## Pegasystems Certified Pega Decisioning Consultant 25 Sample Questions (Q112-Q117):

### NEW QUESTION # 112

U+ Bank uses a scorecard rule in a decision strategy to compute the mortgage limit for a customer. U+ Bank updated their scorecard to include a new property in the calculation: customer income.

What changes do you need to make in the decision strategy for the updated scorecard to take effect?

- A. The score calculation is independent of the strategy and no change is required.
- B. Remap the scorecard property in the decision strategy for the change to take effect.
- C. A new proposition filter needs to be configured in the strategy to filter on customer income.
- D. Add a new Group By component for the mortgage limit calculation.

**Answer: A**

Explanation:

The score calculation is independent of the strategy and no change is required. When you use a scorecard component in a decision strategy, you only need to specify the name of the scorecard rule and the output property that will store the score value. The scorecard rule itself defines how the score is calculated based on the input properties and factors. Therefore, if you update the scorecard rule to include a new property in the calculation, you do not need to make any changes in the decision strategy for the updated scorecard to take effect. ### NEW QUESTION # 113

MyCo, a mobile company, uses Pega Customer Decision Hub to display offers to customers on its website.

The company wants to present more relevant offers to customers based on customer behavior. The following diagram is the action hierarchy in the Next-Best-Action Designer.

The company wants to present offers from both the groups and arbitrate across the two groups to select the best offer based on customer behavior.

The company wants to present offers from both the groups and arbitrate across the two groups to select the best offer based on customer behavior.

As a decisioning architect, what do you configure to select the best offer from both groups based on customer behavior?

- A. Create an adaptive model rule at the Issue-level.
- B. Enable a business value in the prioritization formula.
- C. Create a prioritization decision strategy at the Group-level.
- **D. Ensure that the propensity is enabled in Arbitration tab.**

**Answer: D**

Explanation:

To select the best offer from both groups based on customer behavior, you need to ensure that the propensity is enabled in Arbitration tab. Propensity is a measure of how likely a customer is to accept an offer, based on their past behavior and profile. By enabling propensity in Arbitration tab, you can compare the propensities of different offers across groups and select the one with the highest propensity as the next best action. #### NEW QUESTION # 114

As a decisioning architect, you advise the board on the business issues for which they must use the Next-Best- Action strategy. Which three business issues do you recommend? (Choose Three)

- A. Resource Planning
- B. Accounting
- **C. Collections**
- **D. Retention**
- **E. Service**

**Answer: C,D,E**

Explanation:

The Next-Best-Action strategy is a customer-centric approach that aims to deliver the most relevant and valuable proposition for each customer at any given moment. You can use the Next-Best-Action strategy to address various business issues that involve customer interactions, such as service, retention, and collections.

Service is the process of providing assistance and support to customers who have questions or problems.

Retention is the process of preventing customers from leaving or switching to competitors. Collections is the process of recovering unpaid debts from customers who are delinquent or defaulting on their obligations.

These are all business issues that can benefit from using the Next-Best-Action strategy. Verified References:

#### NEW QUESTION # 115

A financial services company has implemented always-on outbound campaigns for three credit card offers:

Standard card, Rewards card, and Rewards Plus card. The marketing team observes that customers who are qualified for multiple actions receive different numbers of offers, depending on the configuration of the volume constraint mode. To optimize customer engagement, the system administrator must choose between constraint modes.

Which volume constraint mode ensures that customers receive all actions for which they qualify, provided the actions do not reach volume limits?

- **A. Return any action that does not exceed constraint**
- B. Individually for each action
- C. As a group for the context (output all actions)
- D. Sequential action delivery mode

**Answer: A**

### NEW QUESTION # 116

A financial institution's NBA team discovers that they need to modify their risk assessment strategy and edit a scorecard used for loan approvals. The team lead reviews the available options in 1:1 Operations Manager to determine the most appropriate approach to implementing these changes.

Which approach should the team lead use to implement these strategy and scorecard modifications?

- A. Submit an Other request type in the Customer Decision Hub portal
- B. Submit an Update existing action request in 1:1 Operations Manager
- C. Submit a Create new action request in 1:1 Operations Manager
- D. Create a new revision in 1:1 Operations Manager, followed by a new change request in the Customer Decision Hub portal

**Answer: A**
