Topic 7	Regulatory Compliance and Legal Issues: This section addresses risk management and risk assessment methodologies, including threat modeling and vulnerability assessment. It also explores various risk mitigation strategies.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q82-Q87):

NEW QUESTION # 82

If an `it_project_manager` does not want to equally distribute hours across the resource plan time frame, what allocation spread should be used?

- A. Front Load.
- B. Back Load.
- C. Even.
- D. Any.

Answer: D

Explanation:

Explanation

If an `it_project_manager` does not want to equally distribute hours across the resource plan time frame, the allocation spread should be set to Any. This option allows the `it_project_manager` to manually enter the hours for each month or quarter in the resource plan. The other options (Even, Back Load, and Front Load) automatically distribute the hours evenly, from the end, or from the start of the time frame, respectively. You can find more information about the allocation spread in the Product Documentation for ServiceNow.

NEW QUESTION # 83

Which role is needed to group related projects and demands?

- A. `it_project_user`
- B. `it_project_manager`
- C. `it_program_manager`
- D. `it_demand_manager`

Answer: C

Explanation:

According to the ServiceNow documentation¹, the `it_program_manager` role is needed to group related projects and demands. This role can create and manage programs, which are containers for projects and demands that share a common goal or objective. The other options are incorrect because:

B. `it_project_manager`: The `it_project_manager` role can create and manage projects, but not group them into programs².

C. `it_demand_manager`: The `it_demand_manager` role can create and manage demands, but not group them into programs³.

D. `it_project_user`: The `it_project_user` role can view and edit project tasks, but not create or manage projects, demands, or

programs4.

NEW QUESTION # 84

At a minimum, which role is required to update a project task in Project Workspace?

- A. Itil
- B. it_project_manager
- C. it_portfolio_manager
- D. it_project_user

Answer: D

NEW QUESTION # 85

If a user creates a new demand from the demand workbench, what state will the system save the record in?

- A. open
- B. draft
- C. qualified
- D. approved

Answer: C

Explanation:

Explanation

According to the Using the Demand Workbench document, if a user creates a new demand from the demand workbench, the system saves the record in the qualified state and displays it on the bubble chart. The other options are not correct, as they are not the default state for a new demand created from the demand workbench.

The approved state is the final state for a demand that has passed all the assessments. The open state is the initial state for a demand that is created from the Service Catalog. The draft state is the state for a demand that is created from the Demand form.

NEW QUESTION # 86

What is the formula for Committed Utilization?

- A. Assigned Hours/Capacity
- B. (Allocated Hours + Confirmed Hours)/Capacity
- C. Allocated Hours/Capacity
- D. Confirmed Hours/Capacity

Answer: D

NEW QUESTION # 87
