You will acquire a lot of knowledge to make you more learned and enhance your working abilities in some certain area.

Apple Device Support Exam Sample Questions (Q126-Q131):

NEW QUESTION # 126

A user wants to use AirDrop to send items. What is a reason a user can't use AirDrop?

- A. They didn't install AirDrop.
- B. They turned on Handoff.
- C. They turned off Bluetooth.
- D. They turned off Personal Hot-spot.

Answer: C

Explanation:

AirDrop requires both Wi-Fi and Bluetooth. If Bluetooth is off, AirDrop fails as it can't discover nearby devices.

* Option B: AirDrop is built-in, not installed.

* Option C: Handoff doesn't disable AirDrop.

* Option D: Hotspot doesn't affect AirDrop.

* Option A: Correct-Bluetooth is essential. References: Apple Support - "Use AirDrop" (support.apple.com/HT204144).

NEW QUESTION # 127

Which troubleshooting steps should you follow if Quick Start does NOT automatically discover the other device?

- A. Restart both devices and try again.
- B. On your current device, go to Settings > Bluetooth and select your new device from the list of options.
- C. Connect both devices to Wi-Fi and make sure that they're placed near each other.
- D. Turn off Bluetooth and Wi-Fi to avoid interference when discovering devices.

Answer: A

NEW QUESTION # 128

How can you use AirPlay to share content exclusively with a specific individual from your Apple iPhone and Mac?

- A. Allow Airplay for Current use
- B. Allow Airplay for anyone in the same network
- C. Allow Airplay for everyone

Answer: A

Explanation:

To use AirPlay to share content exclusively with a specific individual from your Apple iPhone and Mac, you need to set the "Allow AirPlay for" option to "Current user" on your Mac. This option allows only devices where you're signed in with the same Apple ID as on the Mac to stream to the Mac. To set this option, you need to go to System Preferences > Sharing and click on "AirPlay Receiver" in the list that appears on the left. Then, choose "Current user" from the menu next to "Allow AirPlay for". After that, you can use AirPlay to stream or mirror content from your iPhone to your Mac by tapping the AirPlay button in the app that you're using or in Control Center¹²³⁴. References: = Apple - Support - Manuals, macOS User Guide, Set up your Mac to be an AirPlay receiver; Apple - Support - Manuals, Use AirPlay to stream video or mirror the screen of your iPhone; How to AirPlay From iPhone or iPad to Your Mac - How-To Geek; How to Use AirPlay (Screen Mirroring) on a Mac - How-To Geek.

NEW QUESTION # 129

Which disk format should you use to create a bootable macOS installer that includes macOS Recovery on an external storage device?

- A. APFS (Encrypted)
- B. APFS
- C. MacOS Extended
- D. Mac OS Extended (Encrypted)

Answer: C

Explanation:

To create a bootable macOS installer that includes macOS Recovery on an external storage device, you need to use the Mac OS Extended format, also known as HFS+. This is because the `createinstallmedia` command, which is used to create the bootable installer, requires the volume to be formatted as Mac OS Extended. APFS (Apple File System) is not supported by `createinstallmedia`, and neither are the encrypted versions of APFS or Mac OS Extended.

Therefore, the correct answer is D. Mac OS Extended. References: Create a bootable installer for macOS, How to create a bootable USB macOS installer, How to format the startup drive for a Mac

NEW QUESTION # 130

Select the setting in the sidebar that you should use to turn on Find My on your Mac.

Answer:

Explanation:

Explanation:

Turn on Find My Mac in iCloud settings so you can locate, lock, or erase your Mac.

* On your Mac, choose Apple menu > System Settings, then click [your name] at the top of the sidebar. ...

* Click iCloud on the right, then click Find My Mac.

NEW QUESTION # 131
