

100% Pass 2025 Workday Workday-Prism-Analytics Latest Exam Study Solutions

2025 Latest ActualCollection Workday-Prism-Analytics PDF Dumps and Workday-Prism-Analytics Exam Engine Free Share:
<https://drive.google.com/open?id=1VIDwEJNNKkTaybecDkdUAYxZZDpepMZK>

Since the content of the examination is also updating daily, you will need real and latest Workday Workday-Prism-Analytics Dumps to prepare successfully for the Workday-Prism-Analytics Certification Exam in a short time. People who don't study from updated Workday-Prism-Analytics questions fail the examination and loss time and money.

If you are determined to purchase our Workday-Prism-Analytics latest dumps materials, please prepare a credit card for payment. For most countries we just support credit card. You can click the PDF version or Soft version or the package of Workday Workday-Prism-Analytics latest dumps, add to cart, then you enter your email address, discount (if have) and click payment, then page transfers to credit card payment. After payment our system will send you an email including downloading link of Workday-Prism-Analytics Latest Dumps, account & password, you can click the link and download soon.

Workday Workday-Prism-Analytics Exam Question, Valid Workday-Prism-Analytics Mock Test

Candidates all around the globe use their full potential only to get Workday Workday-Prism-Analytics certification. Once the

candidate is a Workday certified, he gets multiple good career opportunities in the Workday sector. To pass the Workday-Prism-Analytics Certification Exam a candidate needs to be updated and reliable Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) prep material. There is a ton of Workday-Prism-Analytics prep material available on the internet.

Workday Pro Prism Analytics Exam Sample Questions (Q38-Q43):

NEW QUESTION # 38

The final derived dataset in a Prism pipeline is complete and ready to publish. What should be done prior to publishing?

- A. Create a table without the Enable for Analysis checkbox selected.
- B. Add a Group By stage to the final derived dataset to add summary calculations.
- **C. Edit the Dataset API Name to reflect in the name of the Prism data source.**
- D. Create a derived dataset with the PDS suffix.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, before publishing a derived dataset as a Prism data source (PDS), it's important to ensure that the dataset is properly configured for downstream use. According to the official Workday Prism Analytics study path documents, one key step to take prior to publishing is to edit the Dataset API Name to reflect in the name of the Prism data source (option D). The Dataset API Name determines the name of the published Prism data source, which is used in reporting, discovery boards, and integrations. Setting a meaningful and descriptive API name (e.g., "Expense_Reports_by_Location") ensures that the data source is easily identifiable and aligns with naming conventions, improving usability and manageability in the Workday ecosystem. This step is a best practice to avoid confusion and ensure clarity for report writers and analysts.

The other options are not required or relevant:

* A. Add a Group By stage to the final derived dataset to add summary calculations: Adding a Group By stage is not mandatory unless the use case specifically requires summarizations, which is not indicated here.

* B. Create a table without the Enable for Analysis checkbox selected: Creating a new table is unnecessary, as the dataset is already complete, and the "Enable for Analysis" checkbox is relevant for real-time updates, not a requirement for publishing a derived dataset.

* C. Create a derived dataset with the PDS suffix: Creating a new dataset is not needed, as the final derived dataset is already prepared, and adding a "PDS" suffix is not a required step for publishing.

Editing the Dataset API Name ensures the Prism data source has a clear and meaningful name, facilitating its use in reporting and analytics.

NEW QUESTION # 39

A Prism data administrator is ready to create a Prism data source. As data is updated in Prism, the goal is to update the data in the Prism data source concurrently, enabling immediate incremental updates. How should the administrator create the Prism data source?

- A. Publish a derived dataset with the Prism: Default to Dataset Access Domain.
- B. Create a table and select Publish.
- **C. Create a table and select the Enable for Analysis checkbox.**
- D. Set Data Source Security on a derived dataset and select Publish.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, creating a Prism data source that supports immediate incremental updates as data is updated in Prism requires a specific configuration. According to the official Workday Prism Analytics study path documents, the administrator should create a table and select the Enable for Analysis checkbox (option A). The "Enable for Analysis" option, when selected during table creation, allows the table to be used directly as a Prism data source with real-time updates. This setting ensures that as data in the table is updated (e.g., through a Data Change task), the changes are immediately reflected in the Prism data source, enabling incremental updates without the need for republishing. This is particularly useful for scenarios requiring near- real-time data

availability in reporting or analytics.

The other options do not achieve the goal of immediate incremental updates:

* B. Create a table and select Publish: Publishing a table creates a static Prism data source, but updates to the table require republishing, which does not support immediate incremental updates.

* C. Publish a derived dataset with the Prism: Default to Dataset Access Domain: Publishing a derived dataset creates a data source, but updates to the underlying data require republishing the dataset, which is not concurrent or incremental.

* D. Set Data Source Security on a derived dataset and select Publish: Setting security and publishing a derived dataset follows the same process as option C, requiring republishing for updates, which does not meet the requirement for immediate updates.

Selecting the "Enable for Analysis" checkbox when creating a table ensures the Prism data source supports concurrent, incremental updates as data changes in Prism.

NEW QUESTION # 40

A Prism data administrator combined data from multiple sources down to a final derived dataset, including current worker data.

There is a new requirement to append historical worker data to the dataset in a uniform layout. The historical worker data includes some, but not all, fields that align with the current worker data.

Using current worker data as the primary pipeline, how can the historical worker data points be brought in?

- A. Add a Join stage with an Inner Join.
- B. Add a Join stage with a Right Outer Join.
- C. Add a Join stage with a Left Outer Join.
- D. Add a Union stage.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, when the goal is to append data from one dataset to another in a uniform layout, such as combining current worker data with historical worker data, a Union stage is the appropriate transformation. According to the official Workday Prism Analytics study path documents, a Union stage is used to append rows from one pipeline to another, stacking the data vertically while aligning fields based on their names and types. In this scenario, the current worker data (primary pipeline) and historical worker data (secondary pipeline) share some fields, and a Union stage will combine the rows from both datasets into a single dataset. Fields that exist in one pipeline but not the other will have NULL values for the rows where they are not present, ensuring a uniform layout without losing data.

The other options are not suitable for this requirement:

* A. Add a Join stage with a Right Outer Join: A Right Outer Join would include all rows from the historical worker data and only matching rows from the current worker data, which does not align with the goal of appending all data in a uniform layout.

* C. Add a Join stage with a Left Outer Join: A Left Outer Join would include all rows from the current worker data and matching rows from the historical worker data, but this is not an append operation; it's a matching operation based on a join condition, which isn't specified here.

* D. Add a Join stage with an Inner Join: An Inner Join would only include rows where matches exist between the two datasets, potentially excluding non-matching historical or current worker data, which does not meet the requirement to append all data.

The Union stage is the correct approach to append historical worker data to the current worker data, ensuring all rows are included in a uniform layout, with NULLs filling in for missing fields.

NEW QUESTION # 41

You want to create a Prism calculated field to change the field type to date data using the TO_DATE function.

The field from Workday is numeric data and you will use the Manage Fields stage to prepare the data for use in the function. What will you need to change about the field in the Manage Fields stage?

- A. Input Type

- B. Input Name
- **C. Output Type**
- D. Output Name

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, the TO_DATE function in a calculated field is used to convert a string or compatible data type into a date. However, in this scenario, the field from Workday is numeric, and the TO_DATE function typically requires a string input (e.g., a numeric value like 20230101 needs to be converted to a string like "20230101" before applying TO_DATE). According to the official Workday Prism Analytics study path documents, to prepare the numeric field for use with the TO_DATE function, you must first use a Manage Fields stage to change the field's Output Type to Text. The Manage Fields stage allows you to modify the field's properties, and changing the Output Type from Numeric to Text converts the numeric values into a string format that the TO_DATE function can then process (e.g., TO_DATE ([Field_Name], "YYYYMMDD")).

The other options are not relevant:

* B. Output Name: Changing the Output Name renames the field but does not address the field type compatibility required for the TO_DATE function.

* C. Input Type: The Manage Fields stage does not modify an "Input Type"; it adjusts the Output Type to transform the field as it moves through the pipeline.

* D. Input Name: There is no "Input Name" property in the Manage Fields stage; this option is not applicable.

By changing the Output Type to Text in the Manage Fields stage, the numeric field is converted to a string, making it compatible with the TO_DATE function for creating a date field in the calculated field.

NEW QUESTION # 42

You want to configure access to a published Prism data source to use it in reporting and discovery boards.

What action must you take?

- A. Share the dataset with appropriate users.
- B. Share the imported Workday report to provide users with access to the published Prism data source.
- C. Schedule the recurring publish process.
- **D. Edit the data source security and select a domain.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, configuring access to a published Prism data source for use in reporting and discovery boards requires managing its security settings. According to the official Workday Prism Analytics study path documents, the necessary action is to edit the data source security and select a domain (option A).

After a dataset is published as a Prism data source, access is controlled through security domains. By editing the data source security and assigning it to an appropriate security domain (e.g., a domain that grants access to specific user groups like report writers or analysts), you ensure that authorized users can access the data source for reporting and discovery boards. This aligns with Workday's configurable security framework, ensuring that only users with the appropriate permissions can view or use the data source.

The other options are incorrect:

* B. Share the dataset with appropriate users: Sharing the dataset itself does not grant access to the published Prism data source; access to the data source is controlled through its security settings, not the dataset's sharing settings.

* C. Share the imported Workday report to provide users with access to the published Prism data source:

Sharing an imported Workday report does not affect access to the Prism data source; the data source's security must be configured directly.

* D. Schedule the recurring publish process: Scheduling a recurring publish process ensures the data source is updated regularly, but it does not configure access for reporting or discovery boards.

Editing the data source security and selecting a domain is the critical step to enable access for reporting and discovery boards.

NEW QUESTION # 43

.....

In this age of knowledge competition, we must keep up with the pace of the times, otherwise we will be eliminated. How to improve your ability and how to prove your ability is crucial. The answer is Workday-Prism-Analytics Certification can help you prove your strength and increase social competitiveness. Although it is not an easy thing for somebody to pass the exam, but our Workday-Prism-Analytics Exam Torrent can help aggressive people to achieve their goals. This is the reason why we need to recognize the importance of getting the test Workday-Prism-Analytics certification.

Workday-Prism-Analytics Exam Question: <https://www.actualcollection.com/Workday-Prism-Analytics-exam-questions.html>
