

# 100% Pass 2025 CCSK: Fantastic Certificate of Cloud Security Knowledge (v4.0) Exam Mock Test

BONUS!!! Download part of BootcampPDF CCSK dumps for free: [https://drive.google.com/open?id=1Kd\\_Snv2fANAkogHSVLvKYZXf9Yzludc](https://drive.google.com/open?id=1Kd_Snv2fANAkogHSVLvKYZXf9Yzludc)

We aim to provide the best service for our customers, and we demand of ourselves and our after sale service staffs to the highest ethical standard, and our CCSK study guide and compiling processes will be of the highest quality. We play an active role in making every country and community in which we selling our CCSK Practice Test a better place to live and work. That is to say, if you have any problem after CCSK exam materials purchasing, you can contact our after sale service staffs anywhere at any time on our CCSK study guide. And our staffs are only waiting for you online.

The CCSK certification exam has been developed by the Cloud Security Alliance (CSA), a non-profit organization that is dedicated to promoting the use of best practices for providing security assurance in cloud computing. The CSA has been working with industry experts and academics to develop a comprehensive body of knowledge that covers all aspects of cloud security. The CCSK certification exam is based on this body of knowledge and is designed to test a professional's knowledge and skills in cloud security.

The CCSK: Certificate of Cloud Security Knowledge (v4.0) exam is a valuable certification for professionals in the field of cloud computing. CCSK Exam covers a wide range of topics and provides a comprehensive understanding of the various aspects of cloud security. Certificate of Cloud Security Knowledge (v4.0) Exam certification is recognized worldwide and is a valuable asset for professionals looking to enhance their career prospects and increase their job opportunities in the field of cloud computing.

## Fantastic CCSK Mock Test | Easy To Study and Pass Exam at first attempt & The Best Cloud Security Alliance Certificate of Cloud Security Knowledge (v4.0) Exam

Do you want to pass the exam just for one time? If you do want choose our CCSK exam dumps. The pass rate is 98%, and pass guarantee and money back guarantee if you fail to pass the exam. Besides we also have the free demo for you to try, before buying, it will help you to have a general idea of the CCSK Exam Dumps. If you have any questions, please contact us directly, we will try our best to help you the problem, so don't hesitate to contact us.

The CCSK certification exam is an excellent way for IT professionals to demonstrate their expertise in cloud security and stay up-to-date with the latest best practices and guidelines. Certificate of Cloud Security Knowledge (v4.0) Exam certification is also beneficial for organizations that want to ensure that their IT staff and security professionals have the necessary knowledge and skills to secure their cloud environments. Furthermore, the CCSK Certification is recognized by major cloud providers, including Amazon Web Services, Microsoft Azure, and Google Cloud Platform, which further validates the certification's value and importance in the industry.

## **Cloud Security Alliance Certificate of Cloud Security Knowledge (v4.0) Exam Sample Questions (Q87-Q92):**

### **NEW QUESTION # 87**

Which of the following is key component of regulated PII components?

- A. Data disclosure
- **B. Mandatory Breach Reporting**
- C. Cloud Service Provider Consent
- D. E-discovery

**Answer: B**

Explanation:

The key component and differentiator related to regulated PII is mandatory breach reporting requirements. At present, 47 states and territories within the United States, including the District of Columbia, Puerto Rico, and the Virgin Islands, have legislation in place that requires both private and government entities to notify and inform individuals of any security breaches involving PII.

### **NEW QUESTION # 88**

Which of the following is NOT a characteristic of cloud computing?

- **A. Reduced personnel cost**
- B. Resource Pooling
- C. Metered service
- D. On-demand self service

**Answer: A**

Explanation:

The characteristics of cloud computing are

1. On-demand self-service: A consumer can unilaterally provision computing capabilities, such as server time and network storage, as needed automatically without requiring human interaction with each service provider.
2. Broad network access: Capabilities are available over the network and accessed through standard mechanisms that promote use by heterogeneous thin or thick client platforms (e.g., mobile phones, tablets, laptops and workstations).
3. Resource pooling: The provider's computing resources are pooled to serve multiple consumers using a multi-tenant model, with different physical and virtual resources dynamically assigned and reassigned according to consumer demand. There is a sense of location independence in that the customer generally has no control or knowledge over the exact location of the provided resources but may be able to specify location at a higher level of abstraction (e.g., country, state or datacenter).

Examples of resources include storage, processing, memory and network bandwidth.

4. Rapid elasticity: Capabilities can be elastically provisioned and released, in some cases automatically, to scale rapidly outward and inward commensurate with demand. To the consumer, the capabilities available for provisioning often appear to be unlimited and can be appropriated in any quantity at anytime.

5. Measured service: Cloud systems automatically control and optimize resource use by leveraging a metering capability at some level of abstraction appropriate to the type of service (e.g., storage, processing, bandwidth and active user accounts).

Resource usage can be monitored, controlled and reported, providing transparency for the provider and consumer.

### **NEW QUESTION # 89**

Which factors primarily drive organizations to adopt cloud computing solutions?

- A. Enhanced security and compliance
- **B. Cost efficiency and speed to market**

- C. Improved software development methodologies
- D. Scalability and redundancy

**Answer: B**

Explanation:

Cloud computing is adopted mainly for its cost-effectiveness and the ability to accelerate time-to-market, enhancing business agility.

**NEW QUESTION # 90**

Which is the core technology for enabling cloud computing and used to convert fixed infrastructure into pooled resources?

- A. Application Programming Interfaces
- **B. Virtualization**
- C. Auto-Scaling
- D. Software Defined Networking

**Answer: B**

Explanation:

Virtualization isn't merely a tool for creating virtual machines-it's the core technology for enabling cloud computing. We use virtualization all throughout computing, from full operating virtual machines to virtual execution environments like the Java Virtual Machine, as well as in storage, networking, and beyond.

**NEW QUESTION # 91**

GRC is responsibility of \_\_\_\_\_ in the all cloud services models

- A. Cloud Access Security Broker(CASB)
- B. Service Provider
- **C. Customer**
- D. Reseller

**Answer: C**

Explanation:

GRC and data is responsibility of the customer in all service models according to shared responsibility model.
