100% Pass Quiz 2026 Useful 4A0-100: Dumps Nokia IP Networks and Services Fundamentals Discount

The authority and validity of Alcatel-Lucent 4A0-100 pdf practice are the 100% pass guarantee for all the IT candidates. We ensure you one year free update after purchase, so you can obtain the latest information about 4A0-100 test cram review without costing extra money. Besides, you can download the CramPDF 4A0-100 Torrent dumps and install it on your electronic device, thus you can review at anytime and anywhere available. The fast study and 4A0-100 valid practice will facilitate your coming test.

Alcatel-Lucent Nokia IP Networks and Services Fundamentals Sample Questions (Q243-Q248):

NEW QUESTION # 243

How does LDP select the path used for an LSP?

- A. LDP uses the shortest hop-count between two endpoints for the LSP.
- **B. LDP follows the path chosen by the IGP.**
- C. LDP must be configured hop-by-hop by the service provider.
- D. LDP monitors the available bandwidth on all links and signals the LSP based on this information.

Answer: B

Explanation:

Section: Volume B

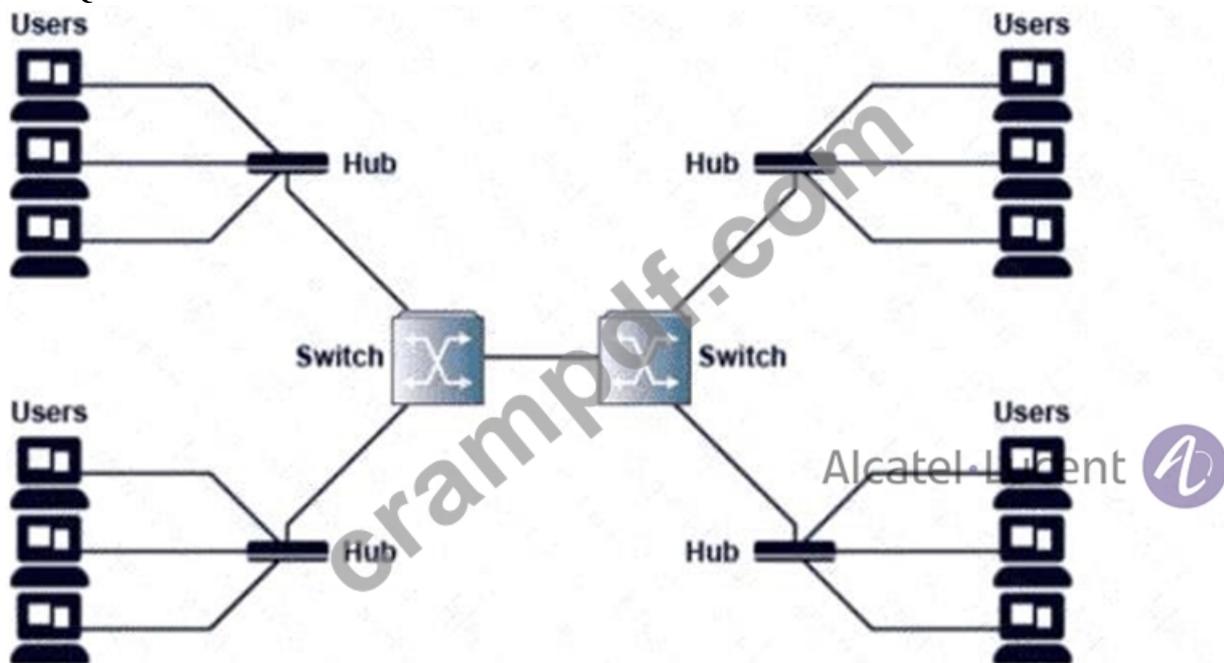

NEW QUESTION # 244

Which of the following best describes an Autonomous System (AS)?

- A. A group of routers that are under one administrative authority.
- B. A group of networks that make up the Internet.
- C. A group of networks from different organizations exchanging routes using IGP routing protocols.
- D. Any organization that has a connection to the Internet.

Answer: A

NEW QUESTION # 245

An Ethernet Local Area Network (LAN) consists of the components shown in the diagram. Assuming there are no VLANs, how many broadcast domains are on this LAN?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

A broadcast domain is a logical division of a network in which all nodes can reach each other with broadcast frames (Layer 2). Devices within the same broadcast domain receive broadcast packets sent by others.

In the diagram:

- * Multiple users connect to hubs.
- * Hubs are Layer 1 devices and do not break broadcast domains. They simply replicate incoming electrical signals to all ports.
- * Hubs are then connected to switches.
- * Switches, unless VLANs are configured, forward broadcasts to all ports except the incoming one, effectively keeping all devices in the same broadcast domain.
- * The two switches are connected together without VLAN segmentation.

Therefore:

- * The entire LAN depicted is a single Layer 2 broadcast domain.
- * There are no routers or VLANs to break or separate the domain.

Correct answer: A, 1

NEW QUESTION # 246

With a subnet mask of 255.255.255.224, which of the IP addresses below are valid host addresses? (Choose all that apply)

- A. 17.23.119.63
- B. 87.99.12.159
- C. 95.11.22.93
- D. 192.11.25.87

Answer: C,D

Explanation:

Section: Volume A

NEW QUESTION # 247

Which of the following Nokia 7750 SR components is NOT part of the data plane?

- A. The Media Dependent Adapter (MDA)
- B. The Input/ Output Module (IOM)
- C. The Control Processor Module (CPM)
- D. The Switch Fabric (SF)

Answer: C

NEW QUESTION # 248

.....

The 4A0-100 exam practice test questions are designed and verified by experienced and qualified Alcatel-Lucent 4A0-100 exam trainers. They check and verify all Alcatel-Lucent 4A0-100 exam dumps one by one and offer the best possible answers to a particular Alcatel-Lucent 4A0-100 Exam Questions. So you will find each Alcatel-Lucent 4A0-100 exam questions and their respective answers correct and error-free and assist to complete the 4A0-100 exam preparation quickly.
