# 100% Pass 2025 Latest 1Z0-1109-25: Oracle Cloud Infrastructure 2025 DevOps Professional Valid Test Dumps

BTW, DOWNLOAD part of DumpExam 1Z0-1109-25 dumps from Cloud Storage: https://drive.google.com/open?id=1WkhNK_0E4QH4c82PiEp1OQa64OegFmIQ

In order to serve you better, we have a complete system for 1Z0-1109-25 training materials. We offer you free demo to have a try before buying, so that you can have a better understanding of what you are going to buy. After payment, you can obtain the download link and password within ten minutes for 1Z0-1109-25 Training Materials. And we have a professional after-service team, they process the professional knowledge for the 1Z0-1109-25 exam dumps, and if you have any questions for the 1Z0-1109-25 exam dumps, you can contact with us by email, and we will give you reply as soon as possible.

Our 1Z0-1109-25 test questions can help you have a good preparation for exam effectively. Also you don't need to worry about if our 1Z0-1109-25 study materials are out of validity. We provide one year free updates for every buyer, after purchasing you can download our latest version of 1Z0-1109-25 Training Questions always within one year. And if you have any question on our 1Z0-1109-25 learning guide, you can contact with our service at any time, we will help you pass the 1Z0-1109-25 exam with our high quality of 1Z0-1109-25 exam questions and good service.

1Z0-1109-25 – 100% Free Valid Test Dumps | High Pass-Rate Oracle Cloud Infrastructure 2025 DevOps Professional Valid Exam Book

The Oracle 1Z0-1109-25 pdf questions learning material provided to the customers from DumpExam is in three different formats. The first format is PDF format which is printable and portable. It means it can be accessed from tablets, laptops, and smartphones to prepare for the Oracle Cloud Infrastructure 2025 DevOps Professional (1Z0-1109-25) exam. The Oracle 1Z0-1109-25 PDF format can be used offline, and candidates can even prepare for it in the classroom or library by printing questions or on their smart devices.

Oracle 1Z0-1109-25 Exam Syllabus Topics:

Topic	Details

Topic 1	• Managing Containers Using Container Orchestration Engine: This part assesses the abilities of Kubernetes Administrators and Containerization Specialists in managing Oracle Container Engine for Kubernetes (OKE). It covers cluster creation, scaling, upgrades, networking, storage, and security configurations to optimize containerized applications in OCI environments.
Topic 2	• Implementing Monitoring and Observability (O&M): This section evaluates the expertise of Site Reliability Engineers (SREs) and Monitoring Specialists in tracking system performance using OCI Monitoring, Logging, and Events services. It analyzes metrics, logs, and events to maintain system reliability and troubleshoot operational issues effectively.
Topic 3	• Understand DevOps Principles and Effectively Work with Containerization Services: This section of the exam measures the skills of DevOps Engineers and Cloud Architects in applying DevOps methodologies and containerization practices. It covers implementing a microservices architecture, creating Docker containers, and managing Oracle Cloud Infrastructure Registry (OCIR) and Container Instances to streamline application deployment and scalability.
Topic 4	• Using Code and Templates for Provisioning and Configuring Infrastructure: This domain evaluates the expertise of DevOps Engineers and Infrastructure Architects in deploying infrastructure using Infrastructure as Code (IaC) tools like Terraform. It focuses on automating resource provisioning with OCI Resource Manager to ensure consistent and efficient infrastructure setups.

Oracle Cloud Infrastructure 2025 DevOps Professional Sample Questions (Q41-Q46):

NEW QUESTION # 41
Which OCI DevOps project resource is responsible for defining the stages for compiling, testing, and running software applications before deployment?

- A. Integration pipelines
- B. Development pipelines
- C. Deployment pipelines
- D. Build pipelines

Answer: D

Explanation:
Build pipelines in OCI DevOps are responsible for defining the stages involved in compiling, testing, and running software applications. These pipelines automate the process of building the code, running unit tests, scanning for vulnerabilities, and packaging the software, all of which occur before deploying the application.

NEW QUESTION # 42
How does the Oracle Cloud Infrastructure Container Engine for Kubernetes (OKE) Cluster Autoscaler determine when to create new nodes for an OKE cluster?

- A. When the CPU or memory utilization crosses a configured threshold.
- B. When the resource requests from pods exceed a configured threshold.
- C. When the rate of requests to the application crosses a configured threshold.
- D. When the custom metrics from the services exceed a configured threshold.

Answer: B

Explanation:
The OKE Cluster Autoscaler automatically adjusts the number of worker nodes in an OKE cluster based on the resource requests made by Kubernetes pods. When there are not enough resources available (e.g., CPU or memory) on existing nodes to accommodate pending pods, the Cluster Autoscaler will create new nodes to meet the resource demand.

NEW QUESTION # 43

A small company is moving to a DevOps framework to better accommodate their intermittent workloads, which are dynamic and irregular. They want to adopt a consumption-based pricing model.

Which Oracle Cloud Infrastructure service can be used as a target deployment environment?

- A. Functions
- B. Bare metal compute instance
- C. Oracle Kubernetes (OKE)
- D. Virtual machine compute instance

Answer: A

Explanation:

Oracle Cloud Infrastructure Functions is a serverless compute service that supports a consumption-based pricing model. This means that you are only charged for the compute resources when your function is invoked. This is ideal for intermittent, dynamic, and irregular workloads since the company does not need to provision infrastructure in advance, and costs are directly tied to usage.

NEW QUESTION # 44

As a DevOps engineer working on managing clusters on the OCI platform for your organization, which statement is true about managing cluster add-ons in OCI OKE Cluster?

- A. When creating a new cluster, essential cluster add-ons cannot be disabled.
- B. When enabling a cluster add-on, you cannot configure the add-on by specifying one or more key/value pairs to pass as arguments to the cluster add-on.
- C. When you disable a cluster add-on using the console, the add-on is completely removed from the cluster.
- D. When creating a new cluster, essential cluster add-ons are set to manually update.

Answer: A

Explanation:

Essential cluster add-ons are required for the basic functioning of the Kubernetes cluster and cannot be disabled during cluster creation. These add-ons provide necessary features such as core DNS, networking, and other critical functionalities for the cluster's operation.

NEW QUESTION # 45

You host your application on a stack in Oracle Cloud Infrastructure (OCI) Resource Manager. Because of recent growth in your user base, you decide to add a CIDR block to your VCN, add a subnet, and provision a compute instance in it.

Which statement is true?

- A. You can make the changes to the Terraform code, run a Drift Detection job, and Resource Manager will provision the new resources.
- B. You can make the changes to the Terraform code, run an Apply job, and Resource Manager will provision the new resources.
- C. You need to provision the new resources in the OCI console first, then add them later to the Terraform configuration and state.
- D. You need to provision a new stack because Terraform uses immutable infrastructure.

Answer: B

Explanation:

Oracle Cloud Infrastructure (OCI) Resource Manager uses Terraform to manage infrastructure resources. If you need to add new resources (e.g., a new CIDR block, subnet, and compute instance), you can simply make the necessary changes to the Terraform code defining the stack.

After modifying the Terraform configuration to include the new resources, you can run an Apply job in Resource Manager. The Apply job will provision the new resources in your OCI environment according to the updated Terraform code.

NEW QUESTION # 46

......

The made from DumpExam is designed by way of specialists and is often updated to mirror the present day modifications inside the 1Z0-1109-25 content. The 1Z0-1109-25 recognizes that scholars may also have distinctive learning patterns and options. Consequently, the DumpExam gives PDF format, desktop exercise examination software program, and 1Z0-1109-25 examination questions to assist customers prepare for the Oracle 1Z0-1109-25 examination correctly.
