100% Pass 2025 Professional FCP_FGT_AD-7.6: Actual FCP - FortiGate 7.6 Administrator Tests

2025 Latest Dumpleader FCP_FGT_AD-7.6 PDF Dumps and FCP_FGT_AD-7.6 Exam Engine Free Share: https://drive.google.com/open?id=1kBsRinuXv_YMZlP6wQ9CmDYRrH8uUyud

Fortinet certification exams become more and more popular. The certification exams are widely recognized by international community, so increasing numbers of people choose to take Fortinet certification test. Among Fortinet certification exams, FCP_FGT_AD-7.6 is one of the most important exams. So, in order to pass FCP_FGT_AD-7.6 test successfully, how do you going to prepare for your exam? Will you choose to study hard examinations-related knowledge, or choose to use high efficient study materials?

Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	• Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.
Topic 2	• Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.
Topic 3	• VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.
Topic 4	• Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.

Topic 5	• Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.

Fortinet - Pass-Sure Actual FCP_FGT_AD-7.6 Tests

The Fortinet FCP_FGT_AD-7.6 practice material of Dumpleader came into existence after consultation with many professionals and getting their positive reviews. The majority of aspirants are office professionals, and we recognize that you don't have enough time to prepare for the Fortinet FCP_FGT_AD-7.6 Certification Exam. As a result, several versions of the FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) exam questions will be beneficial to you.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q30-Q35):

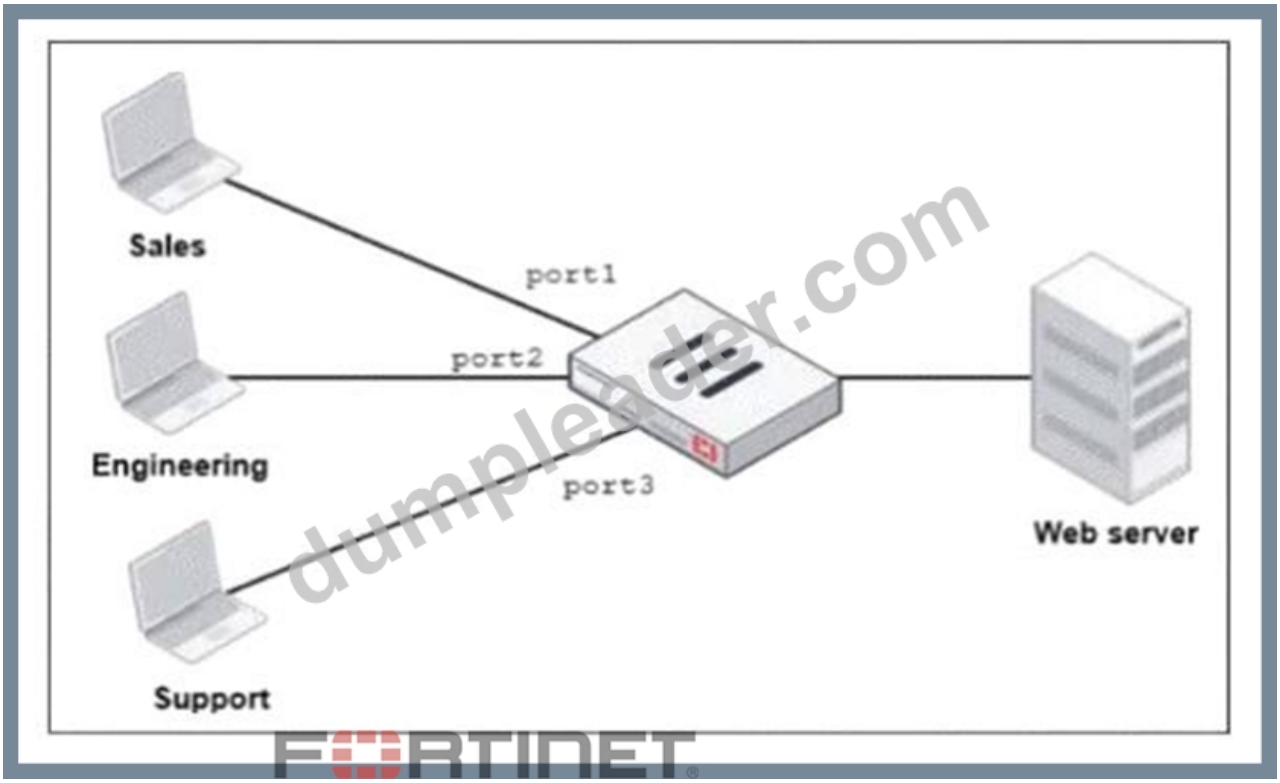
NEW QUESTION # 30
An administrator wanted to configure an IPS sensor to block traffic that triggers a signature set number of times during a specific time period.
How can the administrator achieve the objective?

- A. Use IPS packet logging option with periodical filter option.
- B. Use IPS filter, rate-mode periodical option.
- C. Use IPS group signatures, set rate-mode 60.
- D. Use IPS filter, rate-mode periodical option.

Answer: B

Explanation:
The IPS filter with the rate-mode set to "periodical" allows the administrator to block traffic that triggers a signature a specified number of times within a defined time period, meeting the requirement.

NEW QUESTION # 31
Refer to the exhibit.



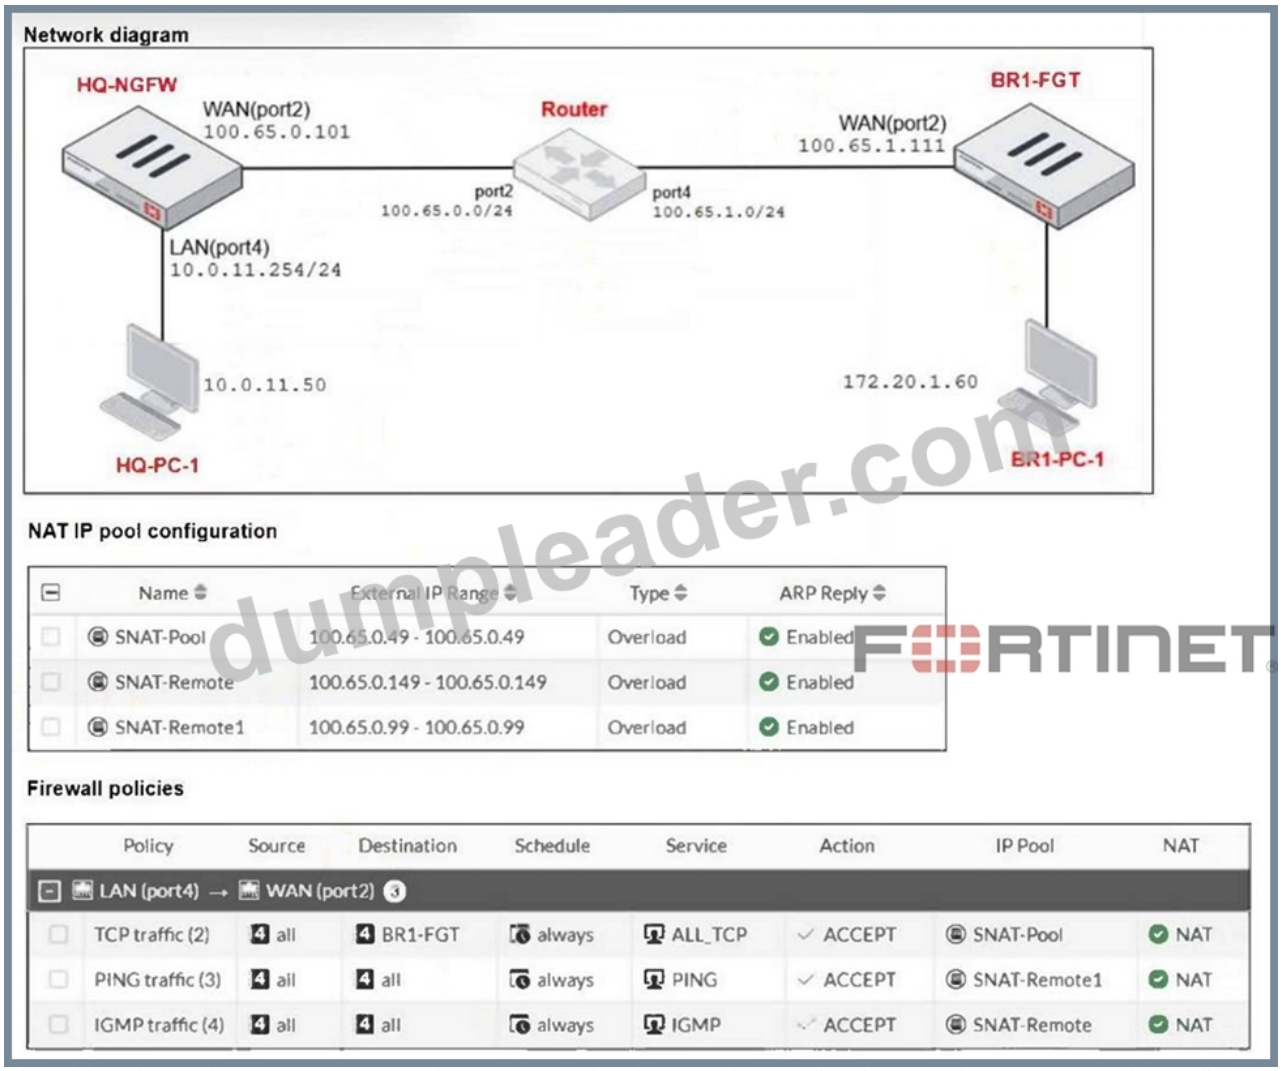
FortiGate has two separate firewall policies for Sales and Engineering to access the same web server with the same security profiles. Which action must the administrator perform to consolidate the two policies into one?

- A. Select port1 and port2 subnets in a single firewall policy.
- B. Create an Aggregate interface that includes port1 and port2 to create a single firewall policy.
- C. Replace port1 and port2 with the any interface in a single firewall policy.
- D. Enable Multiple Interface Policies to select port1 and port2 in the same firewall policy.

Answer: D

Explanation:
Enabling Multiple Interface Policies allows you to select multiple interfaces (like port1 and port2) in a single firewall policy, consolidating access rules for both Sales and Engineering to the web server.

NEW QUESTION # 32
Refer to the exhibits.



The exhibits show a diagram of a FortiGate device connected to the network, as well as the IP pool configuration and firewall policy objects.
The WAN (port2) interface has the IP address 100.65.0.101/24.
The LAN (port4) interface has the IP address 10.0.11.254/24.
Which IP address will be used to source NAT (SNAT) the traffic, if the user on HQ-PC-1 (10.0.11.50) pings the IP address of BR-FGT (100.65.1.111)

- A. 100.65.0.149
- B. 100.65.0.99
- C. 100.65.0.49
- D. 100.65.0.101

Answer: B

Explanation:
The ping traffic policy uses the IP pool named SNAT-Remote1, which has the external IP range 100.65.0.99. Therefore, traffic matching this policy (ping from HQ-PC-1 to BR1-FGT) will use 100.65.0.99 for source NAT.

NEW QUESTION # 33
Refer to the exhibit.

An administrator has configured an Application Overrides for the ABC.Com application signature and set the Action to Allow. This application control profile is then applied to a firewall policy that is scanning all outbound traffic. Logging is enabled in the firewall policy. To test the configuration, the administrator accessed the ABC.Com web site several times.
Why are there no logs generated under security logs for ABC.Com?

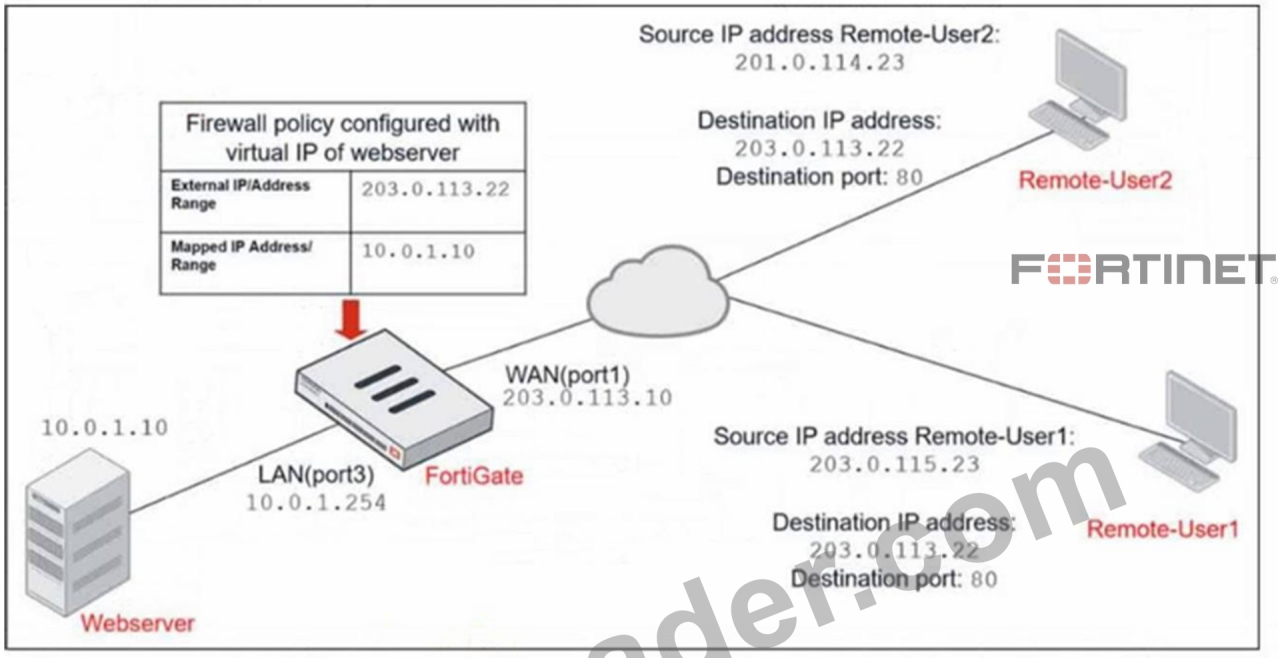
- A. The ABC.Com is hitting the category Excessive-Bandwidth.
- B. The ABC.Com is configured under application profile, which must be configured as a web filter profile.
- C. The ABC.Com Type is set as Application instead of Filter.
- D. The ABC.Com Action is set to Allow.

Answer: D

Explanation:
When the action is set to Allow in an application override, traffic matching this override is allowed without generating security logs because it bypasses deeper inspection and blocking.

NEW QUESTION # 34
Refer to the exhibits.

Network diagram



Firewall address object

Firewall policies

ID	Name	Source	Destination	Schedule	Service	Action
WAN (port1) → LAN (port3) 2						
4	Deny	Deny_IP	all	always	ALL	DENY
3	Allow_access	all	Webserver	always	ALL	ACCEPT

The exhibits show a diagram of a FortiGate device connected to the network, and the firewall configuration.
An administrator created a Deny policy with default settings to deny Webserver access for Remote-User2.
The policy should work such that Remote-User1 must be able to access the Webserver while preventing Remote-User2 from accessing the Webserver.
Which additional configuration can the administrator add to a deny firewall policy, beyond the default behavior, to block Remote-User2 from accessing the Webserver?

- A. Set the Destination address as Deny_IP in the Allow_access policy.
- B. Disable match-vip in the Allow_access policy
- C. Set the Destination address as Webserver in the Deny policy.
- D. Configure a One-to-One IP Pool object in a new policy.

Answer: C

Explanation:
To block Remote-User2's access to the Webserver, the deny policy must explicitly specify the Webserver as the destination address; otherwise, it denies traffic to all destinations, which is not the desired behavior.

NEW QUESTION # 35

.....

The Dumpleader is currently in use by a lot of students and they have rated it as one of the best study materials for the preparation of FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) test. The customers are satisfied because the Dumpleader comes with free demos and up to 1 year of free updates. We have a 24/7 support team which means the user can get help anytime if they face any problem. Our support team will always help the customers whenever they face issues. Customers can start using the FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) instantly after purchasing it from us. Buy It Now and Take The First Step Towards Success!
