Topic 15	<ul style="list-style-type: none"><li>Control Flow: Control Flow activities, workflow types, and Flowchart layouts are discussed here, along with the usage of IF, Flow Decision, Switch activities, While, Do While, and For Each.</li></ul>

## UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q94-Q99):

### NEW QUESTION # 94

Which of the following best describes the differences between an "as is" process map and a "to be" process map in the context of RPA (Robotic Process Automation)?

- A. An "as is" process map is used for data analysis, while a "to be" process map is used for process optimization
- B. An "as is" process map shows the steps in a process, while a "to be" process map shows the inputs and outputs for each step
- C. An "as is" process map is used for manual processes, while a "to be" process map is used for automated processes
- **D. An "as is" process map shows the current state of a process, while a "to be" process map shows the desired future state of the process**

**Answer: D**

Explanation:

The differences between an "as is" process map and a "to be" process map in the context of RPA are that an "as is" process map shows the current state of a process, while a "to be" process map shows the desired future state of the process after automation has been implemented. This distinction is fundamental as it guides the transformation from manual to automated processes by highlighting necessary changes and enhancements.

UiPath Documentation on Process Mapping at <https://docs.uipath.com/>.

#### NEW QUESTION # 95

Which of the below are deployment models that UiPath offers?

- **A. UiPath Automation Cloud, UiPath Automation Suite, Standalone**
- B. UiPath Automation Cloud, UiPath Modern Cloud, Standalone
- C. UiPath Automation Platform, UiPath Automation Suite, Standalone
- D. UiPath Automation Cloud, UiPath Automation Suite, Individual

**Answer: A**

Explanation:

The deployment models that UiPath offers include UiPath Automation Cloud, UiPath Automation Suite, and Standalone. These options provide flexibility in deployment based on organizational needs, whether cloud-based, on-premises, or a standalone solution. References: UiPath Documentation on Deployment Models at <https://docs.uipath.com/>.

#### NEW QUESTION # 96

What is the difference between Data Labeling and Document Manager?

- **A. Data Labeling is used to annotate documents that have been previously uploaded into Document Manager**
- B. They are the same product
- C. Data Labeling can only be used to annotate text data for the Custom Named Entity Recognition model
- D. Data Labeling is used to annotate text data, while Document Manager is used to annotate documents

**Answer: A**

Explanation:

The difference between Data Labeling and Document Manager is that Data Labeling is used to annotate documents that have been previously uploaded into Document Manager. While Document Manager serves as a repository and management system for documents, Data Labeling involves the process of marking these documents to train machine learning models for better data extraction. UiPath Documentation on Data Labeling and Document Manager at <https://docs.uipath.com/>.

#### NEW QUESTION # 97

What are 2 key features of UiPath Automation Hub?

- **A. Pipeline Management, Process & Documentation Bank"**
- B. Integration with Task Capture, Process Graph Visualization
- C. Process & Documentation Bank, App creation for process discovery
- D. Process Identification, Command Line Interface

**Answer: A**

Explanation:

Two key features of UiPath Automation Hub are Pipeline Management and Process & Documentation Bank. Pipeline Management helps in managing and prioritizing automation ideas throughout their lifecycle, while Process & Documentation Bank serves as a repository for storing and accessing process documentation and related content, facilitating better organization and accessibility. Reference: UiPath Documentation on Automation Hub at <https://docs.uipath.com/>.

#### NEW QUESTION # 98

What should be done when the process documentation is missing?

- A. Create a checklist to ensure the documentation is accurate and consistent
- B. Increase the time dedicated for process development
- C. Look at every possible impact that might be generated by accepting the change
- D. Identify the right SMEs and decision makers in order to gather the necessary information

**Answer: D**

Explanation:

When the process documentation is missing, it is crucial to identify the right Subject Matter Experts (SMEs) and decision-makers in order to gather the necessary information. This approach ensures that accurate, comprehensive, and relevant data about the process are collected to create or update the missing documentation effectively. References: UiPath Documentation on Process Documentation at <https://docs.uipath.com/>.

#### NEW QUESTION # 99

.....

It is similar to the UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) desktop-based exam simulation software, but it requires an active internet. No extra plugins or software installations are required to take the UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) web-based practice test.
