and more organized response to security incidents. It automates manual tasks, provides real-time incident metrics and visibility, and facilitates collaboration among different teams involved in incident response. Ultimately, implementing SOAR can significantly improve incident response time.

NEW QUESTION # 327

What is the main difference between a public and a private network?

- **A. Public networks use public IP addresses, while private networks use private IP addresses**
- B. Private networks are more expensive to set up than public networks
- C. Private networks are accessible to the general public, while public networks are not
- D. Public networks are secured, while private networks are not

Answer: A

Explanation:

The main difference between a public network and a private network lies in the IP addressing scheme. Public networks use public IP addresses, provided by ISPs, to route traffic over the internet. Private networks, on the other hand, use private IP addresses, typically reserved IP ranges (e.g., 192.168.x.x or 10.x.x.x), for local communication within a network.

NEW QUESTION # 328

What is the primary purpose of a VPN (Virtual Private Network)?

- A. To encrypt email communications
- B. To secure wireless network connections
- C. To protect against malware attacks
- **D. To establish a secure remote connection over a public network**

Answer: D

Explanation:

A VPN is designed to provide secure, encrypted communication over a public network such as the internet. Its primary purpose is to establish a secure and private connection between two endpoints, allowing remote users to access resources on a private network.

as if they were directly connected to it. This helps protect sensitive data and communications from interception by unauthorized individuals.

NEW QUESTION # 329

.....

Different person has different goals, but our RealValidExam aims to help you successfully pass 100-160 exam. Maybe to pass 100-160 exam is the first step for you to have a better career in IT industry, but for our RealValidExam, it is the entire meaning for us to develop 100-160 exam software. So we try our best to extend our dumps, and our RealValidExam elite comprehensively analyze the dumps so that you are easy to use it. Besides, we provide one-year free update service to guarantee that the 100-160 Exam Materials you are using are the latest.
