Topic 4	Quality Planning: The topic explains the configuration requirements of Quality Planning.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q70-Q75):

NEW QUESTION # 70

which copy model must user maintain in a Master inspection character to forbid changes in Inspection plan

- A. Complete copy model
- **B. Reference characteristics**
- C. Inspection qualification
- D. incomplete copy model

Answer: B

NEW QUESTION # 71

How does the system handle equipment and functional locations in an inspection lot in calibration inspection?

- A. As physical sample
- B. As a characteristic
- C. As a inspection point
- **D. As a material**

Answer: D

NEW QUESTION # 72

You want to create a certificate for an outbound delivery. At which level can you create the certificate?

- A. Shipping point level
- **B. Delivery item level**
- C. Delivery header level
- D. Material level

Answer: B

Explanation:

In SAP S/4HANA QM, outgoing quality certificates are generated for outbound deliveries (e.g., inspection type 10 or 11) to

provide quality data to customers:

* Delivery Item Level (C): Certificates are created at the delivery item level (transaction QC20) because each item in a delivery (VL01N) can have unique materials, batches, and inspection results requiring specific certificate data. The certificate profile (transaction QC01) is assigned to material/customer combinations, and the system generates certificates per item based on this linkage (SPRO > QM > Quality Certificates > Outgoing).

* Material Level (A): Certificates aren't created at the material master level; they're tied to specific delivery transactions.

* Shipping Point Level (B): Shipping points manage logistics, not certificate granularity.

* Delivery Header Level (D): While the delivery header exists, certificates are item-specific to reflect individual material quality.

Thus, "Delivery item level" is the correct answer. References: SAP Help Portal - "Outgoing Quality Certificates"; SAP S/4HANA QM User Guide - "Certificate Creation".

NEW QUESTION # 73

When the usage decision is made for a stock-relevant inspection lot, a goods movement should take place automatically. Where do you make the required setting?

- A. In the movement type
- B. In the codes in the code group
- C. In the codes in the selected set
- **D. In the inspection type**

Answer: D

Explanation:

Automatic goods movement during usage decision (UD, transaction QA11) for stock-relevant lots (e.g., type 01) is configured in:

* In the Inspection Type (D): In Customizing (SPRO > QM > Quality Inspection > Inspection Lot Creation > Maintain Inspection Types), the inspection type (e.g., 01) has a "Automatic UD" and "Stock Posting" setting. Activating this links UD codes to movement types (e.g., 321 for quality to unrestricted), enabling automatic stock updates.

* Codes in the Selected Set (A): Selected sets (transaction QS51) define UD codes but don't control movements.

* Codes in the Code Group (B): Code groups (transaction QS41) are for catalog organization, not stock movement settings.

* Movement Type (C): Movement types (e.g., 321) are used but assigned via inspection type settings, not directly configured there.

Thus, "In the inspection type" is the correct answer. References: SAP Help Portal - "Automatic Stock Posting in QM"; SAP S/4HANA QM Customizing Guide - "Inspection Types".

NEW QUESTION # 74

Your customer user action boxes in the notification processing and wants relationships to exist between the different.....' In which implementation guide activity do you define these relationships ?

- A. Activity catalog
- B. Customer status scheme
- C. Task catalog
- **D. Functions for action box**

Answer: D

NEW QUESTION # 75
