Valid Terraform-Associate-003 Exam Forum - Terraform-Associate-003 New Dumps Sheet

Aspiring HashiCorp professionals strive to excel in HashiCorp Terraform-Associate-003 exams such as the HashiCorp Certified: Terraform Associate (003) (HCTA0-003) (Terraform-Associate-003) to achieve their dream careers. However, passing the Terraform-Associate-003 Exam can be challenging, especially with a demanding schedule that leaves little time for preparation.

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q126-Q131):

NEW QUESTION # 126

What is the name of the default file where Terraform stores the state?

Type your answer in the field provided. The text field is not case-sensitive and all variations of the correct answer are accepted.

- A. Terraformtstate

Answer: A

Explanation:

The name of the default file where Terraform stores the state is terraform.tfstate. This file contains a JSON representation of the current state of the infrastructure managed by Terraform. Terraform uses this file to track the metadata and attributes of the resources, and to plan and apply changes. By default, Terraform stores the state file locally in the same directory as the configuration files, but it can also be configured to store the state remotely in a backend. Reference = [Terraform State], [State File Format]

NEW QUESTION # 127

Any user can publish modules to the public Terraform Module Registry.

- A. True
- B. False

Answer: A

Explanation:

The Terraform Registry allows any user to publish and share modules. Published modules support versioning, automatically generate documentation, allow browsing version histories, show examples and READMEs, and more. Public modules are managed via Git and GitHub, and publishing a module takes only a few minutes. Once a module is published, releasing a new version of a module is as simple as pushing a properly formed Git tag.

Reference = The information can be verified from the Terraform Registry documentation on Publishing Modules provided by HashiCorp Developer.

NEW QUESTION # 128

If a DevOps team adopts AWS CloudFormation as their standardized method for provisioning public cloud resources, which of the following scenarios poses a challenge for this team?

- A. The team is asked to manage a new application stack built on AWS-native services
- B. The team is asked to build a reusable code based that can deploy resources into any AWS region
- C. The DevOps team is tasked with automating a manual, web console-based provisioning.
- D. The organization decides to expand into Azure wishes to deploy new infrastructure

Answer: D

Explanation:

Explanation

This is the scenario that poses a challenge for this team, if they adopt AWS CloudFormation as their standardized method for provisioning public cloud resources, as CloudFormation only supports AWS services and resources, and cannot be used to provision infrastructure on other cloud platforms such as Azure.

NEW QUESTION # 129

Which Terraform collection type should you use to store key/value pairs?

- A. Tuple
- **B. Map**
- C. Set
- D. list

Answer: B

Explanation:

The Terraform collection type that should be used to store key/value pairs is map. A map is a collection of values that are accessed by arbitrary labels, called keys. The keys and values can be of any type, but the keys must be unique within a map. For example, `var = { key1 = "value1", key2 = "value2" }` is a map with two key/value pairs. Maps are useful for grouping related values together, such as configuration options or metadata. References = [Collection Types], [Map Type Constraints]

NEW QUESTION # 130

What does Terraform use the `.terraform.lock.hcl` file for?

- A. Preventing Terraform runs from occurring
- B. Storing references to workspaces which are locked
- **C. Tracking specific provider dependencies**
- D. There is no such file

Answer: C

Explanation:

The `.terraform.lock.hcl` file is a new feature in Terraform 0.14 that records the exact versions of each provider used in your configuration. This helps ensure consistent and reproducible behavior across different machines and runs.

NEW QUESTION # 131

.....

Experts at PassLeaderVCE strive to provide applicants with valid and updated HashiCorp Terraform-Associate-003 exam questions to prepare from, as well as increased learning experiences. We are confident in the quality of the HashiCorp Terraform-Associate-003 preparational material we provide and back it up with a money-back guarantee. PassLeaderVCE provides HashiCorp Terraform-Associate-003 desktop-based practice software for you to test your knowledge and abilities. The Terraform-Associate-003 desktop-based practice software has an easy-to-use interface.
