

100% Pass 2025 Databricks Useful Valid Databricks-Certified-Professional-Data-Engineer Exam Vce

What's more, part of that Prep4King Databricks-Certified-Professional-Data-Engineer dumps now are free:
https://drive.google.com/open?id=11qEFOFLRiFDWv659KBg_btoIozLObJSK

As a reliable company providing professional IT certificate exam materials, we not only provide quality guaranteed products for Databricks-Certified-Professional-Data-Engineer exam software, but also offer high quality pre-sale and after-sale service. Our online service will give you 24/7 online support. If you have any question about Databricks-Certified-Professional-Data-Engineer exam software or other exam materials, or any problem about how to purchase our products, you can contact our online customer service directly. Besides, during one year after you purchased our Databricks-Certified-Professional-Data-Engineer Exam software, any update of Databricks-Certified-Professional-Data-Engineer exam software will be sent to your mailbox the first time.

Databricks-Certified-Professional-Data-Engineer exam consists of multiple-choice questions and hands-on, real-world scenarios that test the candidate's ability to design, build, and deploy data pipelines on Databricks. Databricks-Certified-Professional-Data-Engineer Exam covers various topics, including data engineering concepts, Databricks architecture, data processing using Spark, and data integration with other systems. Databricks Certified Professional Data Engineer Exam certification program provides a comprehensive learning experience that prepares candidates to become skilled data engineers and provides them with a competitive edge in the job market.

Databricks-Certified-Professional-Data-Engineer Latest Test Camp, Databricks-Certified-Professional-Data-Engineer Test Passing Score

A second format is a Databricks Databricks-Certified-Professional-Data-Engineer web-based practice exam that can take for self-assessment. However, it differs from desktop-based Databricks-Certified-Professional-Data-Engineer practice exam software as it can be taken via any browser, including Chrome, Firefox, Safari, and Opera. This Databricks Databricks-Certified-Professional-Data-Engineer web-based practice exam does not require any other plugins. It also includes all of the functionalities of desktop Databricks-Certified-Professional-Data-Engineer software and will assist you in passing the Databricks-Certified-Professional-Data-Engineer certification test.

Databricks Certified Professional Data Engineer Exam Sample Questions (Q104-Q109):

NEW QUESTION # 104

A data engineer needs to capture pipeline settings from an existing in the workspace, and use them to create and version a JSON file to create a new pipeline.

Which command should the data engineer enter in a web terminal configured with the Databricks CLI?

- A. Use the get command to capture the settings for the existing pipeline; remove the pipeline_id and rename the pipeline; use this in a create command
- B. Stop the existing pipeline; use the returned settings in a reset command
- C. Use list pipelines to get the specs for all pipelines; get the pipeline spec from the return results parse and use this to create a pipeline
- D. Use the clone command to create a copy of an existing pipeline; use the get JSON command to get the pipeline definition; save this to git

Answer: A

Explanation:

The Databricks CLI provides a way to automate interactions with Databricks services. When dealing with pipelines, you can use the `databricks pipelines get --pipeline-id` command to capture the settings of an existing pipeline in JSON format. This JSON can then be modified by removing the `pipeline_id` to prevent conflicts and renaming the pipeline to create a new pipeline. The modified JSON file can then be used with the `databricks pipelines create` command to create a new pipeline with those settings.

NEW QUESTION # 105

The data architect has mandated that all tables in the Lakehouse should be configured as external (also known as "unmanaged") Delta Lake tables.

Which approach will ensure that this requirement is met?

- A. When the workspace is being configured, make sure that external cloud object storage has been mounted.
- B. When configuring an external data warehouse for all table storage, leverage Databricks for all ELT.
- C. When a database is being created, make sure that the LOCATION keyword is used.
- D. When tables are created, make sure that the EXTERNAL keyword is used in the CREATE TABLE statement.
- E. When data is saved to a table, make sure that a full file path is specified alongside the Delta format.

Answer: D

Explanation:

To create an external or unmanaged Delta Lake table, you need to use the EXTERNAL keyword in the CREATE TABLE statement. This indicates that the table is not managed by the catalog and the data files are not deleted when the table is dropped.

You also need to provide a LOCATION clause to specify the path where the data files are stored. For example:

`CREATE EXTERNAL TABLE events ( date DATE, eventId STRING, eventType STRING, data STRING) USING DELTA LOCATION '/mnt/delta/events';` This creates an external Delta Lake table named events that references the data files in the '/mnt/delta/events' path. If you drop this table, the data files will remain intact and you can recreate the table with the same statement.

* <https://docs.databricks.com/delta/delta-batch.html#drop-a-table>

NEW QUESTION # 106

The data governance team has instituted a requirement that all tables containing Personal Identifiable Information (PII) must be clearly annotated. This includes adding column comments, table comments, and setting the custom table property 'contains_pii' = true.

The following SQL DDL statement is executed to create a new table:

```
CREATE TABLE dev.pii_test
(id INT, name STRING COMMENT "PII")
COMMENT "contains PII"
TBLPROPERTIES ('contains_pii' = True)
```

Which command allows manual confirmation that these three requirements have been met?

- A. SHOW TABLES dev
- B. SHOW TBLPROPERTIES dev.pii test

- C. DESCRIBE EXTENDED dev.pii test
- D. DESCRIBE DETAIL dev.pii test
- E. DESCRIBE HISTORY dev.pii test

Answer: C

Explanation:

Explanation

This is the correct answer because it allows manual confirmation that these three requirements have been met.

The requirements are that all tables containing Personal Identifiable Information (PII) must be clearly annotated, which includes adding column comments, table comments, and setting the custom table property

"contains_pii" = true. The DESCRIBE EXTENDED command is used to display detailed information about a table, such as its schema, location, properties, and comments. By using this command on the dev.pii_test table, one can verify that the table has been created with the correct column comments, table comment, and custom table property as specified in the SQL DDL statement.

Verified References: [Databricks Certified Data Engineer Professional], under "Lakehouse" section; Databricks Documentation, under "DESCRIBE EXTENDED" section.

NEW QUESTION # 107

A table named user_ltv is being used to create a view that will be used by data analysis on various teams. Users in the workspace are configured into groups, which are used for setting up data access using ACLs.

The user_ltv table has the following schema:

An analyst who is not a member of the auditing group executing the following query:

Which result will be returned by this query?

- A. All age values less than 18 will be returned as null values all other columns will be returned with the values in user_ltv.
- B. All columns will be displayed normally for those records that have an age greater than 18; records not meeting this condition will be omitted.
- C. All records from all columns will be displayed with the values in user_ltv.
- D. All columns will be displayed normally for those records that have an age greater than 17; records not meeting this condition will be omitted.

Answer: B

Explanation:

Given the CASE statement in the view definition, the result set for a user not in the auditing group would be constrained by the ELSE condition, which filters out records based on age. Therefore, the view will return all columns normally for records with an age greater than 18, as users who are not in the auditing group will not satisfy the is_member('auditing') condition. Records not meeting the age > 18 condition will not be displayed.

NEW QUESTION # 108

The DevOps team has configured a production workload as a collection of notebooks scheduled to run daily using the Jobs UI. A new data engineering hire is onboarding to the team and has requested access to one of these notebooks to review the production logic.

What are the maximum notebook permissions that can be granted to the user without allowing accidental changes to production code or data?

- A. Can Manage
- B. No permissions
- C. Can Edit
- **D. Can Read**
- E. Can Run

Answer: D

Explanation:

This is the correct answer because it is the maximum notebook permissions that can be granted to the user without allowing accidental changes to production code or data. Notebook permissions are used to control access to notebooks in Databricks workspaces. There are four types of notebook permissions: Can Manage, Can Edit, Can Run, and Can Read. Can Manage allows full control over the notebook, including editing, running, deleting, exporting, and changing permissions. Can Edit allows modifying and running the notebook, but not changing permissions or deleting it. Can Run allows executing commands in an existing cluster attached to the notebook, but not modifying or exporting it. Can Read allows viewing the notebook content, but not running or modifying it. In this case, granting Can Read permission to the user will allow them to review the production logic in the notebook without allowing them to make any changes to it or run any commands that may affect production data. Verified References: [Databricks Certified Data Engineer Professional], under "Databricks Workspace" section; Databricks Documentation, under "Notebook permissions" section.

NEW QUESTION # 109

.....

Are you preparing for the coming Databricks-Certified-Professional-Data-Engineer exam right now? And you feel exhausted when you are searching for the questions and answers to find the keypoints, right? In fact, you do not need other reference books. Our Databricks-Certified-Professional-Data-Engineer study materials will offer you the most professional guidance. In addition, our Databricks-Certified-Professional-Data-Engineer learning quiz will be updated according to the newest test syllabus. So you can completely rely on our Databricks-Certified-Professional-Data-Engineer study materials to pass the exam.
