Microsoft Power Automate RPA Developer Sample Questions (Q18-Q23):

NEW QUESTION # 18

A company has a customer relationship management (CRM) app installed on a machine.

Each month an employee signs into the machine by using their Azure Active Directory (Azure AD) account to generate a financial statement for each account in a list of accounts. The list of accounts is stored in Microsoft Dataverse. The employee must send each customer their statements by using Office 365 Outlook.

You need to develop a solution to automate the task.

Which components should you use? To answer, select the appropriate options in the answer area.

Answer Area	
Requirement	Action
Trigger the solution using a schedule.	Create a cloud flow that uses a manual trigger. Create a cloud flow that uses a schedule trigger. Create a desktop flow and use Windows Task Scheduler to trigger it. Create a desktop flow and trigger it manually.
Access the list of accounts.	Use the Relate rows action in a cloud flow. Use the List rows action in a cloud flow. Use the List rows present in a table action in a cloud flow. Use the Get a row action in a cloud flow.
Launch the CRM app.	Use the Start service action in a desktop flow. Use the Run application action in a desktop flow. Use the Run a flow built with Power Automate for desktop action in a cloud flow. Use the Run desktop flow action in a desktop flow.
Generate a statement for each account.	Use the Apply to each action in a cloud flow. Use the For each action in a desktop flow. Use the Next loop action in a desktop flow. Use the Go to action in a desktop flow.
Send an email with an attachment.	Use the Send email action in a desktop flow. Use the Send an email action in a cloud flow. Use the Send Exchange email message action in a desktop flow. Use the Send email message through Outlook action in a desktop flow.

Answer:

Explanation:

Send an email with an attachment.	Use the Send email action in a desktop flow. Use the Send an email action in a cloud flow. Use the Send Exchange email message action in a desktop flow. Use the Send email message through Outlook action in a desktop flow.

Explanation

Requirement	Action
Trigger the solution using a schedule.	Create a cloud flow that uses a manual trigger. <u>Create a cloud flow that uses a schedule trigger.</u> Create a desktop flow and use Windows Task Scheduler to trigger it. Create a desktop flow and trigger it manually.
Access the list of accounts.	Use the Relate rows action in a cloud flow. Use the List rows action in a cloud flow. Use the List rows present in a table action in a cloud flow. <u>Use the Get a row action in a cloud flow.</u>
Launch the CRM app.	Use the Start service action in a desktop flow. <u>Use the Run application action in a desktop flow.</u> <u>Use the Run a flow built with Power Automate for desktop action in a cloud flow.</u> Use the Run desktop flow action in a desktop flow.
Generate a statement for each account.	Use the Apply to each action in a cloud flow. <u>Use the For each action in a desktop flow.</u> Use the Next loop action in a desktop flow. Use the Go to action in a desktop flow.
Send an email with an attachment.	<u>Use the Send email action in a desktop flow.</u> Use the Send an email action in a cloud flow. Use the Send Exchange email message action in a desktop flow.

NEW QUESTION # 19

You design an attended Power Automate desktop flow that updates orders in an older enterprise resource planning (ERP) system. A warehouse supervisor enters the order status and fulfillment date when an order is fulfilled.

The flow must be installed on a desktop computer in the warehouse and triggered by using a shortcut.

You need to configure the flow to deploy and run.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Copy the environment URL.	
Dismiss the External invocation warning message.	
Create a run URL.	
Enter the order status and fulfillment date values when prompted.	
Create the desktop shortcut for the flow.	
Launch the flow using the desktop shortcut.	

Answer:

Explanation:

Actions	Answer area
Copy the environment URL.	Create a run URL.
Dismiss the External invocation warning message.	Enter the order status and fulfillment date values when prompted.
Create a run URL.	Create the desktop shortcut for the flow.
Enter the order status and fulfillment date values when prompted.	Launch the flow using the desktop shortcut.
Create the desktop shortcut for the flow.	
Launch the flow using the desktop shortcut.	

Explanation:

Actions	Answer area
Copy the environment URL.	1 Create a run URL.
Dismiss the External invocation warning message.	2 Enter the order status and fulfillment date values when prompted.
	3 Create the desktop shortcut for the flow.
	4 Launch the flow using the desktop shortcut.

NEW QUESTION # 20

You develop automation solutions for a company. The company does not permit changes to a deployed solution in user acceptance testing (UAT) environments.

You need to package the solutions.

Which type of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more the once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solution types	Requirement	Solution type
Unmanaged	Deploy a solution to a source control system.	
Managed	Deploy a solution to a user acceptance testing (UAT) environment.	
	Deploy a solution to a production environment.	
	Deploy a solution to another development environment.	

Answer:

Explanation:

Solution types	Requirement	Solution type
Unmanaged	Deploy a solution to a source control system.	
Managed	Deploy a solution to a user acceptance testing (UAT) environment.	
	Deploy a solution to a production environment.	
	Deploy a solution to another development environment.	

Diagram illustrating the correct solution types for each requirement:

- Unmanaged solution type is selected for:
 - Deploy a solution to a source control system.
 - Deploy a solution to another development environment.
- Managed solution type is selected for:
 - Deploy a solution to a user acceptance testing (UAT) environment.
 - Deploy a solution to a production environment.

NEW QUESTION # 21

You plan to use a cloud flow.

The flow must be contained within a solution.

You need to add the cloud flow to a solution.

Solution: Create an instant cloud flow outside of a solution. Add the cloud flow into a new unmanaged solution. Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 22

You need to create the custom connector that will be used to retrieve member information.

Which authentication option should you use?

- A. Windows
- B. Basic
- C. No authentication

- D. API key
- E. OAuth2.0

Answer: E

NEW QUESTION # 23
