Pass Guaranteed MB-335 - Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert –Efficient Reliable Test Camp

Our company concentrates on relieving your pressure of preparing the MB-335 exam. Getting the certificate equals to embrace a promising future and good career development. Perhaps you have heard about our MB-335 exam question from your friends or news. Why not has a brave attempt? You will certainly benefit from your wise choice. Now our MB-335 practice materials have won customers' strong support. Our sales volume is increasing every year. The great achievements benefit from our enormous input. First of all, we have done good job on researching the new version of the MB-335 exam question.

Microsoft MB-335 certification exam is designed for individuals who aspire to become experts in the field of supply chain management using Dynamics 365. This credential validates a candidate's ability to configure, customize and implement Dynamics

365 for supply chain management scenarios in various organizations. The Microsoft MB-335 exam is targeted to supply chain experts, functional consultants, and solution architects who have a solid understanding of the supply chain business processes and have experience in deploying Dynamics 365 for supply chain management.

Microsoft MB-335 Exam is a crucial certification for professionals who want to advance their career in Supply Chain Management. MB-335 exam validates the candidate's expertise in Dynamics 365 SCM and enables them to demonstrate their proficiency to potential employers. As Dynamics 365 SCM continues to gain popularity among organizations worldwide, the demand for certified professionals with expertise in the platform will only grow. By passing the MB-335 exam, candidates can establish themselves as experts in the field and increase their career opportunities.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q109-Q114):

NEW QUESTION # 109

A beverage manufacturing company is implementing Dynamics 365 Supply Chain Management.

The company will use the batch balancing functionality to create the beverages.

IngredientA must be configured for a target value of 40 with a minimum of 35 and a maximum of 45. IngredientB must be configured to account for target value variances.

You need to configure the ingredient-based calculations

Which ingredient type should you configure for each requirement? To answer, drag the appropriate ingredient types to the correct requirements. Each ingredient type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

The screenshot shows a configuration window with two main panes. The left pane, titled 'Ingredient types', contains a list of options: 'None', 'Active', 'Compensating', and 'Filler'. The right pane, titled 'Answer Area', contains a table with two rows of requirements. The first row is for 'IngredientA: target value of 40 with a minimum of 35 and a maximum of 45'. The second row is for 'IngredientB: account for target value variances'. To the right of the requirements is a column labeled 'Ingredient type' with two empty input boxes. The Microsoft logo is visible in the bottom right corner of the interface.

Answer:

Explanation:

This screenshot shows the same configuration window as above, but with the correct answers applied. In the 'Ingredient types' list on the left, 'Active' and 'Compensating' are highlighted with green boxes. In the 'Answer Area' table, the 'Ingredient type' column now contains 'Active' for the first requirement and 'Compensating' for the second requirement, both highlighted with red boxes. The Microsoft logo is visible in the bottom right corner.

NEW QUESTION # 110

A customer produces light projection toys for holiday decorations throughout the year. The production process creates the projection toy at the following work cells: stands, main assembly, electric, visuals, and packaging.

Vendors must create templates for each toy they produce each season. They must manage the transfer of templates to the warehouse. Each transfer for each vendor must use the same purchase agreement.

You need to configure the subcontracted transfer activity.

What should you do?

- A. Set the transfer activity Freight by value to Carrier. Ensure that purchase agreements include the vendor ID of the warehouse.
- B. Set the transfer activity Freight by value to Shipper. Ensure that purchase agreements include the vendor ID of the warehouse.
- C. Set the transfer activity Freight by value to Recipient. Ensure that purchase agreements include the vendor ID of the warehouse.
- D. Set the transfer activity Freight by value to Shipper. Ensure that purchase agreements include the vendor ID of the vendor.
- E. Set the transfer activity Freight by value to Recipient. Ensure that purchase agreements include the vendor ID of the vendor.
- F. Set the transfer activity Freight by value to Carrier. Ensure that purchase agreements include the vendor ID of the

vendor.

Answer: E

NEW QUESTION # 111

You are a process engineer evaluating lean vs. Discrete processing. You want to convert a Kanban item. This item has the following Lean setup:

- * The setup uses a lean schedule group with a throughput ratio = 2.
- * The process activity tied to production flow has the following runtime activity times: time = 3 min. per quantity = 1.
- * The work cell capacity has a model type of Throughput and an average throughput quantity of 60 per a capacity period of standard workday (8-hour day).
- * The throughput is 10 per hour.

You need to set up a Discrete operation to mirror the item's production flow activity.
What should you do?

- A. Create a route with a runtime = 1, a process quantity = 10. and the operation's hours/time = 1.
- B. Create a route with a runtime = 10. a process quantity = 6. and the operation's hours/time = 1.
- C. Create a route with a runtime = 1. a process quantity = 1, and the operation's hours/time = 1.
- **D. Create a route with a runtime = 6, a process quantity = 1, and the operation's hours/time = 1.**

Answer: D

NEW QUESTION # 112

A company uses Discrete manufacturing concepts to produce cables. The company's production scheduler uses internal documents to track issues on in-process production orders.

The production scheduler must group all in-process production orders according to issues. The scheduler must be able to easily determine issues with production orders.

You need to implement a method to easily identify production orders with issues.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- ⋮ Add a note to the BOM and list the issue of the production order.
- ⋮ Create an item group for issues.
- ⋮ Add the item group to the production order.
- ⋮ Create a production pool for issues.
- ⋮ Add the production pool to the production order.
- ⋮ Filter the production orders by production pool.

Answer Area

Answer:

Explanation:

Actions

- ⋮ Add a note to the BOM and list the issue of the production order.
- ⋮ Create an item group for issues.
- ⋮ Add the item group to the production order.
- ⋮ Create a production pool for issues.
- ⋮ Add the production pool to the production order.
- ⋮ Filter the production orders by production pool.

Answer Area

- ⋮ Create a production pool for issues.
- ⋮ Add the production pool to the production order.
- ⋮ Filter the production orders by production pool.

NEW QUESTION # 113

A customer produces light projection toys for holiday decorations throughout the year.

You must implement Bills of material (BOMs) for the product lifecycle. The solution must meet the following requirements:

Phase	Requirement
1	Provide a rough estimation of required materials based on a new design.
2	Provide an estimation of required materials based on an existing design.
3	Provide an estimation of required materials, prior to production, based on demand for finished products.
4	Provide a consolidated list of materials used during the manufacturing process.
5	Provide a consolidated list of prices of materials used for production to plan for future price variances.

You need to create a BOM for each phase.

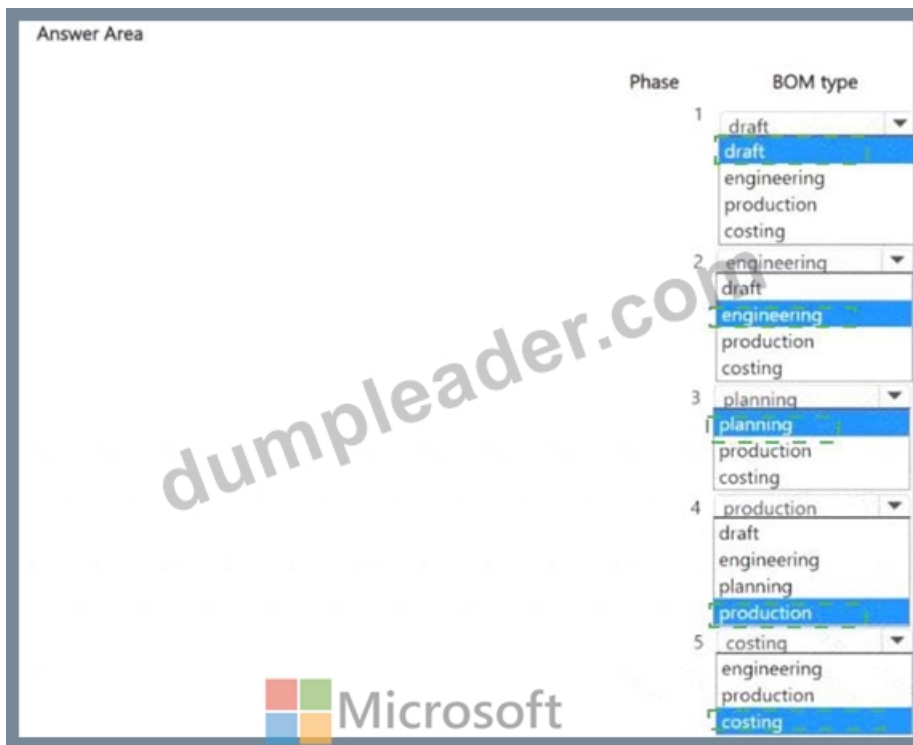

Which BOM types should you use? To answer, select the appropriate configuration options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Phase	BOM type
1	draft draft engineering production costing
2	engineering draft engineering production costing
3	planning planning production costing
4	production draft engineering planning production
5	costing engineering production costing
