The FCP_FMG_AD-7.4 exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the exam thesis focus in the development trend, and summarize all kind of difficulties you will face, highlight the user review must master the knowledge content. And unlike other teaching platform, the FCP - FortiManager 7.4 Administrator study question is outlined the main content of the calendar year examination questions didn't show in front of the user in the form of a long time, but as far as possible with extremely concise prominent text of FCP_FMG_AD-7.4 Test Guide is accurate incisive expression of the proposition of this year's forecast trend, and through the simulation of topic design meticulously.

Fortinet FCP_FMG_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).
Topic 2	Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.
Topic 3	Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.
Topic 4	Troubleshooting: This section covers how to familiarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.
Topic 5	Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.

Reliable FCP_FMG_AD-7.4 Test Blueprint 100% Pass | High-quality Fortinet Actual FCP - FortiManager 7.4 Administrator Test Pass for sure

You still can pass the exam with our help. The key point is that you are serious on our Fortinet FCP_FMG_AD-7.4 exam questions and not just kidding. Our FCP_FMG_AD-7.4 practice engine can offer you the most professional guidance, which is helpful for your gaining the certificate. And our FCP - FortiManager 7.4 Administrator FCP_FMG_AD-7.4 learning guide contains the most useful content and keypoints which will come up in the real exam.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q10-Q15):

NEW QUESTION # 10

An administrator enabled workspace mode and now wants to delete an address object that is currently referenced in a firewall policy. Which two results can the administrator expect? (Choose two.)

- A. FortiManager will temporarily change the status of the referenced firewall policy to disabled.
- B. FortiManager will not allow the administrator to delete a referenced address object until they lock the ADOM.
- C. FortiManager will disable the status of the address object until the changes are installed.
- D. FortiManager will replace the deleted address object with the none address object in the referenced firewall policy.

Answer: B,D

Explanation:

When operating in workspace mode on FortiManager 7.4, the administrator must understand how object references and deletions work:

* Option C- "FortiManager will not allow the administrator to delete a referenced address object until they lock the ADOM": In workspace mode, all changes are managed within an Administrative Domain (ADOM) scope. When an object (like an address object) is referenced in a policy, FortiManager prevents its deletion to maintain configuration integrity. The ADOM must be locked by the administrator to make changes to any referenced objects. This locking mechanism ensures that no unintended deletions or changes occur that could disrupt the policies or configuration.

* FortiManager Reference: "In workspace mode, changes to objects or policies require the ADOM to be locked. If an object is referenced, you must lock the ADOM before deleting or modifying the object." (FortiManager 7.4 Administration Guide, Section on Workspace Mode and ADOM Management)

* Option D- "FortiManager will replace the deleted address object with the none address object in the referenced firewall policy": If the administrator attempts to delete an address object that is currently referenced by a firewall policy, FortiManager will replace the deleted object with the 'none' address object. This is done to maintain the policy structure and avoid policy corruption due to a

missing reference. This behavior ensures that the firewall policy remains syntactically correct, even though the specific address object is no longer in use.

* FortiManager Reference: "When a referenced object is deleted, FortiManager will replace it with a 'none' object in the policy. This behavior is to ensure the integrity and continuity of the policy configurations." (FortiManager 7.4 Administration Guide, Object Management and Policy Handling in Workspace Mode)

NEW QUESTION # 11

Refer to the exhibit.

FortiManager script

Create New Script

Script Name: Routing

Comments:

Type: CLI Script

Run script on: Device Database

Script details:

```
1 config router prefix-list
2 edit public
3 config rule
4 edit 1
5 set prefix 0.0.0.0/0
6 set action permit
7 next
8 edit 2
9 set prefix 8.8.8.8/32
10 set action deny
11 end
```

Revert All Changes

Advanced Device Filters >

Which two results occur if the script is run using the Device Database option? (Choose two.)

- A. The device Config Status is tagged as Modified.
- B. The script history shows successful installation of the script on the remote FortiGate device.
- C. You must install these changes on a managed device using the Install Wizard.
- D. The successful execution of a script on the Device Database creates a new revision history.

Answer: A,C

NEW QUESTION # 12

Push updates are failing on a FortiGate device that is located behind a NAT device.

Which two settings should the administrator check? (Choose two.)

- A. That the NAT device IP address and correct ports are configured on FortiManager
- B. That the virtual IP address and correct ports are set on the NAT device
- C. That the external IP address on the NAT device is set to DHCP and configured with the virtual IP
- D. That the override server IP address is set on FortiManager and the NAT device

Answer: A,B

Explanation:

FMG should contact NAT ip address and NAT device should have VIP correctly configured.

NEW QUESTION # 13

An administrator has assigned a global policy package to a new ADOM called ADOM1.

What will happen if the administrator tries to create a new policy package in ADOM1?

- A. When a new policy package is created, the administrator must import the global policy package to ADOM1.
- B. When creating a new policy package, the administrator can select the option to assign the global policy package to the new policy package.
- C. When a new policy package is created, the administrator must assign the global policy package from the global ADOM.
- D. When the new policy package is created, FortiManager automatically assigns the global policy package to the new policy package.

Answer: D

NEW QUESTION # 14

Refer to the exhibit. Given the configuration shown in the exhibit, what are two results from this configuration? (Choose two.)

```
FortiManager # config system global
(global)# set workspace-mode normal
(global)# end
FortiManager #
```

- A. Unlocking an ADOM will install configuration changes automatically on managed devices.
- B. Ungraceful closed sessions will keep the ADOM in a locked state until the administrator session times out.
- C. Unlocking an ADOM will submit configuration changes automatically to the approval administrator.
- D. The same administrator can lock more than one ADOM at the same time.

Answer: B,D

NEW QUESTION # 15

.....

The FCP - FortiManager 7.4 Administrator (FCP_FMG_AD-7.4) study material of Exam4Free is available in three different and easy-to-access formats. The first one is printable and portable FCP - FortiManager 7.4 Administrator (FCP_FMG_AD-7.4) PDF format. With the PDF version, you can access the collection of actual FCP - FortiManager 7.4 Administrator (FCP_FMG_AD-7.4) questions with your smart devices like smartphones, tablets, and laptops. You can even print the study material and save it in your smart devices to study anywhere and pass the FCP - FortiManager 7.4 Administrator (FCP_FMG_AD-7.4) certification exam.
