The BraindumpStudy is a trusted and leading platform that is committed to making the entire Adobe AD0-E725 exam preparation process simple, smart, and quick. To achieve this objective BraindumpStudy is offering real, valid, and updated Adobe AD0-E725 Exam Questions. These Adobe AD0-E725 exam dumps are the real AD0-E725 exam questions that surely will repeat in the upcoming AD0-E725 exam and you can pass the challenging exam.

Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details
Topic 1	Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.
Topic 2	- External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I - O events and webhooks to create automated and connected business processes.

Topic 3	Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.
Topic 4	Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.

Valid Adobe AD0-E725 Test Answers & Instant AD0-E725 Access

If you are quite nervous about the exam, and by chance, you are going to attend the AD0-E725 exam, then choose the product of our company, because the product of our company will offer you the most real environment for the AD0-E725 exam, with this it can relieve your nerves while attending the AD0-E725 exam, as well as strengthen your confidence. Besides the product of our company also provide you plenty of practice materials for you to practice with questions and answers, it will help you to master the key knowledge points as quickly as possible. If you choose the product of our company, passing the AD0-E725 Exam won't be a dream.

Adobe Commerce Developer Expert Sample Questions (Q16-Q21):

NEW QUESTION # 16

An Adobe Commerce Cloud client alerts a Developer to an issue with their website going down during deployments. What should the Developer do to solve this problem?

- A. From the Adobe Commerce Cloud console, the zero downtime deployment checkbox must be selected for the project.
- B. In the cloud app configuration YAML file, the deployment strategy must be defined in the global phase.
- C. In the cloud env configuration YAML file, the static content deploy strategy must be defined in the build phase.

Answer: C

NEW QUESTION # 17

A Developer applies multiple quality patches to an Adobe Commerce Cloud store. After deployment, the Developer discovers that one of the patches is causing issues.

What is the correct procedure to safely remove or revert the problematic quality patch?

- A. Delete the quality patch from the file `magento.app.yaml`.
- B. Execute command in `magento-cloud.php` `/vendor/bin/ecc-patches:revert <patch-id>`.
- C. Delete the quality patch from the file `magento.env.yaml`.

Answer: B

NEW QUESTION # 18

A new critical security vulnerability is found on Adobe Commerce Cloud. The successful exploitation may lead to arbitrary code execution, so the Developer must apply a security patch file given by Adobe as soon as possible to ensure system security. How should the Developer apply the security patch on Adobe Commerce hosted on cloud infrastructure according to best practices?

- A. Upgrade Adobe Commerce to the latest security patch release.
- B. Copy a security patch to `m2-hotfixes` directory.
- C. Apply a security patch using `composer.json`.

Answer: B

Explanation:

On Adobe Commerce Cloud, the best practice for urgent fixes is to place the patch file into the m2-hotfixes directory at the root of the project. Patches in this directory are automatically applied during the Cloud build and deploy process.

Option A (composer.json) applies to composer-based patches in on-premise installations, not the recommended cloud approach.

Option C (upgrade to latest release) is ideal for long-term but not feasible for urgent fixes that must be applied immediately.

NEW QUESTION # 19

A Developer is working on a new controller in admin panel. Per requirements, it must be accessible only for specific admin users. According to best practices, how should the Developer secure access to the new controller?

- A. Implement isAllowed method from AuthorizationInterface and check the result for a custom access control list (ACL) resource.
- **B. Override ADMIN_RESOURCE constant with a value for a custom access control list (ACL) resource.**
- C. Override _isAllowed method and check the authorization result for a custom access control list (ACL) resource.

Answer: B

NEW QUESTION # 20

A client wants to calculate tax differently when an order is billed for a range of particular postcodes. They want to implement their own system instead of using a third-party system. The Developer is asked to assist in this task by creating a conditional webhook. What must be done to achieve this?

- A. Implement a new webhook with a list of postcodes and link it to the original webhook, then advise the client to monitor for the new webhook instead.
- B. Create an after plugin on the webhook class and check for a list of postcodes at the time of processing and return true for certain postcodes.
- **C. Create a webhooks.xml file and add the rules wanted in the form of a rule node element using the regex operator to catch a range of postcodes.**

Answer: C

Explanation:

Webhooks in Adobe Commerce can be customized using webhooks.xml, where rules can be defined with conditions, including regex-based filtering. This allows the developer to configure postcodes that trigger specific webhook behavior.

A is not correct: modifying core webhook logic via plugin is not the recommended approach.

C is incorrect: duplicating webhooks is unnecessary when rules can be defined declaratively.

B is correct: webhooks.xml with rule conditions provides the proper solution.
