Dumps PL-200 Cost | Latest PL-200 Exam Practice

The Microsoft Power Platform Functional Consultant (PL-200) certification is one of the hottest career advancement credentials in the modern Microsoft world. The Microsoft PL-200 certification can help you to demonstrate your expertise and knowledge level. With only one badge of PL-200 Certification, successful candidates can advance their careers and increase their earning potential.

Microsoft Power Platform Functional Consultant Sample Questions (Q120-Q125):

NEW QUESTION # 120

A company uses a Microsoft Power Platform environment

The company plans to implement a Power Apps app. The application must meet the following requirements:

- * Audit all user activity and only retain the audit logs for one year.
- * Annually remove products that were created over a year ago.

You need to configure the automated processes.

What should you configure? To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Configurations

- Table auditing
- Bulk deletion job
- Environment auditing
- Filtered view

Answer Area

Requirement

- Audit log retention
- Product removal

Configuration

- Environment auditing
- Bulk deletion job

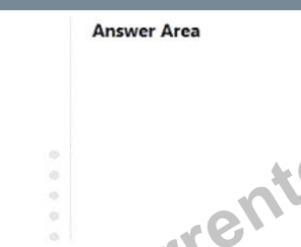

Answer:

Explanation:

Configurations

Configuration

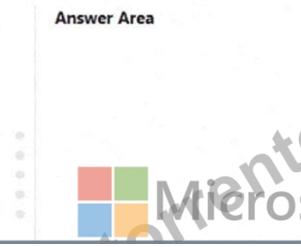

- Environment auditing
- Bulk deletion job

NEW QUESTION # 121

A customer has a support website that includes FAQ pages, knowledge articles, and support content.

You plan to leverage an existing Power Virtual Agents bot to enhance and streamline existing support functionality for the existing support portal.

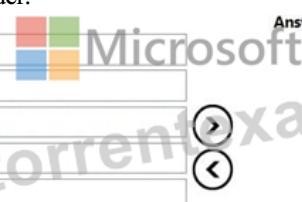

You need to create topics from existing website content. The process must minimize human errors during topic creation.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Hover over the topic and select the Automate icon.
- Capture suggested topics.
- Add selected topics to the chatbot.
- Enable the topics.
- Identify the pre-filled trigger phases.

Answer area

▲
▼

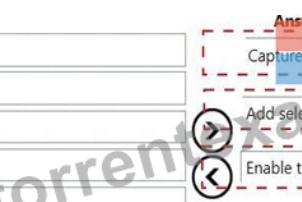

Answer:

Explanation:

Actions

- Hover over the topic and select the Automate icon.
- Capture suggested topics.
- Add selected topics to the chatbot.
- Enable the topics.
- Identify the pre-filled trigger phases.

Answer area

▲
▼

Explanation

* Select Suggest topics on the Topics page to extract content from FAQ/support pages or online files.

* Add the suggested topics to your bot.

* Enable the topics.

NEW QUESTION # 122

You have a business process flow (BPF) that interacts with the Account entity.

You configure a new version for the BPF and add a new stage at the beginning.

You need to identify the impact of the new version on the existing account records.

What is the outcome in each scenario? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Scenario	Action
What happens to existing accounts?	<input type="checkbox"/> Existing accounts show the old BPF. <input type="checkbox"/> Existing accounts show the new BPF. <input type="checkbox"/> Existing accounts only show the new stage.
What happens to new accounts?	<input type="checkbox"/> No BPF is linked to a new account. <input type="checkbox"/> The new BPF shows only the new stage for a new account. <input type="checkbox"/> The new BPF is showing in a new account.

Answer:

Explanation:

Scenario	Action
What happens to existing accounts?	<input checked="" type="checkbox"/> Existing accounts show the old BPF. <input checked="" type="checkbox"/> Existing accounts show the new BPF. <input type="checkbox"/> Existing accounts only show the new stage.
What happens to new accounts?	<input checked="" type="checkbox"/> No BPF is linked to a new account. <input type="checkbox"/> The new BPF shows only the new stage for a new account. <input type="checkbox"/> The new BPF is showing in a new account.

Explanation:

Scenario	Action
What happens to existing accounts?	<input type="checkbox"/> Existing accounts show the old BPF. <input checked="" type="checkbox"/> Existing accounts show the new BPF. <input type="checkbox"/> Existing accounts only show the new stage.
What happens to new accounts?	<input type="checkbox"/> No BPF is linked to a new account. <input type="checkbox"/> The new BPF shows only the new stage for a new account. <input type="checkbox"/> The new BPF is showing in a new account.

Box 1: Existing accounts show the new BPF.

When an entity record is being created and if there are multiple BPFs defined on that entity. The system would do the following:

If the ProcessId field is set to Guid.Empty. The system will skip defaulting the BPF on that instance.

If the ProcessId field is set to specific BPF entity reference. The system will default to the specified BPF.

If the ProcessId field on the record is not set. The system will default the BPF.

Box 2: No BPF is linked to a new account.

Note: A business process flow definition is represented as a custom entity and an instance of a process is stored as a record within

that entity. Each record is associated with a data record (such as an Account, Contact, Lead, or Opportunity) and in case of cross-entity processes, with a data record for each participating entity.
