- A. Send info notifications
- B. Send object update
- C. Send event email template
- D. Send emails
- E. Send event notifications

Answer: A,D,E

Explanation:

Autoflow in SAP Service Cloud V2 automates actions based on case conditions. Configurable actions include sending info notifications to inform users of specific events, sending event notifications for system-triggered updates, and sending emails to customers or agents. According to SAP documentation, "Autoflow supports actions such as sending info notifications, event notifications, and emails to automate case-related communications." Send event email template (A) is not a standard autoflow action. Send object update (D) is not a distinct action, though autoflow can update objects indirectly.
