## SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q75-Q80):

### NEW QUESTION # 75

When should you run Digital Discovery Assessments of an SAP S/4HANA Cloud Public Edition implementation project?

- A. After the Realize phase
- B. After each upgrade
- C. During the Discover phase
- D. During the Deployment phase

**Answer: C**

**Explanation:**

The Digital Discovery Assessment (DDA) is a strategic tool used early in the SAP S/4HANA Cloud Public Edition implementation to align customer requirements with SAP capabilities and plan the project effectively.

\* Option A: After each upgradeIncorrect. DDAs are not used post-upgrade, as they focus on initial project planning. TheSAP S/4HANA Cloud Implementation Guidestates, "The Digital Discovery Assessment is a pre-implementation tool, not used for post-upgrade evaluations, which rely on testing and monitoring."

\* Option B: After the Realize phaseIncorrect. The Realize phase focuses on configuration and testing, not discovery. TheSAP Activate Methodology Guidenotes, "The DDA is conducted before the implementation begins, not after the Realize phase, which is for solution build and validation."

\* Option C: During the Discover phaseCorrect. The DDA is run during the Discover phase to assess requirements and define the project scope. TheSAP S/4HANA Cloud Implementation Guideexplains, "The DigitalDiscovery Assessment is conducted during the Discover phase to capture customer requirements, integration needs, and project timelines, forming the foundation for the implementation."

\* Option D: During the Deployment phaseIncorrect. The Deploy phase focuses on go-live and cutover, not discovery activities. TheSAP S/4HANA Cloud Study Guideclarifies, "The Deploy phase is for system activation, not for running assessments like the DDA, which occurs pre-project." Extract from Official Documentation:

\* SAP S/4HANA Cloud Implementation Guide(SAP Help Portal,<https://help.sap.com>): "The Digital Discovery Assessment is a critical activity in the Discover phase, used to gather requirements, assess solution fit, and plan the SAP S/4HANA Cloud Public Edition implementation."

\* SAP Activate Methodology Guide(SAP Community,<https://community.sap.com>): "During the Discover phase, the Digital Discovery Assessment is run to define the project scope, ensuring alignment between customer needs and SAP Best Practices."

Additional Context:

The DDA is a cornerstone of the Discover phase, enabling customers to evaluate SAP S/4HANA Cloud's capabilities and establish a clear implementation roadmap. Its early execution ensures that subsequent phases are grounded in a well-defined scope, reducing risks and misalignments.

Which tasks are mandatory before you can migrate data for a specific object? Note: There are 2 correct answers to this question.

- A. You select the same migration method previously used for other objects
- B. All previous migration projects are in the "Finished" status
- C. Predecessor objects have been migrated
- D. Permission to migrate the data has been assigned

**Answer: C,D**

Explanation:

Data migration for specific objects in SAP S/4HANA Cloud Public Edition requires certain prerequisites to ensure data consistency and system integrity.

\* Option A: You select the same migration method previously used for other objectsIncorrect. The migration method is object-specific and does not need to match previous methods. TheSAP S/4HANA Cloud Migration Guidestates, "Each migration object can use a different method, depending on its requirements."

\* Option B: All previous migration projects are in the "Finished" statusIncorrect. While completing previous projects is good practice, it is not mandatory for migrating a specific object. TheSAP Migration Guidenotes, "Migration projects can run concurrently, provided dependencies are managed."

\* Option C: Predecessor objects have been migrated Correct. Predecessor objects, such as master data, must be migrated first to maintain data dependencies. The SAP S/4HANA Cloud Migration Guide confirms, "Predecessor objects must be successfully migrated before dependent objects to ensure data consistency."

\* Option D: Permission to migrate the data has been assigned Correct. Users need appropriate permissions to perform migration tasks. The SAP S/4HANA Cloud Security Guide states, "Data migration requires specific authorizations assigned through business roles to execute migration tasks in the Migration Cockpit." Extract from Official Documentation:

\* SAP S/4HANA Cloud Migration Guide (SAP Help Portal, <https://help.sap.com>): "Before migrating a specific object, predecessor objects must be migrated to maintain data dependencies, and users must have the necessary permissions to execute migration tasks."

\* SAP S/4HANA Cloud Security Guide: "The Migration Cockpit requires users to have assigned permissions to perform data migration, ensuring secure and controlled access." Additional Context:
