Our CyberArk PAM-CDE-RECERT exam questions are created and curated by industry specialists.

CyberArk CDE Recertification Sample Questions (Q188-Q193):

NEW QUESTION # 188
Can the 'Connect' button be used to initiate an SSH connection, as root, to a Unix system when SSH access for root is denied?

- A. Yes, when using the connect button, CyberArk uses the PMTerminal.exe process which bypasses the root SSH restriction.
- B. No, it is not possible.
- C. Yes, if a logon account is associated with the root account.
- D. Yes, only if a logon account is associated with the root account and the user connects through the PSM-SSH connection component.

Answer: D

NEW QUESTION # 189
When on-boarding account using Accounts Feed, Which of the following is true?

- A. You can specify the name of a new Platform that will be created and associated with the account
- B. Any account that is on boarded can be automatically reconciled regardless of the platform it is associated with.
- C. You can specify the name of a new sale that will be created where the account will be stored when it is on-boarded to the Vault.
- D. You must specify an existing Safe where are account will be stored when it is on boarded to the Vault

Answer: C

NEW QUESTION # 190
One can create exceptions to the Master Policy based on _____.

- A. Policies
- B. Safes
- C. Platforms
- D. Accounts

Answer: D

NEW QUESTION # 191
What is the purpose of the Immediate Interval setting in a CPM policy?

- A. To control how often the CPM looks for User Initiated CPM work.
- B. To control how often the CPM looks for System Initiated CPM work.
- C. To control how often the CPM rests between password changes.
- D. To Control the maximum amount of time the CPM will wait for a password change to complete.

Answer: A

Explanation:
When the Master Policy enforces check-in/check-out exclusive access, passwords are changed when the user clicks the Release button and releases the account. This is based on the ImmediateInterval parameter in the applied platform. If the user forgets to release the account, it is automatically released and changed by the CPM after a predetermined number of minutes, defined in the MinValidityPeriod parameter specified in the platform

NEW QUESTION # 192
You are installing multiple PVWAs behind a load balancer. Which statement is correct?

- A. The LoadBalancerClientAddressHeader parameter in the PVwA.ini file must be set.
- B. The load balancer must support "sticky sessions".
- C. Port 1858 must be opened between the load balancer and the PVWAs
- D. The load balancer must be configured in DNS round robin.

Answer: B

NEW QUESTION # 193
