The solution is closer to you than you can imagine, just contact the support team and continue enjoying your study with the CrowdStrike Falcon Administrator preparation material.

CrowdStrike Falcon Administrator Sample Questions (Q212-Q217):

NEW QUESTION # 212

In order to quarantine files on the host, what prevention policy settings must be enabled?

- A. Enable Malware Protection and Custom Execution Blocking

- B. Enable Behavior-Based Threat Prevention sliders and Advanced Remediation Actions
- **C. Enable Next-Gen Antivirus Prevention sliders and "Quarantine & Security Center Registration"**
- D. Enable Malware Protection and Windows Anti-Malware Execution Blocking

Answer: C

Explanation:

The option that will enable Next-Gen Antivirus Prevention sliders and "Quarantine & Security Center Registration" is to enable Malware Protection and Windows Anti-Malware Execution Blocking. Malware Protection is a feature that enables the Next-Gen Antivirus Prevention sliders, which allow you to adjust the level of sensitivity and aggressiveness of the Falcon sensor's machine learning engine, which uses artificial intelligence to identify and stop unknown threats.

Windows Anti-Malware Execution Blocking is a feature that enables the "Quarantine & Security Center Registration" setting, which allows you to quarantine malicious files and register them in the Windows Security Center.

NEW QUESTION # 213

How can a API client secret be viewed after it has been created?

- A. Within the API management page, API client secrets can be accessed within the "edit client" functionality
- **B. The API client secret must be reset or a new client created as the secret cannot be viewed after it has been created**
- C. Selecting "show secret" within the 3-dot dropdown menu will reveal the secret for the selected api client
- D. The API client secret can be provided by support via direct email request from a Falcon Administrator

Answer: B

Explanation:

The way an API client secret can be viewed after it has been created is that the API client secret must be reset or a new client created as the secret cannot be viewed after it has been created.

As explained in question 137, an API client secret is only displayed once during creation for security reasons. If you lose or forget your API client secret, you cannot view it again in the Falcon console. You have two options to resolve this issue: either reset your API client secret or create a new API client. Resetting your API client secret will generate a new secret for your existing API client, which will invalidate any previous secret. Creating a new API client will generate a new API client ID and secret, which will require you to update any applications or scripts that use the Falcon APIs.

NEW QUESTION # 214

What is the goal of a Network Containment Policy?

- A. Increase the aggressiveness of the assigned prevention policy
- **B. Limit the impact of a compromised host on the network**
- C. Partition a network for privacy
- D. Gain more visibility into network activities

Answer: B

Explanation:

The goal of a Network Containment Policy is to limit the impact of a compromised host on the network. This policy allows users to isolate a host from the network, while still allowing it to communicate with the Falcon Cloud and other essential services. This can help prevent further damage or data exfiltration from a compromised host. The other options are either incorrect or not related to the policy.

NEW QUESTION # 215

What sensor update policy will a sensor receive if it does not have a host group assignment?

- A. They don't get a policy
- **B. The default policy**
- C. Auto N-1 policy
- D. Auto N-2 policy

Answer: B

NEW QUESTION # 216

Which of the following is an effective Custom IOA rule pattern to kill any process attempting to access www.badguydomain.com?

- A. \Device\HarddiskVolume2*.exe -SingleArgument www.badguydomain.com/kill
- B. Custom IOA rules cannot be created for domains
- C. badguydomain\.*
- D. .*badguydomain.com.*

Answer: D

Explanation:

You are using RegEx here and need leading "." to capture www and then need a "." at the end to identify any sites falling under badguydomain.com.

NEW QUESTION # 217

.....
