If you are still struggling to prepare for passing UiPath-SAIv1 certification exam, at this moment CramPDF can help you solve problem. CramPDF can provide you training materials with good quality to help you pass the exam, then you will become a good UiPath UiPath-SAIv1 certification member. If you have decided to upgrade yourself by passing UiPath Certification UiPath-SAIv1 Exam, then choosing CramPDF is not wrong. Our CramPDF promise you that you can pass your first time to participate in the UiPath certification UiPath-SAIv1 exam and get UiPath UiPath-SAIv1 certification to enhance and change yourself.

Our product boosts many advantages and it is worthy for you to buy it. You can have a free download and tryout of our UiPath-SAIv1 Exam torrents before purchasing. After you purchase our product you can download our UiPath-SAIv1 study materials immediately. We will send our product by mails in 5-10 minutes. We provide free update and the discounts for the old client. If you have any doubts or questions you can contact us by mails or the online customer service personnel and we will solve your problem as quickly as we can.

## Study UiPath-SAIv1 Material - Valid UiPath-SAIv1 Exam Objectives

Our UiPath-SAIv1 exam materials are famous among candidates. Once they need to prepare an exam, our UiPath-SAIv1 study materials are their first choice. As you know, it is troublesome to get the UiPath-SAIv1 certificate. Now, you are fortunate enough to come across our UiPath-SAIv1 Exam Guide. We have free demos on the website for our customers to download if you still doubt our products, and you can check whether it is the right one for you before purchase as well.

## UiPath Certified Professional Specialized AI Professional v1.0 Sample Questions (Q151-Q156):

### NEW QUESTION # 151

What is the relationship between AI Center and UiPath Document Understanding?

- A. Document Understanding is the infrastructure on which AI Center digitization runs.
- B. Document Understanding is the infrastructure on which AI Center machine learning models run.
- C. **AI Center is the infrastructure on top of which UiPath Document Understanding machine learning models run.**
- D. AI Center is the infrastructure on top of which UiPath Document Understanding digitization runs.

**Answer: C**

### NEW QUESTION # 152

What function in the train.py file is responsible for persisting the trained model?

- A. train(self, trainmg\_directory)
- B. evaluate(self, evaluation\_directory)
- C. \_\_init\_\_(self)
- D. **save(self)**

**Answer: D**

Explanation:

In the context of a machine learning pipeline, specifically within the train.py file in UiPath AI models, the function responsible for persisting the trained model is typically named save(self). This function is invoked after the model has been trained, and it ensures that the model's state, weights, and configurations are saved to disk or another persistent storage medium. The saved model can then be reused for inference or further fine-tuning in future executions.

### NEW QUESTION # 153

Which of the following file types are supported for the DocumentPath property in the Classify Document Scope activity?

- A. .png, .gif, .jpe, .tiff
- B. .bmp, .pdf, .jpe, .psd
- C. .jpe, .eps, .jpg, .tiff
- D. .pdf, .jpeg, .raw, tif

**Answer: A**

### NEW QUESTION # 154

Why is the Shuffle training mode important in the "Explore" phase while working with UiPath Communications Mining?

- A. Because it helps create a balanced model by focusing on outlier labels with sufficient training examples but low confidence.
- B. Because it creates a new model version with shuffled labels and general fields and lets the user explore to understand the state of the model
- C. Because it creates a high precision model, focusing on labels with low precision and a low number of examples.
- D. **Because it creates a balanced model free from labelling bias by introducing random variation into the training data.**

**Answer: D**

Explanation:

The Shuffle training mode in the "Explore" phase of UiPath Communications Mining helps to introduce randomness into the training data. This prevents labeling bias by ensuring that the model does not overly focus on certain labels or examples, leading to a more balanced and generalized model. By shuffling the data, the model is exposed to a diverse range of examples, which enhances its ability to make accurate predictions across different labels and datasets.

### NEW QUESTION # 155

Which is a high-level view of the tabs within an AI Center project?

- A. Datasets, Data Labeling, ML Packages, Pipelines, and ML Skills.
- B. Dashboard, Datasets, ML Packages, ML Training, ML Evaluation, and ML Logs.
- C. Datasets, Data Labeling, ML Packages, ML Training, ML Evaluation, ML Skills, and ML Logs.
- D. **Dashboard, Datasets, Data Labeling, ML Packages, Pipelines, ML Skills, and ML Logs.**

**Answer: D**

#### Explanation:

A high-level view of the tabs within an AI Center project is as follows:

- \* Dashboard: This tab provides an overview of the project's status, such as the number of datasets, pipelines, packages, skills, and logs, as well as the AI Units consumption and quota.
- \* Datasets: This tab enables you to upload, view, and manage the datasets that are used for training and evaluating the ML models within the project. A dataset is a folder of storage containing arbitrary files and sub-folders1.
- \* Data Labeling: This tab enables you to upload raw data, annotate text data in the labeling tool (for classification or entity recognition), and use the labeled data to train ML models. It is also used by the human reviewer to re-label incorrect predictions as part of the feedback process2.
- \* ML Packages: This tab enables you to upload, view, and manage the ML packages and package versions within the project. An ML package is a group of package versions of the same package type, and a package version is a trained model that can be deployed to a skill3.
- \* Pipelines: This tab enables you to create, view, and manage the pipelines and pipeline runs within the project. A pipeline is a description of an ML workflow, including the functions and their order of execution, and a pipeline run is an execution of a pipeline based on code provided by the user4.
- \* ML Skills: This tab enables you to deploy, view, and manage the ML skills within the project. An ML skill is a live deployment of a package version, which can be consumed by an RPA workflow using an ML skill activity in UiPath Studio5.
- \* ML Logs: This tab enables you to view and filter the logs related to the project, such as the events, messages, and errors that occurred during the pipeline runs, skill deployments, and skill executions6.
