

100-160 Valid Test Pass4sure & Exam 100-160 Testking

ITPass4Sure

itPass4sure

- ✓ Online Tool, Convenient, easy to study
- ✓ Instant Online Access
- ✓ Supports All Web Browsers
- ✓ Practice Online Anytime
- ✓ Test History and Performance Review
- ✓ Supports Windows / Mac / Android / iOS, etc.

- ✓ Installable Software Application
- ✓ Simulates Real Exam Environment
- ✓ Builds Exam Confidence
- ✓ Supports MS Operating System
- ✓ Two Modes For Practice
- ✓ Practice Online Anytime

- ✓ Printable PDF Format
- ✓ Prepared by IT Experts
- ✓ Instant Access to Download
- ✓ Study Anywhere, Anytime
- ✓ 365 Days Free Updates
- ✓ Free PDF Demo Available

Security & Privacy
We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

365 Days Free Updates
Free update is available within 365 days after your purchase. After 365 days, you will get 60% discounts for updating.

Money Back Guarantee
Full refund if you fail the corresponding exams in 90 days after purchasing. And Free get any another product.

Instant Download
After Payment, our system will send you the products you purchased in minutes in a minute after payment. If not received within 2 hours, please contact us.

The price of Cisco 100-160 updated exam dumps is affordable. You can try the free demo version of any Cisco 100-160 exam dumps format before buying. For your satisfaction, TestsDumps gives you a free demo download facility. You can test the features and then place an order.

Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.
Topic 2	Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.
Topic 3	Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.

Topic 4	• Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection and prevention systems, providing insight into how threats are mitigated within network environments.
Topic 5	• Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems

Exam 100-160 Testking, New 100-160 Exam Prep

Perhaps you still feel confused about our Cisco Certified Support Technician (CCST) Cybersecurity test questions when you browse our webpage. There must be many details about our products you would like to know. Do not hesitate and send us an email. Gradually, the report will be better as you spend more time on our 100-160 Exam Questions. As you can see, our system is so powerful and intelligent. What most important it that all knowledge has been simplified by our experts to meet all people's demands. All of our assistance is free of charge. We are happy that our small assistance can change you a lot. You don't need to feel burdened. Remember to contact us!

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q240-Q245):

NEW QUESTION # 240

What is the purpose of backup and recovery procedures in computer operations?

- A. To ensure data integrity
- B. To detect and respond to security incidents
- C. To facilitate disaster recovery
- D. To prevent unauthorized access

Answer: C

Explanation:

The purpose of backup and recovery procedures in computer operations is to facilitate disaster recovery. By regularly backing up data and implementing recovery procedures, organizations can restore critical systems and data in the event of a disaster or data loss. This helps minimize downtime and ensure business continuity.

NEW QUESTION # 241

Which of the following is a unique identifier assigned to a network interface card (NIC)?

- A. Default gateway
- B. IP address
- C. Subnet mask
- D. MAC address

Answer: D

Explanation:

A Media Access Control (MAC) address is a unique identifier assigned to a network interface card (NIC) by the manufacturer. It is a 48-bit address typically represented as six groups of two hexadecimal digits separated by colons or hyphens. MAC addresses are used for communication at the data link layer of the network stack.

NEW QUESTION # 242

Which of the following best describes the purpose of the MITRE ATT&CK; Matrix?

- A. To provide a standardized way to categorize cyber threat tactics and techniques
- B. To map vulnerabilities and exposures in computer systems
- C. To analyze the impact of cyber threats on critical infrastructure
- D. To track the global distribution of cyber threat actors

Answer: A

Explanation:

The MITRE ATT&CK; Matrix provides a comprehensive framework that categorizes various tactics, techniques, and procedures (TTPs) used by cyber threat actors. It enables organizations to understand how different attackers operate and helps in developing effective cybersecurity defenses and detection mechanisms.

NEW QUESTION # 243

Which of the following options is not an example of a subscription service in cybersecurity?

- A. Threat intelligence feeds
- B. Anti-malware software
- C. Intrusion detection system (IDS) signatures updates
- D. Vulnerability scanning tools

Answer: B

Explanation:

Anti-malware software is not typically considered a subscription service in cybersecurity. It is a security tool that detects, prevents, and removes malware from systems, but it is usually purchased as a one-time product rather than a subscription. On the other hand, threat intelligence feeds, vulnerability scanning tools, and IDS signatures updates are examples of subscription services that provide regular updates and information to enhance security against evolving threats.

NEW QUESTION # 244

Which of the following is an example of a data security principle?

- A. Ciphertext
- B. Session Management
- C. Least Privilege
- D. ARP Spoofing

Answer: C

Explanation:

Option 1: Correct. Least Privilege is a data security principle that limits the access rights of individuals to only what is necessary for them to perform their job functions.

Option 2: Incorrect. Session Management is a security practice related to handling user sessions, but it is not specifically a data security principle.

Option 3: Incorrect. ARP Spoofing is a network attack technique, not a data security principle.

Option 4: Incorrect. Ciphertext refers to encrypted data, but it is not a data security principle.

NEW QUESTION # 245

.....

There is a succession of anecdotes, and there are specialized courses. Experts call them experts, and they must have their advantages. They are professionals in every particular field. The 100-160 test material, in order to enhance the scientific nature of the learning platform, specifically hired a large number of qualification exam experts, composed of product high IQ team, these experts by combining his many years teaching experience of 100-160 Quiz guide and research achievements in the field of the test, to exam the popularization was very complicated content of Cisco Certified Support Technician (CCST) Cybersecurity exam dumps, better meet the needs of users of various kinds of cultural level.
