

# 100% Pass 2025 CT-PT: ISTQB Certified Tester - Performance Testing–Efficient Reliable Braindumps Sheet

What's more, part of that Real4exams CT-PT dumps now are free: <https://drive.google.com/open?id=1ptC6ahVphbngNXFS-AIrsizEtUE9fdz>

We present our CT-PT real questions in PDF format. It is beneficial for those applicants who are busy in daily routines. The ISTQB CT-PT PDF QUESTIONS contains all the exam questions which will appear in the real test. You can easily get ready for the examination in a short time by just memorizing CT-PT Actual Questions. Real4exams PDF questions can be printed. And this document of CT-PT questions is also usable on smartphones, laptops and tablets. These features of the ISTQB CT-PT PDF format enable you to prepare for the test anywhere, anytime.

## ISTQB CT-PT Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Types of Performance Testing: This section of the exam measures the skills of Software Test Analysts and covers various approaches such as load, stress, scalability, spike, endurance, concurrency, and capacity testing. It explains how each type evaluates system behavior under different conditions, helping testers and stakeholders understand how the system handles both expected and extreme usage scenarios.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>The Concept of Load Generation: This section of the exam measures the skills of Software Test Analysts and discusses how representative loads are modeled and produced to simulate user or process behavior. It explores methods such as user interface inputs, crowdsourcing, API-based calls, or protocol capture and playback, emphasizing the need for repeatable loads that accurately reflect real-world conditions.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Common Failures in Performance Testing and Their Causes: This section of the exam measures the skills of Performance Engineers and outlines frequent failure modes, including slow responses at various load levels, degraded performance over time, and system crashes under peak conditions. It provides examples of underlying causes such as resource leaks, insufficient capacity, and poor handling of spikes or concurrency, illustrating why robust planning and monitoring are crucial for reliable performance.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Testing Types in Performance Testing: This section of the exam introduces the distinction between static and dynamic performance testing. It shows how reviews of requirements, architecture, and code can identify risks before coding is complete, and how runtime checks of resource utilization and response times reveal issues that only appear when the system is in operation.</li> </ul>

## Find Success In Exam With ISTQB CT-PT PDF Questions

Many candidates who take the qualifying exams are not aware of our products and are not guided by our systematic guidance, and our users are much superior to them. In similar educational products, the CT-PT quiz guide is absolutely the most practical. Also, from an economic point of view, our ISTQB Certified Tester - Performance Testing exam dumps is priced reasonable, so the CT-PT test material is very responsive to users, user satisfaction is also leading the same products. So economical and practical learning platform, I believe that will be able to meet the needs of users. Users can deeply depend on our ISTQB Certified Tester - Performance Testing exam dumps when you want to get a qualification. There may be many problems and difficulties you will face, but believe in our ISTQB Certified Tester - Performance Testing exam dumps if you want to be the next beneficiary, our CT-PT Quiz guide is not only superior in price than any other makers in the educational field, but also are distinctly superior in the quality of our products.

## ISTQB Certified Tester - Performance Testing Sample Questions (Q38-Q43):

### NEW QUESTION # 38

When following the principal performance testing activities, when are resources allocated?

- A. During test completion
- B. During test planning**
- C. During test execution
- D. During test evaluation

### Answer: B

Explanation:

Resource allocation happens during the test planning phase, where hardware, tools, and personnel are assigned to the project. This ensures that performance tests are adequately supported.

Option B (Test execution) is when resources are actually used, not allocated.

Option C (Test evaluation) happens after execution to analyze results.

Option D (Test completion) focuses on documentation and reporting.

### NEW QUESTION # 39

Which of the following is an advantage of using performance monitoring tools?

- A. They can proactively detect denial-of-service (DoS) attacks.
- B. They can prevent malicious behavior.
- C. They more easily identify and report multi-threading problems.
- D. They proactively compile metrics from server logs.**

**Answer: D**

Explanation:

Performance monitoring tools collect real-time and historical performance data, particularly from server logs, application metrics, and infrastructure monitoring. This allows testers to analyze performance trends efficiently.

Option A is incorrect because monitoring tools do not prevent malicious behavior but may detect it.

Option C is incorrect since identifying multi-threading issues is typically done through profiling tools rather than performance monitors.

Option D is incorrect as DoS attack detection falls under security testing.

**NEW QUESTION # 40**

Which of the following is considered a characteristic of stress testing?

- A. Considers the system's ability to recover from a sudden increase of loads within the system's limits.
- B. It determines the maximum number of transactions a system can handle.
- **C. It evaluates the system's ability to handle loads beyond its design limits.**
- D. It focuses on the system's ability to handle transactions over a specific timeframe.

**Answer: C**

Explanation:

Stress testing is designed to evaluate how a system behaves under extreme conditions, often exceeding its design limitations. The goal is to identify bottlenecks, memory leaks, and failures that occur beyond normal operating conditions.

Option A is incorrect because it refers to resilience testing, which focuses on recovery rather than stress beyond limits.

Option B is incorrect as it describes load testing, which measures performance under expected loads.

Option C is incorrect since determining the maximum transactions is a feature of capacity testing, not stress testing.

**NEW QUESTION # 41**

Which of the following can provide measurements for both individual and aggregated elements within a single performance test?

- A. Process optimization tracking
- B. Aggregated metrics
- C. Measuring underlying transactions
- **D. Nested transactions**

**Answer: D**

Explanation:

Nested transactions allow performance tests to capture both individual and aggregated elements by grouping multiple related transactions and measuring their cumulative impact.

Option A (Aggregated metrics) provides summaries but lacks insight into individual elements.

Option B (Process optimization tracking) focuses on business process improvement, not test metrics.

Option C (Measuring underlying transactions) focuses only on individual transactions.

**NEW QUESTION # 42**

Which of the following is considered a common web service protocol?

- A. SOAK
- B. RTE
- **C. REST**
- D. HTTP

**Answer: C**

Explanation:

REST (Representational State Transfer) is a widely used web service protocol that enables client-server communication over HTTP. It is commonly used in modern APIs and web applications for performance testing.

Option A (SOAK) refers to soak testing, which evaluates performance over an extended period.

Option C (HTTP) is a transport protocol, but REST is the actual web service architecture built on HTTP.  
Option D (RTE) is not a web service protocol but may refer to Real-Time Enterprise systems.

## NEW QUESTION # 43

.....

The Real4exams acknowledges that ISTQB aspirants are continuously juggling a couple of responsibilities, so CT-PT questions are ideal for short practise. Candidates can access those questions everywhere and at any time, the usage of any clever device, which allows them to examine at their very own tempo. The CT-PT Questions are portable and you can also print them
